XXV	Weblink	<p>An investor can visit https://www.growwmf.in/downloads wherein TER for last 6 months as well as scheme factsheet shall be made available.</p>
XXV	Requirement minimum investors in the scheme	<p>The Scheme/Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of 3 months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme/ Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme/ Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter any investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.</p>

*The Scheme may invest upto a maximum of 50% of its net assets in derivatives

For the purposes of this scheme Blue Chip Large Cap Company is the 1st -100th company in terms of full market capitalizations in accordance with paragraph 2.7 of SEBI Master Circular for Mutual Funds dated May 19, 2023

The Scheme may use derivatives for such purposes as may be permitted by the Regulations, including for the purpose of hedging and portfolio balancing, based on the opportunities available and subject to guidelines issued by SEBI from time to time. The Scheme may also use fixed income derivative instruments subject to the guidelines as maybe issued by SEBI and RBI and for such purposes as maybe permitted from time to time. Investments in Derivatives shall strictly be in compliance with paragraph 12.25 of SEBI Master Circular for Mutual Funds dated.

Total of investments in Equity, debt securities, money market instruments and gross notional exposure in derivatives shall not exceed 100% of the net assets of the scheme.

The scheme shall not be investing in foreign equity and equity related securities.

The scheme shall not be investing in Securitized Debt Instruments.

If permitted by SEBI under Regulations/ guidelines, the Scheme may also engage in securities lending. The AMC shall comply with all reporting requirements and the Trustee shall carry out periodic review as required by SEBI guidelines. Securities lending means the lending of stock to another person or

entity for a fixed period of time, at a negotiated compensation. The securities lent will be returned by the Borrower on expiry of the stipulated period.

The Investment Manager will apply the following limits, should it desire to engage in Securities lending:

Not more than 20% of the net assets of the Scheme can generally be deployed in securities lending; and
 Not more than 5% of the net assets of the Scheme can generally be deployed in securities lending to any single counter party.

Changes in Asset Allocation Pattern

Subject to the SEBI Regulations, the asset allocation pattern indicated above may change for short term defensive considerations from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions can vary depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unitholders. The portfolio would be reviewed periodically to address any deviations from the aforementioned allocations inter alia due to market changes. The AMC may from time to time, for a short term, alter the asset composition on defensive consideration and may also invest the funds available in repos, bank deposits in accordance with the provisions of SEBI (Mutual Funds) Regulations, 1996 and the circulars issued by SEBI from time to time. The rebalancing of the portfolio in accordance with the asset allocation pattern indicated above shall be done within a period of 30 days.

B. WHERE WILL THE SCHEME INVEST?

- i Subject to the Regulations, the corpus of the Scheme can be invested in any (but not exclusively) of the following securities:
- ii Equity and equity related securities including convertible bonds and debentures and warrants carrying the right to obtain equity shares.
- iii Securities created and issued by the Central and State Governments and/or repos/reverse repos in such Government Securities as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills)
- iv Securities guaranteed by the Central and State Governments (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills)
- v Debt securities issued by domestic Government agencies and statutory bodies, which may or may not carry a Central/State Government guarantee
- vi Corporate debt securities (of both public and private sector undertakings)
- vii Quasi-government bonds

1. Securities issued by banks (both public and private sector) as permitted by SEBI from time to time and development financial institutions
2. Money market instruments permitted by SEBI/RBI, having maturities of up to one year or in any alternative investment as may be provided by the RBI to meet the liquidity requirements.
3. Certificate of Deposits (CDs)
4. Commercial Paper (CPs)
5. The non-convertible part of convertible securities
6. Any other domestic fixed income securities
7. Derivative instruments like Interest Rate Swaps, Forward Rate Agreements, Stock Futures, Index Futures, Stock options & Index options and such other derivative instruments permitted by SEBI.
8. ADRs / GDRs as permitted by Reserve Bank of India and Securities and Exchange Board of India Subject to the Regulations, the securities mentioned above could be listed, unlisted, privately placed, secured, unsecured, rated or unrated and of varying maturity. The securities may be acquired through New Fund Offerings (NFOs), secondary market operations, private placement, rights offers (including renunciation) or negotiated deals. The Scheme may also enter into repurchase and reverse repurchase obligations in all securities held by it as per the guidelines and regulations applicable to such transactions.

i Debt derivative instruments:

Interest Rate Swap - An Interest Rate Swap (IRS) is a financial contract between two parties exchanging or swapping a stream of interest payments for a notional principal amount on multiple occasions during a specified period. Typically, one party receives a predetermined fixed rate of interest while the other party, receives a floating rate, which is linked to a mutually agreed benchmark with provision for mutually agreed periodic resets. Such contracts generally involve exchange of a —fixed to floating or —floating to fixed rate of interest. Accordingly, on each payment date that occurs during the swap period, cash payments based on fixed/ floating and floating rates are made by the parties to one another.

Forward Rate Agreement - A Forward Rate Agreement (FRA) is a financial contract between two parties to exchange interest payments for a notional principal amount on settlement date, for a specified period from start date to maturity date. Accordingly, on the settlement date, cash payments based on contract (fixed) and the settlement rate, are made by the parties to one another. The settlement rate is the agreed benchmark/ reference rate prevailing on the settlement date.

