FACTSHEET

Groww
MUTUAL FUND

HOW TO READ FACTSHEET

Fund Manager

An employee of the asset management company investment manager to a mutual fund, who manages investments of the scheme. He/She is usually part of a larger investment team.

Application Amount for Fresh Subscription

This is the minimum investment amount that a new investor shall invest in a mutual fund scheme.

Minimum Additional Amount

This is the minimum investment amount for an existing investment from an investor in the mutual fund scheme.

Yield to Maturity

The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP

SIP or Systematic Investment Plan works on the principle of making periodic investments of a fixed sum in the scheme. For instance, an investor may opt for SIP that invests ₹500 every 15th of the month in an equity fund for a period of three years or such amount as mentioned in the application form by the investor .

NAV

The NAV or the Net Asset Value is the total asset value per unit of the mutual fund scheme after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund scheme.

Benchmark

A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of a scheme under a mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec. Further, the benchmark against whose performance of the scheme is shall be mentioned and in line with the benchmark adopted by mutual fund and mentioned in 'SID' Scheme Information Document.

Exit Load

Exit load is charged at the time an investor redeems the units of a scheme. The exit load is deducted from the prevailing NAV at the time of redemption. For instance, if the NAV is ₹100 and the exit load is 1%, the redemption price would be ₹ 99 Per Unit. Please refer the SID to know in detail about the exit load.

Modified Duration

Modified duration is the price sensitivity and the percentage change in price for a unit change in yield

Standard Deviation

Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, its means its range of performance is wide, implying greater volatility.

HOW TO READ FACTSHEET

R Square

The R-squared figure demonstrates how much of a fund's movements can be explained by the movements in its benchmark index. The higher the R-squared figure, the more closely the fund's performance can be explained by its index, whereas a fund with a lower R-squared doesn't behave much like its index.

Beta

Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM

AUM or Assets Under Management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Macaulay duration

Macaulay duration is defined as the weighted average time to full recovery of principal and interest payments of a bond i.e. the weighted average maturity of cash flows. The weight of each cash flow is determined by dividing the present value of the cash flow by the price of the bond.

Holdings

The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both in line with SEBI Circulars/Regulation. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme

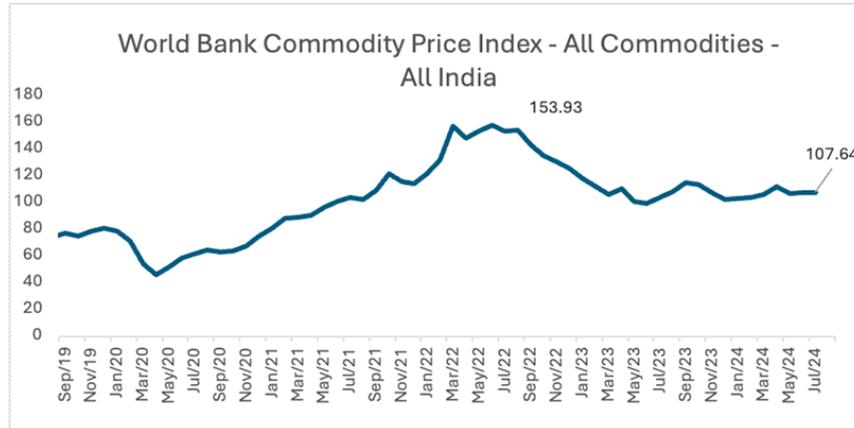

The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a scheme of a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories and in line with SEBI Categorization Circular.

Rating Profile

Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Macro-economic Outlook:

1. Range-bound Movement in Commodities.

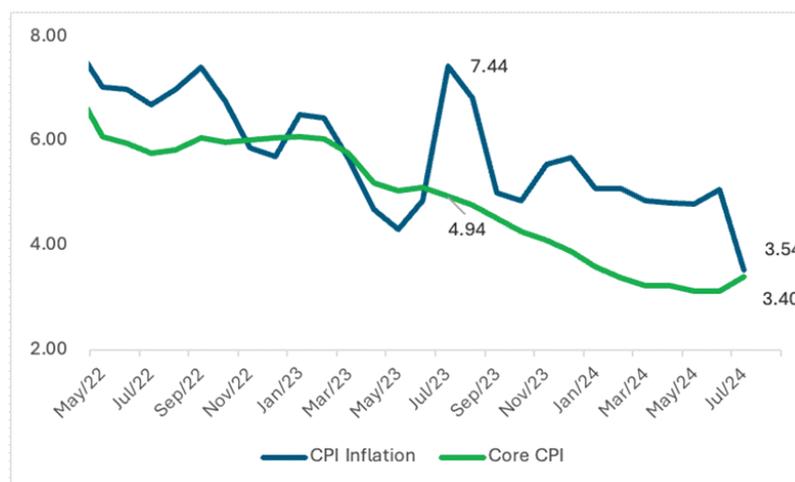

source: Indiadatahub.com, 31st August, 2024

Crude oil prices ended the month at \$78.80 vs \$79.52 at the end of the previous month.

