<p>*or similar instruments as may be permitted by RBI/ SEBI, subject to requisite approvals from SEBI / RBI, if needed. The Scheme may take an exposure to equity derivatives of constituents of the underlying index for short duration when securities of the Index are unavailable, insufficient or for rebalancing at the time of change in Index or in case of corporate actions or for hedging purposes, as permitted by SEBI/RBI. The Exposure to derivative instruments shall not exceed 50% of the total Net Assets of Scheme. The Fund shall not write options or purchase instruments with embedded written options. When constituent's securities of underlying Index are available again, derivative positions in these securities would be unwound. Subject to the SEBI Regulations as applicable from time to time, the Scheme may, if the Trustees permit, participate in securities lending. The maximum exposure of the Scheme to a single intermediary in the stock lending programme at any point of time would be limited to 50% of the market value of its equity portfolio or up to such limits as may be specified by SEBI. The Scheme will not lend more than 75% of its corpus. The cumulative gross exposure through equity, debt, derivative positions, other permitted securities/assets and such other securities/assets as may be permitted by the Board from time to time will not exceed 100% of the net assets of the scheme, subject to approval if any.</p> <p>The Asset Allocation portion shall also include subscription and redemption cash flow which may be undeployed due to various reasons (dividend from underlying securities, rebalancing or balances for running cost of the scheme, residual amount due to execution on rounding off etc). - b. debt instruments having Structured Obligations / Credit Enhancements.

Exposure to equity derivatives of the index itself or its constituent stocks may be undertaken when equity shares are unavailable, insufficient or for rebalancing in case of corporate actions for a temporary period which shall not exceed 7 days. The exposure to derivatives will be rebalanced to align with the underlying index changes in weights or constituents. The notional exposure of the Scheme in Derivative instruments shall be restricted to 50% of the net assets of the Scheme. This will also include various derivative and hedging products to reduce the risk of the portfolio, in the manner permitted by SEBI from time to time. Index futures/options are meant to be an efficient way of buying/selling an index compared to buying/selling a portfolio of physical shares representing an index for ease of execution and settlement. It can help in reducing the Tracking Error in the Scheme. Index futures/options may avoid the need for trading in individual components of the index, which may not be possible at times, keeping in mind the circuit filter system and the liquidity in some of the individual stocks. Index futures/options can also be helpful in reducing the transaction costs and the processing costs on account of ease of execution of one trade compared to several trades of shares comprising the underlying index and will be easy to settle compared to a physical portfolio of shares representing the underlying index. In case of investments in index futures/options, the risk/reward would be the same as investments in a portfolio of shares representing an index. However, there may be a cost attached to buying an index future/option.

The cumulative gross exposure to equity, derivatives, debt instruments and money market instruments will not exceed 100% of the net assets of the scheme.

Debt securities include, but are not limited to, Debt securities of the Government of India, State and Local Governments, Government Agencies, Statutory Bodies, Public Sector Undertakings, Public Sector Banks or Private Sector Banks or any other Banks, Financial Institutions, Development Financial Institutions, and Corporate Entities, collateralized debt securities or any other instruments as may be prevailing and permissible under the Regulations from time to time). Further, the Scheme may for meeting liquidity requirements invest in Debt Securities (including money market instruments) referred to above could be fixed rate or floating rate, listed, unlisted, privately placed among others, as permitted by regulation.

Pending deployment of funds of a Scheme in securities in terms of investment objectives of the Scheme a mutual fund can invest the funds of the Scheme in short term deposits of scheduled commercial banks in terms of paragraph 12.6 of SEBI Master circular for Mutual Funds dated May 19, 2023 . Further, the Scheme may for meeting liquidity requirements invest in units of money market/liquid schemes of Groww Mutual Fund and/or any other mutual fund provided that aggregate inter-scheme investment made by all schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund. The AMC shall not charge any investment management fees with respect to such investment. In case of any deviation from the above asset allocation, the portfolio shall be rebalanced within 7 Days to ensure adherence to the above norms. In the event of involuntary corporate action, the Scheme shall dispose of the security not forming part of the underlying index within 7 Days from the date of allotment/ listing. In case of change in constituents of the index due to periodic review, the portfolio of the scheme shall be rebalanced within 7 calendar days. Any transactions undertaken in the scheme portfolio in order to meet the redemption and subscription obligations shall be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.