Interest Rate Futures - A futures contract is a standardized, legally binding agreement to buy or sell a commodity or a financial instrument in a designated future month at a market determined price (the futures price) by the buyer and seller. The contracts are traded on a futures exchange. An Interest Rate Future is a futures contract with an interest bearing instrument as the underlying asset.

Characteristics of Interest Rate Futures

1. Obligation to buy or sell a bond at a future date
2. Standardized contract.
3. Exchange traded
4. Physical settlement
5. Daily mark to market

i Investments in units of mutual fund schemes

The Scheme may invest in other schemes managed by the AMC or in the schemes of any other mutual funds in conformity with the investment objective of the Scheme and in terms of the prevailing SEBI (MF) Regulations.

i Investment in Short Term Deposits

Pending deployment of funds as per the investment objective of the Scheme, the funds may be parked in short term deposits of Scheduled Commercial Banks, subject to guidelines and limits specified by SEBI.

The aforementioned securities may be acquired through Initial Public Offering (IPOs), secondary market, private placement, rights offers, negotiated deals. Further investments in debentures, bonds and other fixed income securities will be in instruments which have been assigned investment grade rating by the Credit Rating Agency.

Investment in unrated debt instruments shall be subject to complying with the provisions of the Regulations and within the limit as specified in Schedule VII to the Regulations.

The securities / instruments mentioned above and such other securities the Scheme is permitted to invest in could be listed, unlisted, privately placed, secured, unsecured, rated or unrated and of any maturity subject to investment limits specified elsewhere in this document.

The Fund Manager reserves the right to invest in such securities as may be permitted from time to time and which are in line with the investment objectives of the Scheme.

i Investment in Equity Derivatives

As part of the Fund Management process, the Trustee may permit the use of derivative instruments such as index futures, stock futures and options contracts, warrants, convertible securities, swap agreements, Forward Rate Agreement (FRA) or any other derivative instruments that are permissible or may be permissible in future under applicable regulations and such investments shall be in accordance with the investment objectives of the scheme.

Futures:

Futures are exchange-traded contracts to sell or buy financial instruments for future delivery at an agreed price. There is an agreement to buy or sell a specified quantity of financial instrument on a designated future date at a price agreed upon by the buyer and seller at the time of entering into a contract. To make trading possible, the exchange specifies certain standardized features of the contract. A futures contract involves an obligation on both the parties to fulfill the terms of the contract.

SEBI has permitted futures contracts on indices and individual stocks with maturity of 1 month, 2 months and 3 months on a rolling basis. The futures contracts are settled on last Thursday (or immediately preceding trading day if Thursday is a trading holiday) of each month. The final settlement price is the closing price of the underlying stock(s)/index.

Options:

Option is a contract which provides the buyer of the option (also called holder) the right, without the obligation, to buy or sell a specified asset at the agreed price on or upto a particular date. For acquiring this privilege, the buyer pays premium (fee) to the seller. The seller on the other hand has the obligation to buy or sell specified asset at the agreed price and for this obligation he receives premium. The premium is determined considering number of factors such as the market price of the underlying asset/security, number of days to expiry, risk free rate of return, strike price of the option and the volatility of the underlying asset. Option contracts are of two types viz:

Call Option - The option that gives the buyer the right but not the obligation to buy specified quantity of the underlying asset at the strike price is a call option. The buyer of the call option (known as the holder of call option) can call upon the seller of the option (writer of the option) and buy from him the underlying asset at the agreed price at any time on or before the expiry of the option.

The seller (writer of the option) on the other hand has the obligation to sell the underlying asset if the buyer of the call option decides to exercise his option to buy.

i Short Selling Of Securities

If permitted by SEBI Regulations, the Scheme may engage in short selling of securities in accordance with the guidelines issued by SEBI. Short sale of securities means selling of securities without owning them. The AMC will comply with the guidelines issued by SEBI in this behalf, including reporting obligations and the Trustee will carry out the reviews required under said guidelines.

Engaging in short sale of securities is subject to risks related to fluctuations in market price, and settlement/ liquidity risks

C. WHAT ARE THE INVESTMENT STRATEGIES?

Under normal market conditions, the Scheme would invest predominantly in a diversified portfolio constituting equity and equity related instruments of companies that the Fund Manager believes have sustainable business models, and potential for capital appreciation.

The corpus of the Scheme will be invested predominantly in blue chip – large cap stocks and/ or in exchange traded derivatives on the S&P CNX Nifty Index or such blue chip stocks. 0-20% of the net assets will be invested in securities other than blue chip large caps. A very small portion of the fund will be kept liquid. The Scheme may also use various derivatives and hedging products from time to time, as would be available and permitted by SEBI, in an attempt to protect the value of the portfolio and enhance Unitholders' interest. Large Cap companies shall consist of investment universe which are within 1st-100th company in terms of full market capitalization. The fund shall adopt the list of stocks prepared by AMFI based on SEBI defined parameters. AMFI is mandated to update such list once in 6 months. The fund shall rebalance the portfolio (if required) in line with updated list, within a period of one month.

