FACTSHEET

**Groww**  
MUTUAL FUND

# HOW TO READ FACTSHEET

## Fund Manager

An employee of the asset management company investment manager to a mutual fund, who manages investments of the scheme. He/She is usually part of a larger investment team.

## Application Amount for Fresh Subscription

This is the minimum investment amount that a new investor shall invest in a mutual fund scheme.

## Minimum Additional Amount

This is the minimum investment amount for an existing investment from an investor in the mutual fund scheme.

## Yield to Maturity

The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

## SIP

SIP or Systematic Investment Plan works on the principle of making periodic investments of a fixed sum in the scheme. For instance, an investor may opt for SIP that invests ₹500 every 15th of the month in an equity fund for a period of three years or such amount as mentioned in the application form by the investor .

## NAV

The NAV or the Net Asset Value is the total asset value per unit of the mutual fund scheme after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund scheme.

## Benchmark

A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of a scheme under a mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec. Further, the benchmark against whose performance of the scheme is shall be mentioned and in line with the benchmark adopted by mutual fund and mentioned in 'SID' Scheme Information Document.

## Exit Load

Exit load is charged at the time an investor redeems the units of a scheme. The exit load is deducted from the prevailing NAV at the time of redemption. For instance, if the NAV is ₹100 and the exit load is 1%, the redemption price would be ₹ 99 Per Unit. Please refer the SID to know in detail about the exit load.

## Modified Duration

Modified duration is the price sensitivity and the percentage change in price for a unit change in yield

## Standard Deviation

Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

# HOW TO READ FACTSHEET

## R Square

The R-squared figure demonstrates how much of a fund's movements can be explained by the movements in its benchmark index. The higher the R-squared figure, the more closely the fund's performance can be explained by its index, whereas a fund with a lower R-squared doesn't behave much like its index.

---

## Beta

Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

---

## AUM

AUM or Assets Under Management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

---

## Macaulay duration

Macaulay duration is defined as the weighted average time to full recovery of principal and interest payments of a bond i.e. the weighted average maturity of cash flows. The weight of each cash flow is determined by dividing the present value of the cash flow by the price of the bond.

---

## Holdings

The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both in line with SEBI Circulars/Regulation. The objective is to give investors an idea of where their money is being invested by the fund manager.

---

## Nature of Scheme

The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a scheme of a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories and in line with SEBI Categorization Circular.

