The fund will combine top down and bottom up approach to construct the portfolio.</p> <p><b>Derivatives Strategy:</b> <b>Equity Derivatives Strategy:</b> The Scheme may invest in various derivative instruments which are permissible under the applicable regulations. Derivatives will be used for the purpose of hedging, and portfolio balancing or such other purpose as may be permitted under the regulations and Guidelines from time to time. Such investments shall be subject to the investment objective and strategy of the Scheme and the internal limits if any, as laid down from time to time. These include but are not limited to futures (both stock and index) and options (stock and index). Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument such as interest rates, exchange rates, commodities and equities.</p> <p>The following section describes the concepts and examples of derivatives that may be used by the fund manager. The strategies and illustrations provided below are only for the purpose of understanding the concept and uses of derivative instruments.</p> <p><b>Index Futures</b></p> <p>Index Futures maybe used by the Fund to hedge against market downturns (shorting the index) or benefit from a bullish outlook on the market (going long on the index).</p> <p><b>Example on how it could be used:</b> Assume Nifty near month future contract is trading at Rs. 6,500, and the fund manager has a view that nifty will depreciate going forward; the Scheme can initiate a sale transaction of Nifty futures at the above said rate without holding a underlying long equity position. Once the price falls and let's assume after 15 days the Nifty falls to 6400, the Scheme can initiate a square-up transaction by buying the said futures and book a profit of Rs. 100.</p> <p>In a similar way, if the fund manager has a view that nifty will appreciate going forward, the Scheme can initiate a long transaction without an underlying cash/ cash equivalent subject to the extant regulations.</p> <p><b>Index Options</b> Index options offers the Fund the opportunity to either capitalize on an expected market move or to protect</p>

holdings in the underlying instruments. The underlying in the case of Index options are indices.

### **Buy Call**

The fund, to benefit from anticipated uptrend in broad markets, from time to time can buy call options. A long call option will give the Fund the option but not the obligation to buy the Index at the strike price. Stop loss is not defined and will be monitored by the investment team.

### **Example on how it could be used**

Suppose an investor buys a Call option on 1 lot of Nifty 50- Nifty (Lot Size: 75 units)

Nifty index (European option).

Nifty 1 Lot Size: 75 units

Spot Price (S): 7500

Strike Price (x): 7550 (Out-of-Money Call Option)

Premium: 80

Total Amount paid by the investor as premium  $[75 \times 80] = 6000$

There are two possibilities i.e. either the index moves up over the strike price or remains below the strike price.

### **Scenario 1-** The Nifty index goes up

An investor sells the Nifty Option described above before expiry:

Suppose the Nifty index moves up to 7600 in the spot market and the premium has moved to Rs 150 and there are 15 days more left for the expiry. The investor decides to reverse his position in the market by selling his 1 Nifty call option as the option now is In the Money.

His gains are as follows:

Nifty Spot: 7600

Current Premium: Rs.150

Premium paid: Rs.80

Net Gain:  $\text{Rs.150} - \text{Rs.80} = \text{Rs.70 per unit}$

Total gain on 1 lot of Nifty =  $\text{Rs.5250} (75 \times 70)$

### **Scenario 2 -** The Nifty index moves to any level below 7500

Then the investor does not gain anything but on the other hand his loss is limited to the premium paid:

Net Loss is Rs.6000 (Loss is capped to the extent of Premium Paid)

$(\text{Rs } 80 \text{ Premium paid} \times \text{Lot Size: } 75 \text{ units})$

**Simple Scenario for holding on to expiry:** The fund buys a call option at the strike price of say Rs.7500 and pays a premium of say Rs. 80, the fund would earn profits if the market price of the stock at the time of expiry of the option is more than 7580 being the total of the strike price and the premium thereon. If on the date of expiry of the option the stock price is below Rs 7500, the fund will not exercise the option while it loses the premium of Rs 80.