The investment environment, valuation parameters and other investment criteria will determine the allocation and the investment style. The Fund Manager would follow a top down approach to shortlist stocks for portfolio construction. Under the top down process the Fund Manager would look at the global and Indian economy and the domestic policy environment and stock valuations. This would result in identification of themes which have a potential to outperform. The final stock selection process would be a bottoms-up process wherein stocks from the short listed themes would be picked up based on valuations.

Under normal market conditions and depending on the Fund Manager's views, the assets of the Scheme would be invested across stocks that represent a broad range of sectors of the economy in order to ensure adequate portfolio diversification.

Corporate Action / Event Driven Strategies

a. IDCW Arbitrage

At the time of declaration of IDCW, the stock futures / options market can provide a profitable opportunity. Generally, the stock prices decline by the IDCW amount when the stock becomes ex-IDCW.

b. Buy-Back / Open Offer Arbitrage

When the Company announces the buy-back or open offer of its own shares, there could be opportunities due to price differential in buyback price and traded price.

c. Merger

When the Company announces any merger, amalgamation, hive off, de-merger, etc, there could be opportunities due to price differential in the cash and the derivative market.

Derivative Strategies

A derivative is a financial instrument whose value depends on other, more basic, underlying variables like stock or commodity, any kind of economical index. A derivative is essentially a contract whose payoff depends on the behavior of some benchmark. The derivatives shall be marked-to-market by the Investment Manager at all times. Transactions in derivatives include a wide range of instruments, including, but not limited to futures, options, swaps, and interest rate swaps, forward rate agreements and any other instrument as may be permitted by SEBI/RBI from time to time.

Derivatives may be used for hedging and portfolio balancing purposes or such other purpose as may be permitted by SEBI/RBI from time to time, to seek to optimise performance in the Scheme and will be subject to applicable Regulations of SEBI/RBI from time to time. Trading is permitted only in exchange-traded derivatives. Derivative markets in India are now fairly liquid with daily average volumes to the tune of Rs. 90000 – 100000 crore as compared to cash market volumes of Rs. 10000-15000 crore

Futures

Futures are contracts to buy or sell an asset on or before a future date at a price specified today. Futures can be cash settled or delivery settled. Currently, the transaction is netted at the end of the contract and the difference settled between the investor & the clearing house. Payoffs in futures are linear with reference to the underlying and the risk is basically directional. Buyers and sellers of futures carry equal risk.

In India, three futures of 1 month, 2 months, and 3 months are presently traded on BSE & NSE. These futures expire on the last working Thursday of the respective months. The futures are cash settled and there is no delivery of the underlying stock. The Profitability of the Index / Stock Future as compared to underlying individual securities / security will inter-alia depend on

- Carrying Cost
- Interest accrued on surplus funds
- Transaction Costs
- Cost associated with rolling over of the futures trade, if applicable
- Liquidity in the markets etc

Index Futures

Stock index futures are instruments designed to give exposure to the equity markets indices. The Stock Exchange, Mumbai (BSE) and The National Stock Exchange (NSE) have trading in index futures of 1, 2 and 3 month maturities. The pricing of an index future is the function of the underlying index, short term interest rates and market expectations. Index futures are cash settled, there is no delivery of the underlying stocks.

If a Scheme buys 100 futures contracts, each contract value is 50 times the futures index price. On purchase date, Spot index: 5400, Future price: 5425. If the exchange imposes a margin of 10%, the Investment Manager will be required to provide Rs.2,712,500 (i.e. $10\% * 5425 * 100 * 50$) by way of eligible securities and/or cash. The balance 90% can be parked in cash equivalents. If on the date of expiry - the S&P CNX Nifty Index closes at 5525, the net impact will be a profit of Rs. 500,000 for the Scheme ($(5525-5425) * 100 * 50$) plus the interest earned on the 90% deployed in cash equivalents. The profit or loss for the Scheme will be the difference between the closing price (which can be higher or lower than the purchase price) and the purchase price.

Strategies that employ index futures and their objectives:

(a) The fund has an existing equity portion invested in a basket of stocks. In case the fund manager has a view that the equity markets are headed downwards, the fund can then hedge the exposure to equity either fully or partially by initiating short positions in the Index futures.

(b) A similar position in the long direction can also be initiated by the fund to hedge its position of cash and permissible equivalents. Considering that Derivative market is more liquid than Cash market, fund manager can also use it to take exposure to equities and then build the cash market positions over time.

The extent to which this can be done is determined by guidelines issued by SEBI from time to time.

Risk associated with this strategy:

1. Lack of opportunities available in the market
2. Inability of the derivatives to correlate perfectly with underlying indices
3. Execution risk, whereby the rates seen on the screen may not be the rates at which the ultimate execution takes place.

Stock Futures

A futures contract on a stock gives its owner the right and obligation to buy or sell stocks. Single stock futures traded on the BSE & NSE are cash settled, there is no delivery of the underlying stocks on the expiration date. A purchase or sale of futures on a security gives the trader essentially the same price exposure as a purchase or sale of the security itself.

The Scheme buys shares of XYZ Ltd. Its current price is Rs. 1000. The Scheme sells one month futures on the shares of XYZ Ltd at Rs 1050. If the price of the stock declines, the Mutual Fund will suffer losses on the stock position held and profit on futures position. The price of stock on the expiry date is Rs 950. The price of the futures on the stock declines to Rs 950. There is a loss of Rs. 50 per share on

the on the holding of the stock. This is offset by profit of Rs 100 on the short position in stock futures. Basically, Fund locks in a profit of Rs. 50, if both the positions are held till expiry.

