The securities lent will be returned by the Borrower on expiry of the stipulated</p>	

period.

The Investment Manager will apply the following limits, should it desire to engage in Securities lending:

Not more than 20% of the net assets of the Scheme can generally be deployed in securities lending; and Not more than 5% of the net assets of the Scheme can generally be deployed in securities lending to any single counter party.

The Scheme may invest in repo/ reverse repo in corporate debt securities/Government Debt Securities up to 10% of the net assets of the Scheme.

Pending deployment of the funds as per the investment objective of the Scheme, the funds of the Scheme may be parked in short term deposits of the scheduled commercial banks, subject to the guidelines and limits specified by SEBI from time to time.

Subject to limits prescribed by SEBI, the maturity profile of the Scheme can undergo a change in case the market conditions warrant and at the discretion of the fund manager.

The Scheme may review the above pattern of investments based on views on interest rates and asset liability management needs. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme. Subject to the Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations, legislative amendments and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions can vary substantially depending upon the perception of the fund manager; the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be for short term and for defensive considerations only. The rebalancing of the portfolio in accordance with the asset allocation pattern indicated above shall be done within a period of 15 days.

The cumulative gross exposure through equity, debt, derivative positions (including fixed income derivatives), repo transactions in corporate debt securities, other permitted securities/assets and such other securities/assets as may be permitted by the Board from time to time shall not exceed 100% of the net assets of the scheme.

Changes in Asset Allocation Pattern

Subject to the SEBI Regulations, the asset allocation pattern indicated above may change for short term defensive considerations from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. These proportions can vary depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unitholders. The portfolio would be reviewed periodically to address any deviations from the aforementioned allocations interalia due to market changes. The AMC may from time to time, for a short term, alter the asset composition on defensive consideration and may also invest the funds available in repos in accordance with the provisions of SEBI (Mutual Funds) Regulations, 1996 and the circulars issued by SEBI from time to time. The rebalancing of the portfolio in accordance with the asset allocation pattern indicated above shall be done within a period of 7 business days. In

	<p>cases where the rebalancing is not carried out within 7 business days, the reasons for not carrying out the rebalancing within the aforesaid period will be placed before the Trustees and Investment Committee for its consideration.</p>
<p>Investment Strategy</p>	<p>The Fund shall be managed according to the Investment strategy. The Objective is to generate returns commensurate with the low risk of the portfolio. This scheme is positioned to meet the needs of those investors who want to deploy their funds for a short period of time with the least amount of risk. The returns would match the levels of risk taken in the portfolio.</p> <p>The composition of the Indian Debt market (both the primary and secondary) is dominated by money market instruments in the short end of the yield curve and by medium and long term bonds and debentures in the long end of the curve. Since the objective of the scheme is to generate reasonable returns with the least commensurate risk, the scheme would predominantly invest in money market instruments. As the turnover of the portfolio would be high, given the fact the investors in a liquid fund would deploy their funds for a short period of time, the portfolio would be structured to incorporate high liquidity by the use of cash and cash equivalents.</p> <p>The yield curve in the short end (overnight to 3 months) of the curve tends to remain flat with the least amount of volatility. In such a scenario, the fund manager would make attempts to invest the scheme proceeds uniformly across all the maturity buckets. The investment team would carry out a rigorous in depth credit evaluation of the money market and debt instruments the scheme proposes to invest in. The credit evaluation will essentially be a bottom up approach and include a study of the operating environment of the issuer, the past track record as well as the future prospects of the issuer and the short term / long term financial health of the issuer.</p> <p>Derivatives Strategy:</p> <p>The Scheme may use Derivative instruments like interest rate swaps like Overnight Indexed Swaps (“OIS”), forward rate agreements, interest rate futures (as and when permitted) or such other Derivative instruments as may be permitted under the applicable regulations. Investments in Derivatives shall strictly be in compliance with the SEBI Circular No. Cir/IMD/DF/11/2010 dated August 18, 2010. Derivatives will be used for the purpose of hedging, and portfolio balancing or such other purpose as may be permitted under the regulations and Guidelines from time to time.</p> <p>The Fund will be allowed to take exposure in interest rate swaps only on a non-leveraged basis. A swap will be undertaken only if there is an underlying asset in the portfolio. In terms of Circular No. MFD.BC.191/07.01.279/1999-2000 andMPD.BC.187/07.01.279/1999-2000 dated November 1, 1999 and July 7, 1999 respectively issued by RBI permitting participation by Mutual Funds in interest rate swaps and forward rate agreements, the Fund will use Derivative instruments for the purpose of hedging and portfolio balancing. In case of Interest Rate Swaps, the exposure to a single counter-party shall not exceed 10% of the net assets of the scheme.</p> <p>The Fund may also use derivatives for such purposes as may be permitted from time to time. Further, the guidelines issued by RBI from time to time for forward rate agreements and interest rate swaps and other derivative products would be adhered to by the Mutual Fund.</p> <p>IRS and FRA do also have inherent credit and settlement risks. However, these risks are substantially reduced as they are limited to the interest streams and not the notional principal amounts.</p>