### **Buy Put**

The Fund may buy index put options to hedge existing portfolios. The put option will give the Fund the flexibility to sell the portfolio at the strike price if the index falls below the strike price. The Fund will have to pay a premium to the option writer to buy this put option. There is no defined stop loss as the same will be monitored by the investment team.

### **Example on how it could be used:**

Suppose an investor buys a Put option on 1 lot of Nifty 50- Nifty (Lot Size: 75 units)

Nifty index (European option).

Nifty 1 Lot Size: 75 units

Spot Price (S): 7500

Strike Price (x): 7450 (in-The Money Put Option)  
Premium: 80

Total Amount paid by the investor as premium  $[75 \times 80] = 6000$

There are two possibilities i.e. either the index moves down from the strike price or goes above the strike price.

**Scenario 1-** The Nifty index goes down

An investor sells the Nifty Option described above before expiry:

Suppose the Nifty index moves down to 7400 in the spot market and the premium has moved to Rs 150 and there are 15 days more left for the expiry. The investor decides to reverse his position in the market by selling his 1 Nifty put option as the option now is In the Money.

His gains are as follows:

Nifty Spot: 7600

Current Premium: Rs.150

Premium paid: Rs.80

Net Gain:  $\text{Rs.150} - \text{Rs.80} = \text{Rs.70}$  per unit

Total gain on 1 lot of Nifty =  $\text{Rs.5250}$  ( $75 \times 70$ )

**Scenario 2** - The Nifty index moves to any level above 7500

Then the investor does not gain anything but on the other hand his loss is limited to the premium paid:

Net Loss is Rs.6000 (Loss is capped to the extent of Premium Paid)

(Rs 80 Premium paid\*Lot Size: 75 units)

**Simple Scenario for holding on to expiry:** The fund buys a Put Option at Rs 7500 by paying a premium of say Rs 80. If the stock price goes down to Rs. 7400, the fund would protect its downside and would only have to bear the premium of Rs 80 instead of a loss of Rs 100 whereas if the stock price moves up to say Rs. 7600 the fund may let the Option expire and forego the premium thereby capturing Rs. 100 upside after bearing the premium of Rs. 80.

**Stock Futures**

**Buy Stock Futures**

The Fund can buy stock futures to realize a positive outlook on the stock or to rebalance sector positions. There will be no defined stop loss given the high volatility and the same will be monitored by the investment team.

**Stock Options**

**Buy Call**

To capitalize positive view on a stock or to rebalance sector positions, the Fund may buy call options on the stock against the payment of a premium. Buying a call option provides the Fund the option but not the obligation to buy the stock at the strike price. There will be no defined stop loss and the same shall be monitored by the investment team.

**Buy Put**

To implement a negative view on the stock or to hedge against downside in an existing stock holding or to rebalance sector positions, the Fund may purchase stock put options against payment premium. This gives the option but not the obligation to the Fund to sell the stock if stock prices falls below the strike price.

**Covered Call Strategy**

The covered call strategy is a strategy where a fund manager writes call options against an equivalent long position in an underlying stock thereby giving up a part of the upside from the long position. The strategy allows the fund manager to earn premium income from the option writing in addition being able to capture the remaining part of the upside.