Change in Asset Allocation Pattern

The Scheme in general, will hold all the securities that constitute the underlying Index in the same proportion as the index. Expectation is that, over a period of time, the tracking error of the Scheme relative to the performance of the Underlying Index will be relatively low. The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal market circumstances such tracking error is not expected to exceed 2% p.a for daily 12 month rolling return. However, in case of events like, IDCW received from underlying securities, and market volatility during rebalancing of the portfolio following the rebalancing of the Underlying Index, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. Since the Scheme is an index fund, it will endeavour that at no point of time the Scheme will deviate from the index.

Subject to SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages can vary substantially depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unit holders.

. RISK FACTORS

Standard Risk Factors:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down depending on the factors and forces affecting the capital markets.
- Past performance of the Sponsor and other affiliates/AMC/Mutual Fund (or any of its schemes) does not guarantee future performance of the scheme.
- Groww Nifty Smallcap 250 Index Fund is the name of the Scheme and do not in any manner indicate either the quality of the Scheme, its future prospects or returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs.50,000/- made by it towards setting up the Fund.
- The Groww Nifty Smallcap 250 Index Fund is not guaranteed or assured return Scheme.

ii. Scheme Specific Risk Factors & Special Considerations

- The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which it invests.
 - Changes in Government policy in general and changes in tax benefits applicable to mutual funds may impact the returns to Investors in the Scheme.
 - Mutual Funds being vehicles of securities investments are subject to market and other risks and there can be no guarantee against loss resulting from investing in the schemes. The various factors which impact the value of scheme investments include but are not limited to fluctuations in the equity and bond markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of securities, tax laws, liquidity of the underlying instruments, settlements periods, trading volumes etc. and securities investments are subject to market risks and there is no assurance or guarantee that the objectives of the Scheme will be achieved.
 - From time to time and subject to the Regulations, the Sponsors, the Mutual Funds and investment companies managed by them, their affiliates, their associate companies, subsidiaries of the Sponsors, and the AMC may invest either directly or indirectly in the Scheme. The funds managed by these affiliates, associates, the Sponsors, subsidiaries of the Sponsors and /or the AMC may acquire a substantial portion of the Scheme's Units and collectively constitute a major investor in the Scheme. Accordingly, redemption of Units held by such funds, affiliates/associates and Sponsors might have an adverse impact on the Units of the Scheme because the timing of such redemption may impact the ability of other Unitholders to redeem their Units. Further, as per the Regulation, in case the AMC invests in any of the schemes managed by it, it shall not be entitled to charge any fees on such investments.
 - Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.
- The Scheme attempts to track the respective indices and it would invest in the securities included in its Underlying indices regardless of their investment merit. The Scheme may be affected by a general decline in the Indian markets.
 - Performance of the Nifty Smallcap 250 Index - TRI will have a direct bearing on the performance of the scheme. In the event the Nifty Smallcap 250 Index - TRI is dissolved or is withdrawn by NSE Indices Limited (NSEIL) or is not published due to any reason whatsoever, the Trustee reserves the right to modify the respective scheme so as track a different and suitable index or to suspend tracking the Nifty Smallcap 250 Index - TRI till such time it is dissolved / withdrawn or not published and appropriate intimation will be sent to the Unit holders of the scheme. In such a case, the investment pattern will be modified suitably to match the composition of the securities that are included in the new index to be tracked and the scheme will be subject to tracking errors during the intervening period.
 - Tracking errors are inherent in any index fund and such errors may cause the scheme to generate returns which are not in line with the performance of the Nifty Smallcap 250 Index - TRI or one or more securities covered by / included in the Nifty Smallcap 250 Index - TRI and may arise from a variety of factors including but not limited to, any delay in the purchase or sale of shares due to illiquidity in the market, settlement and realisation of sales proceeds, delay in credit of securities or in receipt and consequent reinvestment of Income Distribution cum Capital Withdrawal, etc.
 - The Indices reflect the prices of securities at a point in time, which is the price at close of business day on National Stock Exchange of India Limited (NSE). The scheme however, may trade these securities at different points in time during the trading session and therefore the prices at which the scheme trade may not be identical to the closing price of each scrip on that day on the NSE. In