Investments in Derivatives will be in accordance with the extant Regulations / guidelines. Presently the Derivatives shall be used for hedging and / or portfolio balancing purposes, as permitted under the Regulations. The circumstances under which such transactions would be entered into would be when, for example using the IRS route it is possible to generate better returns / meet the objective of the Scheme at a lower cost. e.g., if buying a 2 Yr Mibor based instrument and receiving the 2 Yr swap rate yields better return than the 2 Yr AAA corporate, the Scheme would endeavor to do that. Alternatively, the Scheme would also look to hedge existing fixed rate positions if the view on interest rates is that it would likely rise in the future.

The following information provides a basic idea as to the nature of the Derivative instruments proposed to be used by the Fund and the benefits and risks attached therewith. Please note that the examples have been given for illustration purposes only.

Using Overnight Indexed Swaps

In a rising interest rate scenario, the Scheme may enhance returns for the Investor by hedging the risk on its fixed interest paying assets by entering into an OIS contract where the Scheme agrees to pay a fixed interest rate on a specified notional amount, for a predetermined tenor and receives floating interest rate payments on the same notional amount. The fixed returns from the Scheme assets and the fixed interest payments to be made by the Scheme on account of the OIS transaction offset each other and the Scheme benefits on the floating interest payments that it receives. The Scheme may enter into an opposite position in case of a falling interest rate scenario, i.e. to hedge the floating rate assets in its portfolio the Scheme enters into an OIS transaction wherein it receives a fixed interest rate on a specified notional amount for a specified time period and pays a floating interest rate on the same notional amount. The floating interest payments that the Scheme receives on its floating rate securities and the floating interest payments that the Scheme has to pay on account of the OIS transaction offset each other and the Scheme benefits on the fixed interest payments that it receives in such a scenario.

Swap

Assume that the Scheme has a Rs. 20 crore floating rate investment linked to MIBOR (Mumbai Inter Bank Offered Rate). Hence, the Scheme is currently running an interest rate risk and stands to lose if the interest rate moves down. To hedge this interest rate risk, the Scheme can enter into a 6 month MIBOR swap. Through this swap, the Scheme will receive a fixed predetermined rate (assume 10%) and pays the “benchmark rate” (MIBOR), which is fixed by the NSE (“National Stock Exchange of India Limited”) or any other agency such as Reuters. This swap would effectively lock-in the rate of 10% for the next 6 months, eliminating the daily interest rate risk. This transaction is usually routed through an intermediary who runs a book and matches deals between various counterparties. The steps will be as follows:

Assuming the swap is for Rs. 20 Crores for November 1, 2013 to May 1, 2014. The Scheme is a fixed rate receiver at 10% and the counterparty is a floating rate receiver at the overnight rate on a compounded basis (say NSE MIBOR).

On November 1, 2013 the Scheme and the counterparty will exchange only a contract of having entered this swap. This documentation would be as per International Swap Dealers Association (“ISDA”) norms.