Assumptions: Current price of stock A: Rs. 27.87 per share

1 contract = 100 shares

	<p>Total no of contracts: 10 Strike price: Rs. 30/- per share Premium: Rs. 0.35 per share</p> <p>Suppose, on December 6, 2022, the writer of the call owns 1,000 shares of Company A, which is currently trading at Rs. 27.87 per share. The writer of the call writes 10 call option contracts for company A with a strike price of Rs. 30 per share that expires in January 2023. The writer receives premium of 0.35 per share for the calls, which equals Rs. 35.00 per contract for a total of Rs. 350.00.</p> <p>Total premium = (Rs. 0.35 per share) * (100 shares per contract) * (10 contracts) = Rs. 350. The following can be the scenarios reflecting risks and benefits at the end of the option expiry:</p> <p>Case 1 - Stock falls below current price of Rs. 27.87 per share: The option expires worthless. Hence the loss from the stock position gets reduced to the extent of the premium income.</p> <p>Case 2 - Stock goes up above current price but remains below Rs. 30 per share (strike price): The option expires worthless. Hence the income from the gains in the stock price gets further boosted to the extent of the premium income.</p> <p>Case 3 - Stock goes above Rs. 30 per share: Option position goes out of the money for the writer but the losses from the option position are matched by the gains from the underlying stock position above Rs. 30 per share. Hence the return from the position is equal to the return from stock upto the strike price of Rs. 30 per share and the premium income from the option.</p> <p><b>Benefits of using Covered Call Strategy in Mutual Funds</b> The covered call strategy can be followed by the Fund Manager in order to hedge risk thereby resulting in better risk adjusted returns of the Scheme. The strategy offers the following benefits:</p> <ul style="list-style-type: none"><li>a) Hedge against market risk - Since the fund manager sells a call option on a stock already owned by the mutual fund scheme, the downside from fall in the stock price would be lower to the extent of the premium earned from the call option.</li><li>b) Generating additional returns in the form of option premium in a range bound market. Thus, a covered call strategy involves gains for unit holders in case the strategy plays out in the right direction</li></ul> <p><b>Risk associated with covered calls</b> The risk associated with covered calls is the loss of upside, i.e. if the shares are assigned (called away), the option seller forgoes any share price appreciation above the option strike price. Please refer risk factors section on detail derivatives risk factors.</p> <p><b>Fixed Income Derivatives Strategy</b> The Scheme may use Derivative instruments like interest rate swaps like Overnight Indexed Swaps (“OIS”), forward rate agreements, interest rate futures (as and when permitted) or such other Derivative instruments as may be permitted under the applicable regulations. Derivatives will be used as permitted under the regulations and Guidelines from time to time including but not limited to for the purpose of hedging, and portfolio balancing etc.</p> <p>The Fund will be allowed to take exposure in interest rate swaps only on a non-leveraged basis. A swap will be undertaken only if there is an underlying asset in the portfolio. In terms of paragraph 7.6 of SEBI Master Circular for Mutual Fund dated June 27, 2024 respectively issued by RBI permitting participation by Mutual Funds in interest rate swaps and forward rate agreements, the Fund will use Derivative instruments for the purpose of hedging and portfolio balancing. The Fund may also use derivatives for such purposes as maybe permitted from time to time. Further, the guidelines issued by RBI from time to time for forward rate agreements and interest rate swaps and other derivative products would be adhered to by the Mutual Fund.</p> <p>IRS and FRA do also have inherent credit and settlement risks. However, these risks are substantially reduced as they are limited to the interest streams and not the notional principal amounts.</p>
--	--

Investments in Derivatives will be in accordance with the extant Regulations / guidelines Derivatives will be used as permitted under the regulations and Guidelines from time to time including but not limited to for the purpose of hedging, and portfolio balancing etc. The circumstances under which such transactions would be entered into would be when, for example using the IRS route it is possible to generate better returns / meet the objective of the Scheme at a lower cost. e.g. if buying a 2 Yr FBIL Mibor based instrument and receiving the 2 Yr swap rate yields better return than the 2 Yr AAA corporate, the Scheme would endeavor to do that. Alternatively, the Scheme would also look to hedge existing fixed rate positions if the view on interest rates is that it would likely rise in the future.

The following information provides a basic idea as to the nature of the Derivative instruments proposed to be used by the Fund and the benefits and risks attached therewith. Please note that the examples have been given for illustration purposes only.

### **Interest Rate Swaps**

The Indian markets have faced high volatility in debt markets. An interest rate swap is a contractual agreement between two counterparties to exchange streams of interest amount on a notional principal basis. In this, one party agrees to pay a fixed stream of interest amount against receiving a variable or floating stream of interest amount. The variable or floating part is determined on a periodical basis.