- Global crude oil prices are trading with a downside bias when compared to the levels witnessed last month responding to concerns about global demand
- Concerns about the growth prospects in China were further reinforced from the latest edition of the July high frequency indicators with slowing momentum visible across sectors—retail sales, industrial production, fixed asset investments, credit and trade
- Developments in the Middle East, fears that the region could be on the brink of an all-out war and potentially disrupt supplies.

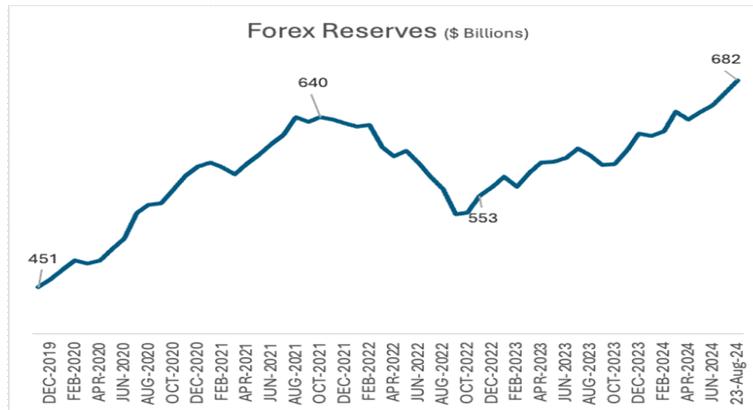

2. Softening of Inflation

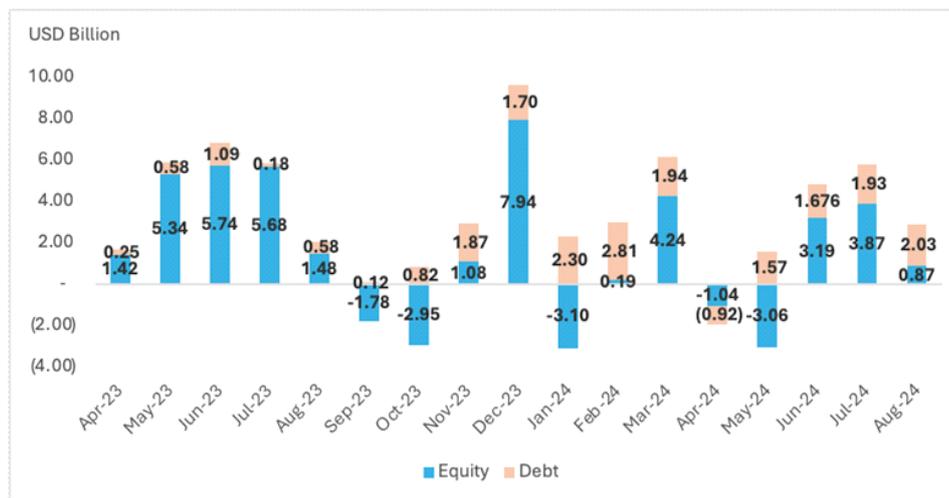

source: Indiadatahub.com, 31st August 2024

- CPI inflation fell to a 59-month low of 3.54% vs 5.08% in June.
- Food inflation moderated to 5.1% YoY (8.4% in June), the deceleration is mostly due to statistical effect
- Core inflation inched up to 3.4% YoY (+3.1% earlier) driven by telecom tariffs hikes
- The softening in inflation was driven by a favourable base, as both headline inflation (+1.4% MoM) and food inflation (2.8% MoM) rose sequentially
- The key risk is pick-up in rainfall in a few pockets, which may again drive a spike in veggie prices.

3. Ample Forex Reserves Buffer and FII flows

Source: dbie.rbi.org.in, 31st August 2024

Source: NSDL, 31st August 2024

Debt Market Flows:

During the month of August 2024, the FPI flows into the debt market are around US\$2.03 billion.

Equity Market Flows:

During the month of August 2024, the FPI had inflows into the equity market of US\$0.87 billion.

Debt Market Outlook:

1. Rate Cuts

The outlook for developed economies suggests a trend towards rate cuts due to lower-than-expected economic growth and softening inflation data. However, these cuts are expected to be gradual and data dependent. The Reserve Bank of India (RBI) is expected to follow a similar approach, monitoring inflation and other economic factors before changing its stance to neutral and considering rate cuts. For investors, this environment makes debt investments with up to a 3-year tenor potentially attractive.