---

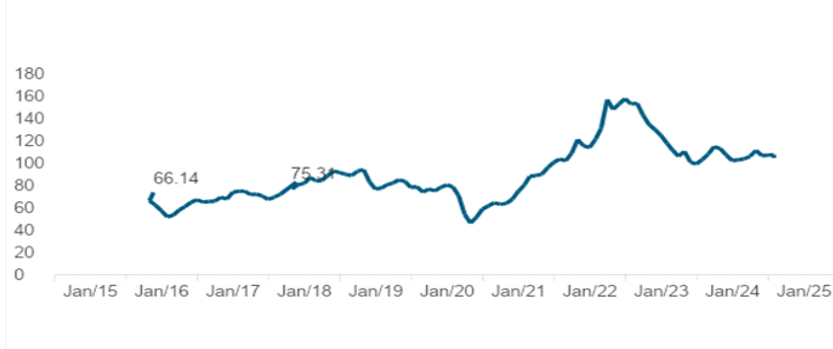

## Rating Profile

Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

---

## Macro-economic Outlook:

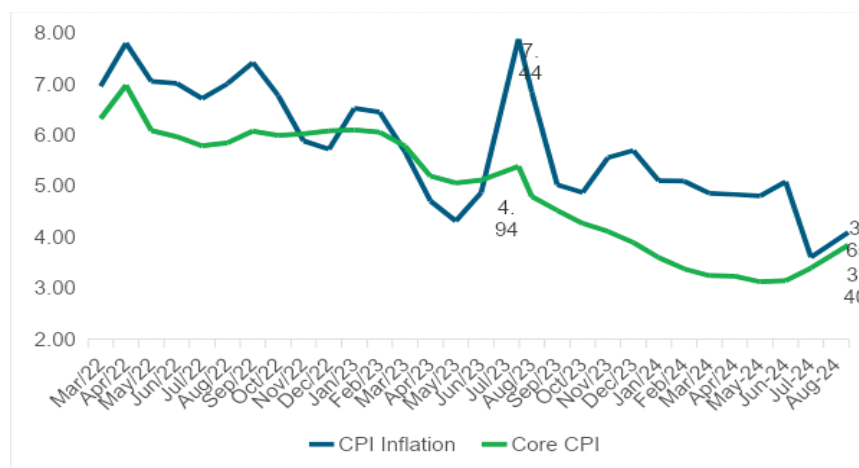

### 1. Range-bound Movement in Commodities.

source: Indiadatahub.com,30th September ,2024

- Crude oil prices ended the month at \$71.80 vs \$78.80 at the end of the previous month.
- Global crude oil prices fell sharply over the last month responding to a much more persistent build-up of concerns about demand from China
- The global supply of crude also remained unchanged in August from the levels witnessed in the previous month
- The continued tightness in physical markets were largely ignored as focus remains on possibility of improving demand-supply imbalances in the medium-term
- Developments in the Middle East, fears that the region could be on the brink of an all-out war and potentially disrupt supplies.
- Base-metals prices like copper etc were boosted on China stimulus.

### 2. Softening of Inflation

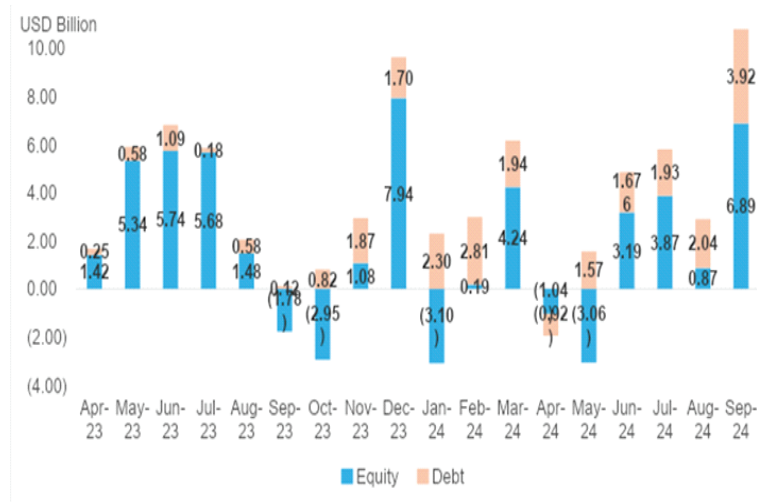

source: Indiadatahub.com,30th September 2024

- CPI inflation inched up to 3.65% YoY in August from 3.6% in July (revised upwards from 3.54% earlier).
- Food and beverages inflation rose to +5.3% YoY (+5.1% in July), while core inflation remained steady at +3.4% YoY (same as July)
- The softening in inflation was driven by a favourable base, as both headline inflation (+1.4% MoM) and food inflation (2.8% MoM) rose sequentially
- Normal monsoon and higher acreage for paddy and pulses implies inflation should ease in these segments. Although, a pick-up in veggie prices (led by onion) is visible on account of heavy rainfall in a few states impacting output

### 3. Ample Forex Reserves Buffer and FII flows

Source: dbie.rbi.org.in, 30th September 2024

Source: NSDL, 30th September 2024

#### Debt Market Flows:

During the month of September 2024, the FPI flows into the debt market are around US\$3.92 billion.

#### Equity Market Flows:

During the month of September 2024, the FPI had inflows into the equity market of US\$6.89 billion.

## Debt Market Outlook:

### 1. Rate Cuts

The outlook for developed economies suggests a trend towards rate cuts due to lower-than-expected economic growth and softening inflation data. However, these cuts are expected to be gradual and data dependent. The Reserve Bank of India (RBI) is expected to follow a similar approach, monitoring inflation and other economic factors before changing its stance to neutral and considering rate cuts. For investors, this environment makes debt investments with up to a 3-year tenor potentially attractive.

### 2. Projected CPI and Real Interest Rate

With the 1-Year Government Treasury Bill currently at a 6.50% – 6.55% Yield to Maturity and average inflation at 4.5% for FY 25 as projected in August Monetary Policy, the real interest rate stands at approximately 1.8-2.05%. This positive real interest rate is crucial for protecting investors' purchasing power amidst fluctuating market conditions, making a strong case for investment in the front end of the curve up to a 3-year duration.