Mutual Funds may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions has to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme.

### **Example**

Entity A has Rs.50 crores, 3-month asset which is being funded through call. Entity B, on the other hand, has deployed in overnight call money market Rs.50 crores, 3-month liability. Both the entities are taking on an interest rate risk.

To hedge against the interest rate risk, both the entities can enter into a 3-month swap agreement based on say FBIL MIBOR (Financial Benchmarks India Private Limited Mumbai Inter Bank Offered Rate). Through this swap, entity B will receive a fixed pre-agreed rate (say 7%) and pay FBIL MIBOR (“the benchmark rate”) which will neutralize the interest rate risk of lending in call. Similarly, entity A will neutralize its interest rate risk from call borrowing as it will pay 8% and receive interest at the benchmark rate.

Assuming the swap is for Rs.50 crores 1 January to 1 April, Entity A is a floating rate receiver at the overnight compounded rate and Entity B is a fixed rate receiver. On a daily basis, the benchmark rate fixed by NSE will be tracked by them.

On April 1, they will calculate as explained below:

Entity A is entitled to receive daily compounded call rate for 91 days and pay 7% fixed.

Entity B is entitled to receive interest on Rs.50 crores @ 7% i.e. Rs. 87.26 lacs, and pay the compounded benchmark rate.

Thus, on December 1, if the total interest on the daily overnight compounded benchmark rate is higher than Rs. 87.26 lacs, entity B will pay entity A the difference and vice versa.

The above example illustrates the use of Derivatives for hedging and optimizing the investment portfolio. Swaps have their own drawbacks like credit risk, settlement risk. However, these risks are substantially reduced as the amount involved is interest streams and not principal.

### **Forward Rate Agreement (FRA)**

A FRA is referred to by the beginning and end dates of the period covered in the transaction. A 2x5 FRA means the 3 month rate starting 2 months from now.

For example, a corporate has a three month fixed liability three months from now. To meet this liability the company enters into a 3x6 FRA where it receives 7.25% for 100 crore and fixes the interest cost for the 3-6 months period. If the actual three month rate three months from now is 7% the corporate has gained 25 bps through interest cost. As the settlement is done at the beginning of the period, the net present value of the savings needs to be calculated using the 3 month rate as the discount rate. Interest savings = INR 100 crores \* 25 bps \* 92/365 (assuming 92 days in the 3 month period and 365 days for the year) = INR 6,30,137. Settlement Amount = INR 6,30,137 / (1+ 7%\*92/365) = INR 6,19,212

### Interest Rate Futures

Assume that ABC hold GOI securities, hence is exposed to the risk of rising interest rates, which in turn results in the reduction in the value of their portfolio. So in order to protect against a fall in the value of their portfolio due to falling bond prices, they can take short position in IRF contracts.

#### Example:

Date: 01-April-2021

Spot price of GOI Security: Rs 100.05

Futures price of IRF Contract: Rs 100.12 On 01-April-2022 ABC bought 2000 GOI securities from spot market at Rs 100.05. He anticipates that the interest rate will rise in near future. Therefore to hedge the exposure in underlying market he may sell May 2022 Interest Rate Futures contracts at Rs. 100.12.

On 16-May-2022 due to increase in interest rate:

Spot price of GOI Security: Rs 99.24

Futures Price of IRF Contract: Rs 99.28

Loss in underlying market will be  $(99.24 - 100.05) * 2000 = \text{Rs } 1620$  Profit in the Futures market will be  $(99.28 - 100.12) * 2000 = \text{Rs } 1680$

Certain risks are inherent to Derivative strategies viz. lack of opportunities, inability of Derivatives to correlate perfectly with the underlying and execution risks, whereby the rate seen on the screen may not be the rate at which the transaction is executed. For details of risk factors relating to use of Derivatives, the investors are advised to refer to Scheme Specific Risk Factors.