On a daily basis, the benchmark rate fixed by NSE will be tracked by them.

On May 1, 2014 they will calculate the following:

The Scheme is entitled to receive interest on Rs. 20 Crores at 10% for 181 days i.e. Rs.99.18 lakhs, (this amount is known at the time the swap was concluded) and will pay the compounded benchmark rate.

The counterparty is entitled to receive daily compounded call rate for 181 days & pay 10% fixed.

On May 1, 2014, if the total interest on the daily overnight compounded benchmark rate is higher than Rs. 99.18 lakhs, the Scheme will pay the difference to the counterparty. If the daily compounded benchmark rate is lower, then the counterparty will pay the Scheme the difference.

Effectively the Scheme earns interest at the rate of 10% p.a. for six months without lending money for 6 months fixed, while the counterparty pays interest @ 10% p.a. for 6 months on Rs. 20 Crores, without borrowing for 6 months fixed.

The above example illustrates the use of Derivatives for hedging and optimizing the investment portfolio. Swaps have their own drawbacks like credit risk, settlement risk. However, these risks are substantially reduced as the amount involved is interest streams and not principal.

Forward Rate Agreement

Assume that April 01, 2014, the 30 day commercial paper (CP) rate is 8% and the Scheme has an investment in a CP of face value Rs. 50 Crores, which is going to mature on May 01, 2013. If the interest rates are likely to remain stable or decline after May 01, 2014, and if the fund manager, who wants to re-deploy the maturity proceeds for 1 more month does not want to take the risk of interest rates going down, he can then enter into a following Forward Rate Agreement (FRA) say as on April 01, 2014:

He can receive 1 X 2 FRA on April 01, 2014 at 8.00 % (FRA rate for 1 months lending in 1 months time) on the notional amount of Rs. 50 Crores, with a reference rate of 30 day CP benchmark. If the CP benchmark on the settlement dates i.e. May 01, 2013 falls to 7.00%, then the Scheme receives the difference 8.00 – 7.00 i.e. 100 basis points on the notional amount Rs. 50 Crores.

Interest Rate Futures

Assume that the Fund holds an Indian ten year benchmark and the fund manager has a view that the yields will go up in the near future leading to decrease in value of the investment and subsequent decrease in Net Asset Value (NAV) of the fund. The fund house decides to use Interest Rate Futures to mitigate the risk of decline of Net Asset Value (NAV) of the fund.

12th April 2014

The benchmark ten year paper 7.80 2023, is trading at INR 100.00 at a yield of 7.80%. June 2014 futures contract on the ten year notional 7.80% coupon bearing Government paper is trading at a yield of 8.00% at a price of INR 98.75. The mutual fund decides to hedge the exposure by taking a short position in June 2014 interest rate futures contract.

24th June 2014

The yield of the benchmark ten year paper has increased to 8.10% and the price has decreased to 98.15

The June 2014 futures contract is trading at a price of INR 97.25 indicating a yield of 8.25%.

The mutual fund unwinds the short position by buying the June 2014 futures contract. The transaction results in profit from the futures position, against the corresponding loss from the Government of India security position.

Certain risks are inherent to Derivative strategies viz. lack of opportunities, inability of Derivatives to correlate perfectly with the underlying and execution