Strategies that employ Stock specific futures and their objectives:

Individual stock futures are also available in the Indian Equity Markets. Stock futures trade either at a premium or at discount to the spot prices; the level of premium generally reflects the cost of carry. Stock specific issues may have a bearing on futures as speculators may find futures as a cost-effective way of executing their view on the stock. However such executions usually increase the premium/discount to the spot significantly, thereby giving rise to arbitrage opportunities for a fund.

(a) Selling spot and buying future :

In case the fund holds the stock of a company at say Rs. 500 while in the futures market it trades at a discount to the spot price say at Rs. 480 then the fund may sell the stock and buy the futures. On the date of expiry of the stock future, the fund may reverse the transactions (i.e. Buying at Spot & Selling futures) and earn a risk-free Rs.20/- (4% absolute) on its holdings. As this can be without any dilution of the view of the fund on the underlying stock the fund can still benefit from any movement of the price in the northward direction, i.e. if on the date of expiry of the futures, if the stock trades at Rs. 530 which would be the price of the futures too, the fund will have a benefit of Rs. 30 /- whereby the fund gets the 6% upside movement together with the 4% benefit on the arbitrage, and thus getting a total return of 10%

Risk associated with this strategy:

- Lack of opportunities available in the market
- Risk of mispricing or improper valuation
- Inability of the derivatives to correlate perfectly with underlying security
- Execution risk, whereby the rates seen on the screen may not be the rates at which the ultimate execution takes place.

(b) Buying spot and selling future:

Where the stock of a company is trading in the spot market at Rs 1000 while the futures trades at Rs. 1020/- in the futures market then fund may buy the stock at spot and sell in the futures market thereby earning Rs. 20. In case of adequacy of cash with the fund, this strategy may be used to enhance returns of the Scheme which was otherwise sitting on cash.

Risk associated with this strategy:

- Lack of opportunities available in the market
- Risk of mispricing or improper valuation
- Inability of the derivatives to correlate perfectly with underlying security
- Execution risk, whereby the rates seen on the screen may not be the rates at which the ultimate execution takes place.

(c) Buying stock future:

Where the scheme wants to initiate a long position in a stock whose spot price is at say, Rs.1000 and futures is at

Rs. 980, then the fund may just buy the futures contract instead of the spot thereby benefiting from a lower cost.

Risk associated with this strategy:

- Lack of opportunities available in the market
- Risk of mispricing or improper valuation
- Inability of the derivatives to correlate perfectly with underlying security
- Execution risk, whereby the rates seen on the screen may not be the rates at which the ultimate execution takes place.

Options:

An option gives the owner the right but not the obligation to buy or sell the underlying asset at particular price and for a specified period of time. The option will be exercised if the outcome is favourable to the owner. A call option gives the owner a right but not the obligation to buy the underlying asset at a predetermined price on a pre-specified date. A put option gives the owner the right but not the obligation to sell a security at a predetermined price on a pre-specified date. For an option buyer, Risk is limited (or known) to premium paid on call or put options. . If options are sold, the risk is unlimited (or unknown). The risk of the unknown can be mitigated by staying covered, using covered calls or bull/bear spread, to name a few strategies.

Mainly there are two type of options; American and European. Options that can be exercised on or before the expiration date are called American Options, while those that can be exercised only on the expiration date are called European Options. In India, till recently, Index options were European and Stock options were American. However off-late, Exchanges have shifted options on individual stocks from American to European. Option contracts are designated by the type of option, name of the underlying, expiry month and the strike price. Thus options can be used to earn less volatile returns, earn the premium or use for hedging purposes etc.

Strategies that use Options and the objectives of such strategies:

Illustrations of strategies using Options

- a) **Call Option (Buy):** The fund buys a call option at the strike price of say Rs.1000 and pays a premium of say Rs. 50, the fund would earn profits if the market price of the stock at the time of expiry of the option is more than Rs. 1050 being the total of the strike price and the premium thereon. If on the date of expiry of the option the stock price is below Rs 1000, the fund will not exercise the option and it loses the premium of Rs 50. The maximum loss in such a strategy is limited to the option premium, while upside potential is theoretically unlimited

Risk associated with this strategy:

- Lack of opportunities available in the market
- Inability of the derivatives to correlate perfectly with underlying security
- Execution risk, whereby the rates seen on the screen may not be the rates at which the ultimate execution takes place.

b) **Put Option (Buy):** The fund buys a Put Option at Rs 1000 with the underlying security trading at Rs. 1000 by paying a premium of say Rs. 50. If the stock price goes down to Rs. 900, the fund would protect its downside and would only have to bear the premium of Rs 50 instead of a loss of Rs 100 whereas if the stock price moves up to say Rs.1100 the fund may let the Option expire and forego the premium thereby capturing Rs. 100 upside in the underlying security held by the Fund.

Risk associated with this strategy:

- Lack of opportunities available in the market
- Inability of the derivatives to correlate perfectly with underlying security
- Execution risk, whereby the rates seen on the screen may not be the rates at which the ultimate execution takes place.

The above option positions can be initiated in both index based options as well as stock specific options.