### PORTFOLIO TURNOVER

Portfolio turnover in the scheme will be a function of market opportunities. It is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. The AMC will endeavor to optimize portfolio turnover to optimize risk adjusted return keeping in mind the cost associated with it. A high portfolio turnover rate is not necessarily a drag on portfolio performance and may be representative of investment opportunities that exist in the market.

	Generally, turnover will depend upon the extent of purchase and redemption of units and the need to rebalance the portfolio on account of change in the composition, if any, and corporate actions of securities included in Nifty Financial Services index. However, it will be the endeavor of the Fund Manager to maintain an optimal portfolio turnover rate commensurate with the investment objective of the Scheme and the purchase/ redemption transactions on an ongoing basis in the Scheme.

## 6. PREVENTION OF MONEY LAUNDERING AND KNOW YOUR CLIENT (KYC)

In order to reduce hardship and help investors dealing with SEBI intermediaries, SEBI issued three circulars - MIRSD/SE/Cir-21/2011 dated October 05, 2011, MIRSD/Cir-23/2011 dated December 02, 2011 and MIRSD/Cir-26/2011 dated December 23, 2011 informing SEBI registered intermediaries as mentioned therein to follow, with effect from January 01, 2012, a uniform KYC compliance procedure for all the investors dealing with them on or after that date. SEBI also issued KYC Registration Agency ( "KRA") Regulations 2011 and the guidelines in pursuance of the said Regulations and for In-Person Verification ("IPV").

All investors (individual and non- individual) are required for KYC compliance. However, applications should note that minors cannot apply for KYC compliance and any investment in the Name of minors should be through a Guardian, who should be KYC compliant for the purpose of investing with a Mutual Fund. Also applicants/ unit holders intending, to apply for units currently holding units and operating their Mutual Fund folios through a Power of Attorney (PoA) must ensure that the issue of PoA and the holder of the PoA must mention their KYC compliance status at the time of investment. PoA holders are not permitted to apply for KYC compliance on behalf of the issuer of the PoA, Separate procedures are prescribed for change in name, address, and other KYC related details, should the applicant desire to change such information, POS will extend the services of effecting such changes.

In line with the SEBI circular No. MIRSD/Cir-5/2012 dated April 13, 2012 and various other guidelines issued by SEBI on the procedural matters for KYC Compliances, the

Investors are requested to note the following additional provisions shall be applicable for "KYC Compliances" with effect from December 1, 2012:

- In case of an existing investor of GMF and who is already KYC Compliant under the erstwhile centralized KYC with CVL (CVLMF) then there will be no effect on subsequent Purchase/ Additional Purchase (or ongoing SIPs/STPs,etc) in the existing folios/accounts which are KYC compliant. Existing Folio holder can also open a new folio with Groww Mutual Fund with the erstwhile centralized KYC
- In case of an existing investor of Groww Mutual Fund and who is not KYC Compliant as per our records, the investor will have to submit the standard KYC Application forms available in the website [www.cvlkra.com](http://www.cvlkra.com) along with supporting documents at any of the SEBI registered intermediaries at the time of purchase/ additional purchase/ new registration of SIP/STP etc. In Person Verification (IPV) will be mandatory at the time of KYC Submission. This uniform KYC submission would a onetime submission of documentation.
- Investors who have complied with KYC process before December 31, 2011 (KYC status with CVL KRA as "MF - VERIFIED BY CVLMF") and not invested in the schemes of Groww Mutual Fund i.e not opened a folio earlier, and wishes to invest on or after December 01, 2012, such investors will be required to submit 'missing/not available' KYC information and complete the IPV requirements.

Updation of 'missing / not available' KYC information along with IPV is currently a one-time requirement and needs to be completed with any one of the mutual funds i.e. need not be done with all the mutual funds where investors have existing investments. Once the same is done then the KYC status at CVL KRA will change to 'Verified by CVL KRA' after due verification. In such a scenario, where the KYC status changes to 'Verified by CVL KRA', investors need not submit the 'missing/not available' KYC information to mutual funds again.