	<p>risks, whereby the rate seen on the screen may not be the rate at which the transaction is executed. For details of risk factors relating to the use of Derivatives, the investors are advised to refer to Scheme Specific Risk Factors.</p> <p>Portfolio Turnover: The Scheme being an open-ended Scheme, it is expected that there would be a number of Subscriptions and Redemptions on a daily basis. Further, in the debt market, trading opportunities may arise due to changes in system liquidity, interest rate policy announced by RBI, shifts in the yield curve, credit rating changes or any other factors. In the opinion of the fund manager these opportunities can be played out to enhance the total return of the portfolio, which will result in increase in portfolio turnover. There may be an increase in transaction cost such as brokerage paid, if trading is done frequently. However, the cost would be negligible as compared to the total expenses of the Scheme. Frequent trading may increase the profits which will offset the increase in costs. The fund manager will endeavor to optimize portfolio turnover to maximize gains and minimize risks keeping in mind the cost associated with it. However, it is difficult to estimate with reasonable measure accuracy, the likely turnover in the portfolio of the Scheme. The Scheme has no specific target relating to portfolio turnover.</p> <p>Investment Decision making process: The Fund Managers shall take a view on the broad direction of the markets including interest rate outlook. Fund Managers shall have the responsibility of individual security analysis, while the dealers shall execute the trading mandates with a view to obtaining the best execution in terms of price and quantity. The Fund Managers, while buying / selling securities for a particular scheme shall take into account the following main factors:</p> <ol style="list-style-type: none"> 1. Interest Rate Outlook 2. Recurring expenses

These are the fees and expenses for operating the scheme. These expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, marketing and selling costs etc. as given in the table below:

The AMC has estimated that upto 2.00 % of the daily average net assets of the scheme will be charged to the scheme as expenses (Give slab wise break up depending on the assets under management. Give plan/option wise break up if the expense structures are different). For the actual current expenses being charged, the investor should refer to the website of the mutual fund.

Expense Head	% p.a. of daily Net Assets* (Estimated p.a.)	
Investment Management & Advisory Fee	Upto 2.00%	
Audit fees/fees and expenses of trustees		
Custodial Fees		
Registrar & Transfer Agent Fees including cost of providing account statements / IDCW / redemption cheques/ warrants		
Marketing & Selling Expenses including Agents Commission and statutory advertisement		
Costs related to investor communications		
Costs of fund transfer from location to location		
Cost towards investor education & awareness		
Brokerage & transaction cost pertaining to distribution of units		
Goods & Services Tax on expenses other than investment and advisory fees		
Goods & Services Tax on brokerage and transaction cost		
Other Expenses (shall be as per Reg 52 of SEBI MF Regulations)		
Maximum Total expenses ratio (TER) permissible under Regulation 52 (6) (c)		Upto 2.00%
Additional expenses under Regulations 52(6A)(c)	Upto 0.05%	
Additional expenses for gross new inflows from specified cities	Upto 0.30%	

	<p>*Any other expenses which are directly attributable to the Scheme, may be charged with approval of the Trustee within the overall limits as specified in the Regulations except those expenses which are specifically prohibited.</p> <p>**SEBI vide its letter no. SEBI/HO/IMD-SEC-3/P/OW/2023/5823/1 dated February 24, 2023, and AMFI letter dated No. 35P/ MEM-COR/ 85-a/ 2022-23 dated March 02, 2023 has directed AMC's to keep B-30 incentive structure in abeyance till further notice.</p> <p>^ As per the Regulations, the total recurring expenses that can be charged to the Scheme in this Scheme information document shall be subject to the applicable guidelines. The total recurring expenses of the Scheme, will however be limited to the ceilings as prescribed under Regulation 52(6) of the Regulations.</p> <p><u>*Impact of TER on returns of both Direct plan and Regular plan through an illustration may be provided.</u></p> <p>For any scheme, NAV is computed on a daily basis factoring in all the assets as well as liabilities of the scheme (including expenses charged). Expenses charged to the scheme bring down its NAV and hence the investor's net returns on a corresponding basis.</p> <p>Illustration: If the scheme's gross of expenses NAV goes up by 15% over 1 year (for example from 10 to 11.5), and the expense charged for the scheme over that year is 2% of the initial NAV (0.2), the NAV of scheme (net of expenses) at the end of 1 year will come down to 11.3 (11.5 less 0.2) and therefore the net of expenses return for the investor will be 13%.</p> <p>Any other information/disclosure to be added as per applicable Consolidated checklist of standard observations.</p>		
Tax treatment for the Investors (Unitholders)	Investor will be advised to refer to the details in the Statement of Additional Information and also independently refer to his tax advisor.