Risk associated with this strategy:

- Lack of opportunities available in the market
- Inability of the derivatives to correlate perfectly with underlying security
- Execution risk, whereby the rates seen on the screen may not be the rates at which the ultimate execution takes place.

Any Notifications, Guidelines and circulars introduced by SEBI on derivatives from time to time shall automatically apply and forms part of the Scheme Information Documents

Portfolio Turnover

Portfolio turnover is the aggregate volume of purchases and sales as a percentage of the corpus of the Scheme during a specified period of time. The portfolio turnover in the Scheme will be a function of inflows, outflows as well as market opportunities available to the Fund Manager. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolios. It will be the endeavor of the Fund Manager to keep the portfolio turnover rates as low as possible. Active asset allocation would impact portfolio turnover. There may be trading opportunities that present themselves from time to time, where in the opinion of the fund manager, there is an opportunity to enhance the total returns of the portfolio. The fund manager will endeavor to balance the increased cost on account of higher portfolio turnover, if any, with benefits likely to be derived from such an approach.

Borrowing & Lending by the Fund

The Scheme may borrow monies to meet temporary liquidity requirements for the purpose of repurchase or redemption of Units or the payment of interest or IDCW to the Unit holders. However, such borrowing shall be restricted to 20% of the net assets of the Scheme and for a maximum period of six months. The limit of 20% may be revised by the Fund and to the extent the Regulations may permit.

The Fund may raise such borrowings, secured or unsecured, from any person or entity as it may deem fit, including Sponsor or Shareholders of any of their associate / group / affiliate entities or banks, after approval by the Trustee, at market related rates.

Stock Lending by the Fund

Stock Lending involves lending of securities to another person or entity for a fixed period of time, at a negotiated compensation in order to enhance returns of the portfolio. The Trustee may permit the Fund to engage in Stock Lending only if permitted under and in line with the prevailing securities lending Regulations. The Fund can temporarily lend, through an approved intermediary, securities held by the Scheme to reputed counterparties, for a fee, subject to internal norms, if any. This would enable generating better returns on those securities, which are otherwise bought with the intention of holding the same for a longer period of time. The securities lent will be returned by the borrower on the expiry of the stipulated period or the lender can call the same back before its expiry.

The AMC will follow regulatory restrictions as may be prescribed in carrying on the activities of Stock lending. Such lent stock, while they are on-lending, will not be available for sale, and this can result in temporary illiquidity.

The Fund Manager may engage in Stock Lending as per following limits:

- Not more than 20% of the net assets of the Scheme can generally be deployed in Stock Lending.
- Not more than 5% of the net assets of the Scheme can generally be deployed in Stock Lending to any single counter party.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

The benchmark of the scheme is NIFTY100 – TRI

The AMC and the Trustee may mutually agree to change the benchmark index or select an additional benchmark index after recording reasons for such change and by following required regulatory process.

PART III- OTHER DETAILS

A. COMPUTATION OF NAV

The Net Asset Value (NAV) of a mutual fund is the price at which units of a mutual fund are bought or sold. It is the market value of the fund after deducting its liabilities. The value of all units of a mutual fund portfolio are calculated on a daily basis, from this all expenses are then subtracted. The result is then divided by the total number of units the resultant value is the NAV. NAV is also sometimes referred to as Net Book Value or book Value.

Calculation of NAV Mutual fund assets usually fall under two categories – securities & cash. Securities, here, include both bonds and stocks. Therefore, the total asset value of a fund will include its stocks, cash and bonds at market value. IDCWs and interest accrued and liquid assets are also included in total assets. Also, liabilities like money owed to creditors, and other expenses accrued are also included.

The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time.

Formula to calculate Net Asset Value (NAV) = (Assets – Debts) / (Number of Outstanding units)

Here: Assets = Market value of mutual fund investments + Receivables + Accrued Income

Debts =Liabilities + Expenses (accrued) the market value of the stocks & debentures.

The NAV shall be calculated up to two decimal places. However the AMC reserves the right to declare the NAVs up to additional decimal places as it deems appropriate. Separate NAV will be calculated and disclosed for each Option. The NAVs of the Growth Option and the IDCW Option will be different after the declaration of the first IDCW.

The AMC will calculate and disclose the first NAV of the Scheme within a period of 5 business days from the date of allotment. Subsequently, the NAVs will be calculated for all the Business Days.

Rounding off policy for NAV:

For this Scheme, NAV will be declared upto two decimal places & the second decimal will be rounded off to the next higher digit if the third decimal is or more than 5 i.e., if the NAV is 10.137 it will be rounded off to 10.14.

However, there can be no assurance that the investment objective of the scheme will be achieved.

Sale Price:

Sale price is a price at which the fund house sells / offers mutual fund units to investors; this is nothing but the NAV of the respective Scheme of Mutual Fund. For investor who wants to invest in Mutual Fund, the units are offered at NAV of the respective Scheme of Mutual Fund.

For Example – If investor A wants to invest Rs. 5,000/- in XYZ Scheme of Mutual Fund. The NAV of Mutual Fund Scheme XYZ is Rs. 15 per unit. Investor's Investments & Mutual Fund unit allocation in Scheme XYZ is calculated as follows:-

$$\begin{aligned}
 \text{Investment of Investor A} &= \text{Investment Amount} / \text{Sale Price} \\
 &= 5,000 / 15 \\
 &= 333.3333 \text{ units}
 \end{aligned}$$

This means investor A will be allocated **333.3333 units** of Mutual Fund Scheme XYZ.