- addition, the scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance, from NSE closing prices.
- NSEIL undertakes periodic reviews of the securities that are represented in the Nifty Smallcap 250 Index - TRI and from time to time may exclude existing securities or include new ones. In such an event, the scheme will endeavor to reallocate its portfolio to mirror the changes. However, the reallocation process may not occur instantaneously and permit precise mirroring of the Nifty Smallcap 250 Index - TRI during this period.
 - The potential of trades to fail may result in the scheme not having acquired the security at the price necessary to mirror the index.
 - Transaction and other expenses, such as but not limited to brokerage, custody, trustee and investment management fees.
 - Being an open-ended scheme, the scheme may hold appropriate levels of cash or cash equivalents to meet ongoing redemptions. The scheme may not be able to acquire or sell the desired number of securities due to conditions prevailing in the securities market, such as, but not restricted to: circuit filters in the securities, liquidity and volatility in security prices.
 - Due to the reasons mentioned above and other reasons that may arise, it is expected that the scheme may have a tracking error not exceeding 2% per annum. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMC, the tracking error may exceed 2% and the same will be intimated to the Trustees with corrective actions taken by the AMC, if any.
 - In case of investments in derivatives like index futures, the risk reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future. Further, there could be an element of settlement risk, which could be different from the risk in settling physical shares and there is a risk attached to the liquidity and the depth of the index futures market as it is relatively new market.

Risk specific to investing in securities forming part of Nifty Smallcap 250 Index - TRI and risks:-

Groww Nifty Smallcap 250 Index Fund is passively a managed Index Scheme i.e. the amount collected under the scheme is invested in securities of companies comprising the underlying index in the same weightages as they have in the underlying index. The composition of the underlying index is subject to changes that may be affected periodically by the Index Service Provider. Performance of the underlying index will have a direct bearing on the performance of the scheme. The extent of the Tracking error may have an impact on the performance of the scheme.

The index methodology may be changed by the index provider in future due to several externalities. The change in the methodology of the index may affect the future portfolio and/or performance of the index and the scheme.

Risks associated with investing in Small cap stocks

The scheme would predominantly invest in Equity and Equity related instruments pertaining to Small cap companies in line with the Investment objective of the scheme. While investing in Small cap stocks give one an opportunity to go beyond the usual large blue chip stocks and present possible higher capital appreciation, it is important to note that Small caps can be riskier and more volatile on a relative basis. Therefore, the risk levels of investing in Smallcap stocks are more than investing in stocks of large well-established companies. And it is important to note that generally, no one class consistently outperforms the others. Smallcap stocks carries higher liquidity risk as they are less extensively researched compared to largecap stocks. This may lead to abnormal illiquidity and consequent higher impact cost.

Risks associated with Capital Markets or Equity Markets, (i.e. Markets in which Equity Shares or Equity oriented instruments are issued and traded)

Investments in the equity shares of the Companies constituting the Underlying Index are subject to price fluctuation on daily basis. The volatility in the value of equity is due to various micro and macro-economic factors like economic and political developments, changes in interest rates, etc. affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme.

The Scheme would invest in the securities comprising the Underlying Index in the same proportion as the securities have in the Index. Hence, the risk associated with the corresponding Underlying Index would be applicable to the Scheme. The Underlying Index has its own criteria and policy for inclusion/exclusion of securities from the Index, its maintenance thereof and effecting corporate actions. The Fund would invest in the securities of the Index regardless of investment merit, research, without taking a view of the market and without adopting any defensive measures. The Fund would not select securities in which it wants to invest but is guided by the Underlying Index. As such the Scheme is not actively managed but is passively managed.

While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.

Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The NAV of the Scheme can go up and down because of various factors that affect the capital markets in general. Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. Within the Regulatory limits, the AMC may choose to invest in unlisted securities that offer attractive yields. This may however increase the risk of the portfolio.

Price fluctuations and Volatility: Mutual Funds, like securities investments, are subject to market and other risks and there can be neither a guarantee against loss resulting from an investment in the Scheme nor any assurance that the objective of the Scheme will be achieved. The NAV of the Units issued under the Scheme can go up or down because of various factors that affect the capital market in general, such as, but not limited to, changes in interest rates, government policy and volatility in the capital markets. Pressure on the exchange rate of the Rupee may also affect security prices.