Individual Investors are required to submit 'KYC Details Change Form' issued by CVL-KRA available on their website [www.cvlkra.com](http://www.cvlkra.com).

In case of Non Individual investors, complied with KYC process before December 31, 2011, KYC needs to be done afresh due to significant and major changes in KYC requirements.

Investors needs to provide the complete details in the KYC application form along with the required documents (for individual investors or non-individual investors as appropriate). The said form is available on GMF's website i.e. [www.growwmf.in](http://www.growwmf.in) or on the website of Association of Mutual Funds In India i.e. [www.amfiindia.com](http://www.amfiindia.com) or on the website of any authorised KRA's.

- In case of NR/ FPI investors the Account Statements / Redemption Cheques / Other correspondence will be sent to the mailing address mentioned.
- All applications are accepted subject to detailed scrutiny and verification. Applications which are not complete in all respects are liable for rejection, either at the collection point itself or subsequently after detail scrutiny/verification at the back office of the registrars.

## III. BANK DETAILS:

- As per the SEBI guidelines, it is mandatory for investors to mention their bank account details in the application form. In the absence of the bank details the application form will be rejected.
- Purchase Application requests should necessarily mention the pay-in bank account details i.e bank name, bank account number, bank branch used for issuing the payments to the fund. If this is not evidenced on the payment cheque/funds transfer/RTGS/NEFT request, demand draft etc given by the investor at the time of subscription then unit holder should attach necessary supporting documents as required by the fund like bank certificate, bank passbook copy, bank statement etc to prove that the funds are from a bank account held by the first unit holder only. If the documents are not submitted with the application the fund reserves the right to reject the application or call for additional details. In specific exceptional situations where Third Party payment is permitted like i.e (i) Payment by employer on behalf of employee under Systematic Investment Plan (SIP) facility, or lump sum / one time subscription, through payroll deductions or deductions of expense reimbursements (ii) Payment by Corporate to its Agent/Distributor/Dealer (similar arrangement with principal-agent relationship), on account of commission/incentive payable for sale of its goods services, in the form of the Mutual Fund Units through Systematic Investment Plans or lump sum / one-time subscription (iii) Custodian on behalf of an FPI or a client. For the above mentioned cases KYC of the investor and the KYC of the person making the payment is mandatory irrespective of the amount. Additionally declaration by the person making the payment giving details of the bank account from which the payment is being made and the relationship with the beneficiary is also required to be submitted.
- Direct Credit of Redemption / IDCW Proceeds / Refund if any -GMF will endeavor to provide direct / electronic credit for IDCW / redemption payments into the investors bank account directly. In case the

## INSTRUCTIONS TO HELP YOU COMPLETE THE MAIN APPLICATION FORM

direct credit is not affected by the unitholder's banker for any reason then GMF reserves the right to make the payment to the investor by a cheque / DD. If the electronic credit is delayed or not affected or credited to a wrong account, on account of incomplete or incorrect information, GMF will not be held responsible. Please provide the MICR Code/IFSC code on the right bottom of your Cheque for us to help you in future for ECS/NEFT credit of IDCW and redemption payout.

4. GMF offers facility to register multiple bank accounts in the folio and designate one of the bank account as "Default Bank account". Default bank account will be used for all IDCW and redemption payouts unless investor specifies one of the existing registered bank account in the redemption request for receiving redemption proceeds. A new non - registered bank account specified in the redemption request for receiving redemption proceeds will not be considered and the redemption proceeds will by default be credited into the default Bank account. The investor will have to initially get the non registered bank account registered in the folio and then apply for the redemption request. Also if no registered bank account is mentioned at the time of redemption then by default the redemption proceeds will be credited into the default Bank account.