Repurchase Price:

Repurchase price is a price at which fund house repurchases the mutual fund units back from the investor. For investor who wants to redeem his mutual fund units, the units are repurchased at respective scheme NAV less Exit Load (If Applicable)

For Example - If Mutual Fund Scheme XYZ is having NAV of Rs. 15 & Exit Load of 1% then the repurchase price would be calculated as follow:

$$\begin{aligned}
 \text{Repurchase Price} &= \text{NAV} * (1 - \text{Exit Load} \%) \\
 &= 15 * (1 - 0.01) \\
 &= 14.8500
 \end{aligned}$$

This means the investor will realise **Rs. 14.8500** per unit if he redeems from Mutual Fund Scheme XYZ.

In case of no exit load the NAV & repurchase price are same.

B. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like sale and distribution fees paid, marketing and advertising, registrar expenses, printing and stationery, bank charges etc. NFO expenses was borne by the AMC.

C. ANNUAL SCHEME RECURRING EXPENSES

These are the fees and expenses for operating the scheme. These expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, marketing and selling costs etc. as given in the table below:

The AMC has estimated that upto 2.25 % of the daily average net assets of the scheme will be charged to the scheme as expenses (Give slab wise break up depending on the assets under management. Give plan/option wise break up if the expense structures are different). For the actual current expenses being charged, the investor should refer to the website of the mutual fund.

Expense Head	% p.a. of daily Net Assets* (Estimated p.a.)
Investment Management & Advisory Fee	Upto 2.25%
Audit fees/fees and expenses of trustees	
Custodial Fees	
Registrar & Transfer Agent Fees including cost of providing account statements / IDCW / redemption cheques/ warrants	
Marketing & Selling Expenses including Agents Commission and statutory advertisement	
Costs related to investor communications	
Costs of fund transfer from location to location	
Cost towards investor education & awareness	
Brokerage & transaction cost pertaining to distribution of units	
Goods & Services Tax on expenses other than investment and advisory fees	
Goods & Services Tax on brokerage and transaction cost	
Other Expenses (to be specified as per Reg 52 of SEBI MF Regulations)	
Maximum Total expenses ratio (TER) permissible under Regulation 52 (6) (c)	Upto 2.00%
Additional expenses under Regulations 52(6A)(c)**	Upto 0.05%
Additional expenses for gross new inflows from specified cities#	Upto 0.30%

*Any other expenses which are directly attributable to the Scheme, may be charged with approval of the Trustee within the overall limits as specified in the Regulations except those expenses which are specifically prohibited.

** In accordance with Paragraph 10.1.7 of SEBI Master Circular for Mutual Funds dated May 19, 2023, Mutual Fund schemes including close ended schemes, wherein exit load is not levied

/ not applicable, the AMCs shall not be eligible to charge the above mentioned additional expenses for such schemes.

#Additional TER will be charged based on inflows only from retail investors\$ (other than Corporates and Institutions) from B 30 cities.

SEBI vide its letter no. SEBI/HO/IMD-SEC-3/P/OW/2023/5823/1 dated February 24, 2023, and AMFI letter dated No. 35P/ MEM-COR/ 85-a/ 2022-23 dated March 02, 2023 has directed AMCs to keep B-30 incentive structure in abeyance till further notice.

\$ In accordance with Paragraph 10.1.3 of SEBI Master Circular for Mutual Funds dated May 19, 2023, it has been decided that inflows of amount upto Rs. 2,00,000/- per transaction, by the individual investors shall be considered as inflows from retail investors.

All scheme related expenses including commission paid to distributors, by whatever name it may be called and in whatever manner it may be paid, shall necessarily be paid from the scheme only within the regulatory limits and not from the books of the Asset Management Companies (AMC), its associate, sponsor, trustee or any other entity through any route. Provided that the expenses that are very small in value but high in volume may be paid out of AMC's books. Such expenses can be paid out of AMC's books at actuals or not exceeding 2 bps of respective scheme AUM, whichever is lower. However, the upfront trail commission shall be paid from AMC's books for inflows through SIPs from new investors as per the applicable regulations. The said commission shall be amortized on daily basis to the scheme over the period for which the payment has been made. A complete audit trail of upfronting of trail commissions from the AMC's books and amortization of the same to scheme(s) thereafter shall be made available for inspection. The said commission should be charged to the scheme as 'commissions' and should also account for computing the TER differential between regular and direct plans in each scheme.

These estimates have been made in good faith as per the information available and estimates made by the Investment Manager/ AMC and are subject to change inter-se or in total subject to prevailing SEBI Regulations. The AMC may incur actual expenses which may be more or less than those estimated above under any head and/or in total and may charge expenses under any of the different heads given under Regulation 52(2) & 52(4) of the SEBI (MF) Regulations (hereinafter called as SEBI Regulations). These expenses shall be subject to the maximum ceiling under the SEBI Regulations. Types of expenses charged shall be as per the SEBI Regulations.