- **Concentration / Sector Risk:** When a Mutual Fund Scheme, by mandate, restricts its investments only to a particular sector; there arises a risk called concentration risk. If the sector, for any reason, fails to perform, the portfolio value will plummet and the Investment Manager will not be able to diversify the investment in any other sector. Investments under this scheme will be in equity or equity related stocks spanning across the selected theme. Hence the concentration risks could be high.
- **Liquidity Risks:** Liquidity in Equity investments may be affected by trading volumes, settlement periods and transfer procedures. These factors may also affect the Scheme's ability to make intended purchases/sales, cause potential losses to the Scheme and result in the Scheme missing certain investment opportunities. These factors can also affect the time taken by GMF for redemption of Units, which could be significant in the event of receipt of a very large number of redemption

requests or very large value redemption requests. In view of this, redemption may be limited or suspended after approval from the Boards of Directors of the AMC and the Trustee, under certain circumstances as described in the Statement of Additional Information

Risk associated with Debt & Money Market Instruments

- **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.
- **Credit Risk:** In simple terms this risk means that the issuer of a debenture/bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme(s) has invested in Government Securities, there is no credit risk to that extent. Different types of securities in which the scheme(s) would invest as given in the scheme information document carry different levels and types of risk. Accordingly, the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.
- **Re-investment Risk:** Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- **Basis Risk (Interest - rate movement):** During the life of a floating rate security or a swap, the underlying benchmark index may become less active and may not capture the actual movement in interest rates or at times the benchmark may cease to exist. These types of events may result in loss of value in the portfolio.
- **Spread Risk:** In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. However, depending upon the market conditions, the spreads may move adversely or favourably leading to fluctuation in the NAV.
- **Liquidity Risk:** Due to the evolving nature of the floating rate market, there may be an increased risk of liquidity risk in the portfolio from time to time.
- **Other Risk:** In case of downward movement of interest rates, floating rate debt instruments will give a lower return than fixed rate debt instruments.

Risks associated with investing in TREPS Segments

The mutual fund is a member of securities and TREPS segment of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in TREPS segments are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time. In the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund allocated to the scheme on a pro-rata basis.

Risk associated with securities lending

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. In case the Scheme undertakes stock lending under the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Scheme should note that there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such lent securities and this can lead to temporary illiquidity

Risk factors with investing in Derivatives

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. As and when the Scheme trade in the derivatives market there are risk factors and issues concerning the use of derivatives that investors should understand.

Derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counter party”) to comply with the terms of the derivatives contract.

The specific risk factors arising out of a derivative strategy used by the Fund Manager may be as below:

- Lack of opportunity available in the market;
- The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Risk factors associated with Creation of Segregated Portfolio

1. Investor holding units of Segregated Portfolio may not be able to liquidate their holding till recovery of money from the issuer.
2. Security comprising Segregated Portfolio may not realise any value.
3. Listing of units of Segregated Portfolio on recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Risk Control/ Mitigation measures:

Risk mitigation measures for portfolio volatility and portfolio concentration: Index Fund being a passive investment carries lesser risk as compared to active fund management. The portfolio follows the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking error. Thus there is no additional element of volatility or stock concentration on account of fund manager decisions. The Risk Mitigation strategy revolves around minimizing the Tracking error to the least possible through regular rebalancing of the portfolio, taking into account the change in weights of stocks in the Underlying Index as well as the incremental collections into / redemptions from the Scheme.

Risk mitigation measures for managing liquidity: As per data from NSE more than half of market liquidity remains in the index. Therefore, the scheme does not envisage liquidity issues. The scheme may take exposure to equity derivatives of the index itself or its constituent stocks, when equity shares are unavailable, insufficient or for rebalancing in case of corporate actions for a temporary period.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

Trading through mutual fund trading platforms of BSE and/ or NSE

In respect of transaction in Units of the Scheme through BSE and/ or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by BSE and/ or NSE and their respective clearing corporations on which the Mutual Fund has no control.