6. PREVENTION OF MONEY LAUNDERING AND KNOW YOUR CLIENT (KYC)

In order to reduce hardship and help investors dealing with SEBI intermediaries, refer SEBI Master circular for Mutual Fund dated May 19, 2023 informing SEBI registered intermediaries as mentioned therein to follow, with effect from January 01, 2012, a uniform KYC compliance procedure for all the investors dealing with them on or after that date. SEBI also issued KYC Registration Agency ("KRA") Regulations 2011 and the guidelines in pursuance of the said Regulations and for In-Person Verification ("IPV").

All investors (individual and non-individual) are required for KYC compliance. However, applications should note that minors cannot apply for KYC compliance and any investment in the Name of minors should be through a Guardian, who should be KYC compliant for the purpose of investing with a Mutual Fund. Also applicants/unit holders intending, to apply for units currently holding units and operating their Mutual Fund folios through a Power of Attorney (PoA) must ensure that the issue of PoA and the holder of the PoA must mention their KYC compliance status at the time of investment. PoA holders are not permitted to apply for KYC compliance on behalf of the issuer of the PoA. Separate procedures are prescribed for change in name, address, and other KYC related details, should the applicant desire to change such information, POS will extend the services of effecting such changes.

In line with the refer SEBI Master circular for Mutual Fund dated May 19, 2023 and various other guidelines issued by SEBI on the procedural matters for KYC Compliances, the Investors are requested to note the following additional provisions shall be applicable for "KYC Compliances" with effect from December 1, 2012:

1) In case of an existing investor of GMF and who is already KYC Compliant under the erstwhile centralized KYC with CVL (CVLMF) then there will be no effect on subsequent Purchase/ Additional Purchase (or ongoing SIPs/STPs,etc) in the existing folios/accounts which are KYC compliant. Existing Folio holder can also open a new folio with Groww Mutual Fund with the erstwhile centralized KYC

2) In case of an existing investor of Groww Mutual Fund and who is not KYC Compliant as per our records, the investor will have to submit the standard KYC Application forms available in the website www.cvlkra.com along with supporting documents at any of the SEBI registered intermediaries at the time of purchase / additional purchase / new registration of SIP/STP etc. In Person Verification (IPV) will be mandatory at the time of KYC Submission. This uniform KYC submission would a onetime submission of documentation.

3) Investors who have complied with KYC process before December 31, 2011 (KYC status with CVL KRA as "MF - VERIFIED BY CVLMF") and not invested in the schemes of Groww Mutual Fund i.e not opened a folio earlier, and wishes to invest on or after December 01, 2012, such investors will be required to submit 'missing/not available' KYC information and complete the IPV requirements.

Update of 'missing / not available' KYC information along with IPV is currently a one-time requirement and needs to be completed with any one of the mutual funds i.e. need not be done with all the mutual funds where investors have existing investments. Once the same is done then the KYC status at CVL KRA will change to 'Verified by CVL KRA' after due verification. In such a scenario, where the KYC status changes to 'Verified by CVL KRA', investors need not submit the 'missing/not available' KYC information to mutual funds again.

Individual Investors are required to submit 'KYC Details Change Form' issued by CVL-KRA available on their website www.cvlkra.com.

In case of Non Individual investors, complied with KYC process before December 31, 2011, KYC needs to be done afresh due to significant and major changes in KYC requirements.

Investors need to provide the complete details in the KYC application form along with the required documents (for individual investors or non-individual investors as appropriate). The said form is available on GMF's website i.e. www.growwmf.in or on the website of Association of Mutual Funds In India i.e. www.amfiindia.com or on the website of any authorised KRA's.

- In case of NRI/ FPI investors the Account Statements / Redemption Cheques / Other correspondence will be sent to the mailing address mentioned.
- All applications are accepted subject to detailed scrutiny and verification. Applications which are not complete in all respects are liable for rejection, either at the collection point itself or subsequently after detail scrutiny/verification at the back office of the registrars.