As per Regulation 52(6) of the SEBI Regulations, the maximum recurring expenses (including the Investment Management and Advisory Fees) that can be charged to the respective schemes shall be subject to the percentage limit of daily net assets as given below:

Assets under management slab (In Rs Crore)	Total Expense Ratio (TER)
On the first Rs 500 crores of the daily assets	2.25%
On the next Rs 250 crores of the daily assets	2.00%
On the next Rs 1,250 crores of the daily assets	1.75%

On the next Rs 3,000 crores of the daily assets	1.60%
On the next Rs 5,000 crores of the daily assets	1.50%
On the next Rs 40,000 crores of the daily assets	TER reduction of 0.05% for every increase of Rs 5,000 crores of daily net assets or part thereof.
On balance of the assets	1.05%

In addition to the limits specified above, as per Regulation 52(6A) of the SEBI Regulations, the following costs or expenses may be charged to the scheme, namely-

(a) brokerage and transaction costs which are incurred for the purpose of execution of trade and is included in the cost of investment, not exceeding 0.12 per cent in case of cash market transactions and 0.05 per cent in case of derivatives transactions;

(b) expenses not exceeding of 0.30 per cent of daily net assets, if the new inflows from beyond top 30 cities are at least-

(i) 30 per cent of gross new inflows in the scheme, or;

(ii) 15 per cent of the average assets under management (year to date) of the scheme, whichever is higher:

Provided that if inflows from beyond top 30 cities is less than the higher of sub-clause (i) or sub-clause (ii), such expenses on daily net assets of the scheme shall be charged on proportionate basis as per below formula:

$$\frac{\text{Daily net assets} \times 30 \text{ basis points} \times \text{New inflows from beyond top 30 cities}}{365^* \times \text{Higher of (a) or (b) above}}$$

* 366, wherever applicable.

Provided further that expenses charged under this clause shall be utilized for distribution expenses incurred for bringing inflows from such cities:

Provided further that amount incurred as expense on account of inflows from such cities shall be credited back to the scheme in case, the said inflows are redeemed within a period of one year from the date of investment;

The top 30 cities shall mean top 30 cities based on AMFI data on 'AUM by Geography – Consolidated Data for Mutual Fund Industry' as at the end of the previous financial year.

(c) Additional expenses, not exceeding 0.20 per cent of daily net assets of the scheme, incurred towards different heads mentioned under Regulations 52(2) and 52(4) of the SEBI Regulations.

The AMC shall not be eligible to charge the aforementioned additional expenses, wherein exit load is not levied / not applicable in the scheme.

Subject to the SEBI Regulations and this document, expenses over and above the prescribed ceiling will be borne by AMC. The AMC may charge the Mutual Fund with investment and advisory fee as prescribed in the SEBI Regulations from time to time and as permitted by the Investment Management Agreement.

The Direct Plan shall have lower expense ratio compared to the Existing Plan and no commission shall be paid out of the Direct Plan.

The current expense ratios will be updated on the website of AMFI and the AMC website viz. www.growwmf.in on daily basis under a separate head ‘Total Expense Ratio of Mutual Fund Schemes’ in a downloadable spreadsheet format. . Any change in the base TER (i.e. TER excluding additional expenses provided in Regulation 52(6A)(b) and 52(6A)(c) of SEBI (Mutual Funds) Regulations, 1996) in comparison to previous base TER charged to the scheme, the AMC shall update the current expense ratios on the website of the mutual fund at least three working days prior to the effective date of the change.

Provisions Relating to GST:

1. **GST** on investment and advisory fees shall be charged to the scheme in addition to the maximum limit of TER as prescribed in Regulation 52 of the SEBI Regulations.
2. **GST** on other than investment and advisory fees, if any, shall be charged to the scheme within the maximum limit of TER as per Regulation 52 of the SEBI Regulations.
3. **GST** on exit load, if any, shall be paid out of the exit load proceeds and exit load net of GST, if any, shall be credited to the scheme.
4. **GST** on brokerage and transaction cost paid for asset purchases, if any, shall be charged within the limit prescribed under Regulation 52 of the SEBI Regulations.

Illustration of impact of expense ratio on scheme’s returns

For any scheme, NAV is computed on a daily basis factoring in all the assets as well as liabilities of the scheme (including expenses charged). Expenses charged to the scheme bring down its NAV and hence the investor's net returns on a corresponding basis.

Illustration:

If the scheme's gross of expenses NAV goes up by 15% over 1 year (for example from 10 to 11.5), and the expense charged for the scheme over that year is 2% of the initial NAV (0.2), the NAV of scheme (net of expenses) at the end of 1 year will come down to 11.3 (11.5 less 0.2) and therefore the net of expenses return for the investor will be 13%.

D. LOAD STRUCTURE

Exit Load is an amount which is paid by the investor to redeem the units from the scheme. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC (www.growwmf.in) or may call at (*toll free no 8050180222*) or your distributor.

Type of Load	Load chargeable (as %age of NAV)
Exit	<ul style="list-style-type: none"> • 1% if redeemed/switched out within 7 days from the date of allotment • Nil - if redeemed/switched out after 7 days from the date of allotment

B. Risk factors

i. Scheme Specific Risk Factors

Risk associated with investing in Equity and Equity related instruments.