2. Projected CPI and Real Interest Rate

With the 1-Year Government Treasury Bill currently at a 6.70% – 6.75% Yield to Maturity and average inflation at 4.5% for FY 25 as projected in June Monetary Policy, the real interest rate stands at approximately 2-2.25%. This positive real interest rate is crucial for protecting investors' purchasing power amidst fluctuating market conditions, making a strong case for investment in the front end of the curve up to a 3-year duration.

Debt Market Data:

Annualized Return as 30-August-2024	3M	6M	1Yr	3Yr	5Yr
Nifty 5 Year GSEC (Government Securities) Index	12.04%	9.69%	8.87%	5.85%	6.64%

Market Development:

1. Trade Deficit

- Merchandise exports: Exports fell by 1.5% YoY at USD 34bn in July led by lower oil exports even as non-oil exports were higher. Net services exports rose by +11.2% YoY at USD 13.9bn
- Merchandise Imports: Imports rose by +7.5% YoY at USD 57.5bn led by higher oil and non-oil-non-gold imports, while gold imports fell by 10.7% YoY at USD 3.1bn
- Trade Deficit: Trade deficit widened to a 9-month high of USD 23.5bn in July from USD 21bn in June, led by non-oil non-gold deficit at USD 12bn (USD 8.6bn in June). Oil deficit narrowed a tad to USD 8.6bn (USD 9.5bn in June). Gold imports were steady on MoM basis
- India's stronger growth compared with world is driving non-oil deficits higher. Gold imports to see a near-term pick-up in demand post customs duty cut. While exports were steady so far, a slowing global economy could impact India's goods and services exports.

2. Economic Growth continues at a slightly slower pace than last year

- India's Q1FY25 GDP growth at 6.7% YoY vs 8.2% YoY in Q1FY24.
- On the other hand, nominal GDP growth in Q1 at 9.7% YoY is higher than last year's 9.2 % YoY. The deflator is now much higher at 3% (0.3% last year).
- GVA at 6.8% YoY (our estimate: 6.8%) is higher than last quarter when it expanded by 6.3% YoY.

3. July Monetary Policy Minutes:

- Repo rate kept unchanged at 6.5% for the 9th straight meeting. Policy stance maintained at "withdrawal of accommodation" to contain inflation risks. FY25 growth projection maintained at 7.2% and average headline inflation projection at 4.5%
- The RBI's MPC minutes highlight confidence in growth due to structural factors and a pick-up in rural consumption, aided by a normal monsoon.
- However, there are concerns about food inflation spillover into headline inflation and rising inflation expectations. The members are awaiting a deceleration in food inflation for inflation to stabilize towards the target.

Source: RBI.org.in

Equity Market Outlook:

Nifty was flat for the month of August 2024 with modest 1% return MoM. However, sector specific rotation remained. Banks continued to remain tepid with deposit challenges and RBI regulations weighing on sentiment. Moderate uptick in retail slippages in 1QFY25 results also weighed on sentiment for the sector. However, select banks remain reasonable on the valuation front. Capital goods and Défense stocks took a breather owing to rich valuations and remained range bound. After a strong rally in July 2024, the IT sector remained volatile in August with mixed signals from the US economy. Nevertheless, large cap IT stocks have performed steady in August as well. Small cap Index also gave only modest returns in August and had a period of consolidation. On the domestic economy front, macro data remained stable. On the global data, inflation moderated further and hopes for a rate cut increased. However, a slowdown in the US economy can be a concern.

Going forward, the market will look for the quantum of rate cut signals from the US in September 2024. While a 25 bps rate by the Fed is factored, the market would look for further queues on the US economy. With the upcoming festive season, Automobile, Consumer Durable and select Retail sector stocks could be in focus. Also while elections have impacted ordering and Capex in 1QFY25, pick up in the same in 2QFY25 would be watched for in Capgood sector.increased.

GROWW DYNAMIC BOND FUND

(FORMERLY KNOWN AS INDIABULLS DYNAMIC BOND FUND)

(An open ended dynamic debt scheme investing across duration. A relatively high interest rate risk and moderate credit risk.)

August 2024

Investment Objective

To generate reasonable returns commensurate with the risk taken by active duration management of the portfolio. The Scheme would be investing in debt instruments including but not limited to bonds, debentures, government securities and money market instruments over various maturity periods. However, there can be no assurance that the investment objective of the scheme will be achieved. The Scheme does not assure or guarantee any returns.