## Debt Market Data:

Annualized Return as 30-September-2024	3M	6M	1Yr	3Yr	5Yr

## Market Development:

### 1. Trade Deficit

- Merchandise exports: Exports fell by 9.3% YoY at USD 34.7bn in August led by lower oil exports (-38% YoY) even as non-oil exports were stable (+0.1% YoY). Net services exports rose by +10% YoY at USD 15bn
- Merchandise Imports: Imports rose by +3.3% YoY to an all-time high of USD 64.4bn led by higher gold imports (+104% YoY) and non-oil non-gold imports (+5.4% YoY). Oil imports fell sharply (-32% YoY)
- Trade Deficit: Deficit widened to a 10-month high of USD 29.7bn in August from USD 23.6bn in July, led by higher gold imports (USD 10bn in Aug) and non-oil non-gold deficit at USD 13.9bn (USD 12.1bn in July). Oil deficit narrowed to USD 5.1bn (USD 8.6bn in July)
- Slowing global economy would have an impact on India's exports. Gold imports this year too will be elevated given higher global prices. But lower commodity and oil prices should offset the impact to some extent

### 2. Federal Open Market Committee (FOMC) starts easing cycle

- The FOMC commenced easing at faster pace of 50bps than our expectations of 25bps pushing the fed funds rate to 4.75%-5.00% range while it laid the foundation for continued easing over 2024 and 2025
- The need to front-load was justified by the fact that its focus has shifted from upside risks to inflation to deterioration in the labour market.
- The guidance from the 'dot-plot' was that rates could be eased further by 50bps in 2024, 100bps in 2025 and 50bps by 2026
- The economic projections provided showed that the FOMC continues to believe that a 'soft-landing' is expected to unfold.
- Growth was expected to remain above trend pace over the forecast horizon over 2024-2027. The unemployment rate was raised to 4.4% for 2024 and 2025 respectively while it was projected to move lower over 2026 and 2027. Inflation projections were lowered across the forecast horizon and expected to move to the 2% threshold over 2026 and 2027

### 3. Government H2 Borrowing Calendar:

- Borrowing calendar for H2FY24 stands at INR 6.61tn (~47% of total issuance for FY25), higher than the previous year (43% in H2FY24) but in-line with the Budget estimate. Net borrowing stands at INR 4.95tn versus INR 4.3tn last year.
- The tenor mix was skewed in favour of a longer end. With lower T-bill borrowing for Q3, steepening bias in the yield curve is expected.
- Banks and insurance companies are expected to remain major buyers of government securities. Notably, increased FPI investment in debt (USD 7.7bn in Q2) has emerged as another positive trigger for domestic yield outlook.
- Both demand and supply outlook for government bonds is favourable. Indian 10-year yield has fallen since the last MPC meeting given the global decline in yields along with fiscal and positive medium-term inflation outlook (monsoon).

## 4.China's Economic Stimulus

- Chinese policymakers announced a coordinated monetary and fiscal response to slowing economic activity.
- The central bank has cut existing mortgage rates by 50 basis points, a move intended to support the housing sector.
- The timing of China's economic support measures, combined with expectations of lower interest rates in the US, has created a more optimistic mood in financial markets.

## Equity Market Outlook:

Equity markets digested multiple events during the month, on one hand there was escalation of Middle East war, on the other the US Fed cut rates by 50bps after inflation data being benign for the last couple of months. Crude declined given global growth concerns and India's weight in MSCI all world index crossed China's weight (an economy which is more than 4x its size).

On the domestic front monsoon saw good pick up and ended at 8% higher than long period average as per IMD.

Large caps out performed the broader market as valuation concerns in Mid and Small Cap space are becoming more pronounced. Metals was the best performing sector due to anticipation of stimulus in China whereas the IT sector was the worst performing sector during the month. Real Estate and FMCG were the other two notable performing sectors.

Market is now eagerly awaiting second quarter results and looking forward to spending in the festive season. There has been some slack in the economy given slow government spending due to election and rural wages. We believe that Government spending will start picking up going ahead and provide good support to growth. Commodity prices have been benign (including crude) providing margin cushion to companies. Overall we remain positive on the market with a long term view and believe that macroeconomic tailwinds of controlled inflation and fiscal prudence will accelerate the bottom up story of India in next decade, which will offer a great wealth creation opportunity in Indian equities.

# GROWW Banking & Financial Services Fund

(An open ended equity scheme investing in banking and financial services related sectors)

September 2024

## Investment Objective

The primary investment objective of the scheme is to generate consistent long-term returns by investing in equity and equity-related instruments of banking and financial services companies and other related sectors/companies. The fund aims to capitalize on the growth opportunities and growth potential of various sub-sectors within the BFSI sector, including (but not limited to) banks, NBFCs, insurance companies, asset management companies, capital market participants, fintech players etc. (This includes companies benefiting from or contributing to the growth of the banking and financial services sector). However, there is no assurance or guarantee that the investment objective of the Scheme will be achieved. The Scheme does not assure or guarantee any returns.