Tracking Error and Tracking Difference Risk:

The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the scheme, corporate actions, cash balance, changes to the underlying index, non-availability of issuances, regulatory policies and any such reasons that may affect AMC's ability to achieve close correlation with the underlying index of the scheme. The scheme's returns may therefore deviate from those of its underlying index. "Tracking Difference" is the difference of return between the fund and its respective benchmark. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the underlying index and the NAV of the respective scheme. Tracking difference /Tracking Error may arise including but not limited to the following reasons:

- i) Expenditure incurred by the fund.
- ii) The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses. The fund may not be invested at all time as it may keep a portion of the funds in cash to meet redemptions or for corporate actions.
- iii) Securities trading may halt temporarily due to circuit filters.
- iv) Corporate actions such as debenture or warrant conversion, merger, change in constituents etc.
- v) Disinvestments to meet redemptions, recurring expenses, etc.
- vi) Execution of large buy / sell orders
- vii) Transaction cost (including taxes and insurance premium) and recurring expenses
- viii) Realisation of Unit holders' funds.

It will be the endeavour of the fund manager to keep the tracking error as low as possible. Under normal circumstances, such tracking error is not expected to exceed 2% per annum. However, in certain events like market volatility during rebalancing of the portfolio following the rebalancing of the underlying index, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any. The Fund existence for a period of less than one year, the annualized standard deviation shall be calculated based on available data.

Risk factor associated with investment in Units of Mutual Funds:

Mutual funds being vehicles of securities investments are subject to market and other risks and there can be no guarantee against loss resulting from investing in the Scheme. The various factors which impact the value of the Schemes' investments include, but are not limited to, fluctuations in the bond markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of the securities, tax laws, liquidity of the underlying instruments, settlement periods, trading volumes, suspension of 12 subscription/redemptions of the scheme, change in fundamental attribute etc. The Scheme may invest in schemes of Mutual Funds. Hence, scheme specific risk factors of each such mutual fund schemes will be applicable to the Scheme portfolio.

Type of Risks	Measures/ Strategies to control risks
Equity Markets/ Equity Oriented Instruments	<ul style="list-style-type: none"> • Market Risk and Volatility: Market risk is a risk is inherent to an equity scheme. Being a passively managed scheme, it will invest in the securities included in its Underlying Index. • Concentration / Sector Risk: Index Fund being a passive investment carries lesser risk as compared to active fund management. The portfolio follows the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking error. Thus there is no additional element of volatility or stock concentration on account of fund manager decisions. The Risk Mitigation strategy revolves around minimizing the Tracking error to the least possible through regular rebalancing of the portfolio, taking into account the change in weights of stocks in the Underlying Index as well as the incremental collections into / redemptions from the Scheme. • Liquidity Risks: As such the liquidity of stocks that the scheme invests into could be relatively low. The scheme will endeavor to maintain a proper asset-liability

	match to ensure redemption payments are made on time and not affected by illiquidity of the underlying stocks.
Debt and Money Market instruments	<p>Credit Risk: Management analysis will be used for identifying company specific risks. Management’s past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer’s financial statements will be undertaken.</p> <ul style="list-style-type: none"> • Price-Risk or Interest-Rate Risk: The Scheme may primarily invest the debt portion of the portfolio in money market instruments, units of Liquid and Overnight schemes thereby mitigating the price volatility due to interest rate changes generally associated with long-term securities. • Risk of Rating Migration: The Scheme may primarily invest the debt portion of the portfolio in short-term money market instruments, units of Liquid and Overnight schemes thereby mitigating the risk of rating migration generally associated with long-term securities • Basis Risk: The debt allocation of scheme is primarily cash management strategy and such strategy returns are expected to reflect the very short term interest rate hence investment is done in short term debt and money market instruments. • Spread Risk: The Scheme may primarily invest the debt portion of the portfolio in short-term money market instruments, units of Liquid and Overnight schemes thereby mitigating the risk of spread expansion which is generally associated with long-term securities • Reinvestment Risk: The debt allocation of scheme is primarily cash management strategy and such strategy returns are expected to reflect the very short term interest rate hence investment is done in short term debt and money market instruments. Reinvestment risks will be limited to the extent of debt instruments, which will be a very small portion of the overall portfolio value. • Liquidity Risk: The Scheme may invest in government securities, corporate bonds and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds. The Scheme may, however, endeavor to minimize liquidity risk by primarily investing the debt portion of the portfolio in relatively liquid short-term money market instruments, units of Liquid and Overnight schemes.
Derivatives	The Scheme may take an exposure to equity derivatives of constituents or index derivatives of the underlying index for short duration when securities of the index are unavailable, insufficient or for rebalancing at the time of change in index or in case of corporate actions, as permitted. All derivatives trade will be done only on the exchange with guaranteed settlement. Exposure with respect to derivatives shall be in line with regulatory limits and the limits specified in the SID.
Securities Lending	The SLB shall be operated through Clearing Corporation/Clearing House of stock exchanges having nation-wide terminals who are registered as Approved Intermediaries (AIs).” The risk is adequately covered as Securities Lending & Borrowing (SLB) is an Exchange traded product. Exchange offers an anonymous trading platform and gives the players the advantage of settlement guarantee without the worries of counter party default. However, the scheme may not be able to sell

	such lent securities during contract period or have to recall the securities which may be at higher than the premium at which the security is lent.
Segregated Portfolio	In such an eventuality it will be AMC's endeavor to realise the segregated holding in the best interest of the investor at the earliest.
Tracking errors	Over a short period, the Scheme may carry the risk of variance between portfolio composition and Benchmark. The objective of the Scheme is to closely track the performance of the Underlying Index over the same period, subject to tracking error. The Scheme would endeavor to maintain a low tracking error by actively aligning the portfolio in line with the Index.
Government securities and Triparty repo on Government securities or treasury bills:	As a member of securities segment and Triparty repo segment, maintenance of sufficient margin is a mandatory requirement. CCIL monitors these on a real time basis and requests the participants to provide sufficient margin to enable the trades etc. Also there are stringent conditions / requirements before registering any participants by CCIL in these segments. Since settlement is guaranteed the loss on this account could be minimal though there could be an opportunity loss.
Units of overnight & liquid mutual fund schemes	Liquidity is generally high in both overnight as well as liquid schemes.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated. The measures mentioned above is based on current market conditions and may change from time to time based on changes in such conditions, regulatory changes and other relevant factors. Accordingly, our investment strategy, risk mitigation measures and other information contained herein may change.in response to the same.

6. PREVENTION OF MONEY LAUNDERING AND KNOW YOUR CLIENT (KYC)

In order to reduce hardship and help investors dealing with SEBI intermediaries, SEBI Master circular for Mutual Fund dated May 19, 2023 informing SEBI registered intermediaries as mentioned therein to follow, with effect from January 01, 2012, a uniform KYC compliance procedure for all the investors dealing with them on or after that date. SEBI also issued KYC Registration Agency ("KRA") Regulations 2011 and the guidelines in pursuance of the said Regulations and for In-Person Verification ("IPV").

All investors (individual and non-individual) are required for KYC compliance. However, applications should note that minors cannot apply for KYC compliance and any investment in the Name of minors should be through a Guardian, who should be KYC compliant for the purpose of investing with a Mutual Fund. Also applicants/unit holders intending, to apply for units currently holding units and operating their Mutual Fund folios through a Power of Attorney (PoA) must ensure that the issue of PoA and the holder of the PoA must mention their KYC compliance status at the time of investment. PoA holders are not permitted to apply for KYC compliance on behalf of the issuer of the PoA. Separate procedures are prescribed for change in name, address, and other KYC related details, should the applicant desire to change such information, POS will extend the services of effecting such changes.

In line with the SEBI Master circular for Mutual Fund dated May 19, 2023 and various other guidelines issued by SEBI on the procedural matters for KYC Compliances, the Investors are requested to note the following additional provisions shall be applicable for "KYC Compliances" with effect from December 1, 2012:

- 1) In case of an existing investor of GMF and who is already KYC Compliant under the erstwhile centralized KYC with CVL (CVL/MF) then there will be no effect on subsequent Purchase/ Additional Purchase (or ongoing SIPs/STPs,etc) in the existing folios/accounts which are KYC compliant. Existing Folio holder can also open a new folio with Groww Mutual Fund with the erstwhile centralized KYC
- 2) In case of an existing investor of Groww Mutual Fund and who is not KYC Compliant as per our records, the investor will have to submit the standard KYC Application forms available in the website www.cvlkra.com along with supporting documents at any of the SEBI registered intermediaries at the time of purchase / additional purchase / new registration of SIP/STP etc. In Person Verification (IPV) will be mandatory at the time of KYC Submission. This uniform KYC submission would a onetime submission of documentation.
- 3) Investors who have complied with KYC process before December 31, 2011 (KYC status with CVL KRA as "MF - VERIFIED BY CVL/MF") and not invested in the schemes of Groww Mutual Fund i.e not opened a folio earlier, and wishes to invest on or after December 01, 2012, such investors will be required to submit 'missing/not available' KYC information and complete the IPV requirements. Updation of 'missing / not available' KYC information along with IPV is currently a one-time requirement and needs to be completed with any one of the mutual funds i.e. need not be done with all the mutual funds where investors have existing investments. Once the same is done then the KYC status at CVL KRA will change to 'Verified by CVL KRA' after due verification. In such a scenario, where the KYC status changes to 'Verified by CVL KRA', investors need not submit the 'missing/not available' KYC information to mutual funds again.

Individual Investors are required to submit 'KYC Details Change Form' issued by CVL-KRA available on their website www.cvlkra.com.

In case of Non Individual investors, complied with KYC process before December 31, 2011, KYC needs to be done afresh due to significant and major changes in KYC requirements.

Investors need to provide the complete details in the KYC application form along with the required documents (for individual investors or non-individual investors as appropriate). The said form is available on GMF's website i.e. www.growwmf.in or on the website of Association of Mutual Funds In India i.e. www.amfiindia.com or on the website of any authorised KRA's.

7. In case of NRI/ FPI investors the Account Statements / Redemption Cheques / Other correspondence will be sent to the mailing address mentioned.
8. All applications are accepted subject to detailed scrutiny and verification. Applications which are not complete in all respects are liable for rejection, either at the collection point itself or subsequently after detail scrutiny/verification at the back office of the registrars.

III. BANK DETAILS:

1. As per the SEBI guidelines, it is mandatory for investors to mention their bank account details in the application form. In the absence of the bank details the application form will be rejected.
2. Purchase Application requests should necessarily mention the pay-in bank account details i.e bank name, bank account number, bank branch used for mentioning the payments to the fund. The first unit holder has to ensure that the subscription payment has to be made through his own bank account or through any of the bank account wherein he is one of the joint bank account holder. If this is not evidenced on the payment cheque/funds transfer/RTGS/NEFT request, demand draft etc given by the investor at the time of subscription then unit holder should attach necessary supporting documents as required by the fund like bank certificate, bank passbook copy, bank statement etc to prove that the funds are from a bank account held by the first unit holder only. If the documents are not submitted with the application the fund reserves the right to reject the application or call for additional details. In specific exceptional situations where Third Party payment is permitted like i.e (i) Payment by employer on behalf of employee under Systematic Investment Plan (SIP) facility, or lump sum / one time subscription, through payroll deductions or deductions of expense reimbursements (ii) Payment by Corporate to its Agent/Distributor/Dealer (similar arrangement with principal-agent relationship), on account of commission/incentive payable for sale of its goods services, in the form of the Mutual Fund Units through Systematic Investment Plans or lump sum / one-time subscription (iii) Custodian on behalf of an FPI or a client. For the above mentioned cases KYC of the investor and the KYC of the person making the payment is mandatory irrespective of the amount. Additionally declaration by the person making the payment giving details of the bank account from which the payment is being made and the relationship with the beneficiary is also required to be submitted.

INSTRUCTIONS TO HELP YOU COMPLETE THE MAIN APPLICATION FORM

- Direct Credit of Redemption / IDCW Proceeds / Refund if any -GMF will endeavor to provide direct / electronic credit for IDCW / redemption payments into the investors bank account directly. In case the direct credit is not affected by the unitholder's banker for any reason then GMF reserves the right to make the payment to the investor by a cheque / DD. If the electronic credit is delayed or not affected or credited to a wrong account, on account of incomplete or incorrect information, GMF will not be held responsible. Please provide the MICR Code/IFSC code on the right bottom of your Cheque for us to help you in future for ECS/NEFT credit of IDCW and redemption payout. For minor investors, please ensure minor bank details are updated prior to redemption, else the redemption will be rejected.

The investor will have to initially get the non registered bank account registered in the folio and then apply for the redemption request. Also if no registered bank account is mentioned at the time of redemption then by default the redemption proceeds will be credited into the default Bank account.