1. Groww Largecap Fund is an open ended equity fund investing in Large Cap companies by market capitalization and thus will carry less risk as compared to a mid cap / thematic equity fund. The underlying companies will be more liquid and also the access to information for these companies is very high as the Institutional ownership in these companies is generally large.
2. The value of the Scheme's investments may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments. Consequently, the NAV of the Units of the Scheme may fluctuate and can go up or down.
3. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities.
4. As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for the redemption of units may be significant in the event of a high number of redemption requests or a restructuring of the Scheme. In view of the above, the Trustees have a right in its sole discretion, to limit redemptions under certain circumstances as described under the section titled Right to Limit Redemptions.
5. Investment decisions made by the AMC may not always be profitable.
6. The tax benefits available under the scheme are as available under the present taxation laws and subject to relevant conditions. The information given is included for general purposes only and is based on advice that the AMC has received regarding the law and the practice that is currently in force in India and the investors and the Unitholders should be aware that the relevant fiscal rules and their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor / Unitholder is advised to consult his/her own professional tax advisor.
7. In case of investments in derivative instruments like index futures, the risk/ reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future. Further, there could be an element of settlement risk, which could be different from the risk in settling physical shares and there is a risk attached to the liquidity and the depth of the index futures market as it is relatively a new market.
8. Groww Large Cap Fund may generate returns which are not in line with the performance of the NIFTY 100 TRI and may arise from a variety of factors including but not limited to:-

- The fund will deploy 0-20% of the net assets by investing in securities other than Large Cap companies in percentages as decided by the investment team from time to time. This will result in the performance of the fund being at variance with the NIFTY 100 TRI . Also these scrips will normally carry higher risk than Large cap companies
- Transaction and other expenses, such as but not limited to brokerage, custody, trustee and asset management fees.
- Being an open-ended scheme, the scheme may hold appropriate levels of cash or cash equivalents to meet ongoing redemptions

Risk associated with investments in Debt Instruments

Interest-Rate Risk: Fixed income securities such as government bonds, corporate bonds, Money Market Instruments and Derivatives run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded.

Re-investment Risk: Investments in fixed income securities carry re-investment risk as interest rates prevailing on the coupon payment or maturity dates may differ from the original coupon of the bond.

Liquidity Risk: The liquidity of a bond may change, depending on market conditions leading to changes in the liquidity premium attached to the price of the bond. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio.

Credit Risk: This is the risk associated with the issuer of a debenture/bond or a Money Market Instrument defaulting on coupon payments or in paying back the principal amount on maturity. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that a Government Security is a sovereign security and is the safest. Corporate bonds carry a higher amount of credit risk than Government Securities. Within corporate bonds also there are different levels of safety and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.

Liquidity Risk on account of unlisted securities: The liquidity and valuation of the Scheme investments due to their holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment. The unlisted security can go down in value before the divestment date and selling of these securities before the divestment date can lead to losses in the portfolio.

Pre-Payment Risk - Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of

such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund

Risks associated with investments in derivatives:

- The Scheme may invest in derivative products in accordance with and to the extent permitted under the Regulations and by RBI. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Trading in derivatives carries a high degree of risk although they are traded at a relatively small amount of margin which provides the possibility of great profit or loss in comparison with the principal investment amount. Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have an impact on their value and consequently, on the NAV of the Units of the Scheme.
- The derivatives market in India is nascent and does not have the volumes that may be seen in other developed markets, which may result in volatility to the values.
- Investment in derivatives also requires the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. Even a small price movement in the underlying security could have an impact on their value and consequently, on the NAV of the Units of the Scheme.
- The Scheme may face execution risk, whereby the rates seen on the screen may not be the rate at which the ultimate execution of the derivative transaction takes place.
- The Scheme may find it difficult or impossible to execute derivative transactions in certain circumstances. For example, when there are insufficient bids or suspension of trading due to price limit or circuit breakers, the Scheme may face a liquidity issue.
- The options buyer's risk is limited to the premium paid, while the risk of an options writer is unlimited. However the gains of an options writer are limited to the premiums earned.
- The exchange may impose restrictions on exercise of options and may also restrict the exercise of options at certain times in specified circumstances and this could impact the value of the portfolio.
- The writer of a put option bears the risk of loss if the value of the underlying asset declines below the exercise price. The writer of a call option bears a risk of loss if the value of the underlying asset increases above the exercise price.
- Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks.
- The Scheme bears a risk that it may not be able to correctly forecast future market trends or the value of assets, indices or other financial or economic factors in establishing derivative positions for the Scheme.
- The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets
- There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. The counter party may default on a transaction before settlement and therefore, the Scheme is compelled to negotiate with another counterparty at the then prevailing (possibly unfavourable) market price.

- Derivatives also carry a market liquidity risk where the derivatives cannot be sold (unwound) at prices that reflect the underlying assets, rates and indices.
- Where derivatives are used for hedging, such use may involve a basis risk where the instrument used as a hedge does not match the movement in the instrument/underlying asset being hedged. The risk may be inter-related also e.g. interest rate movements can affect equity prices, which could influence specific issuer/industry assets.
- Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor.
- Execution of investment strategies depends upon the ability of the fund manager(s) to identify such opportunities which may not be available at all times. Identification and execution of the strategies to be pursued by the fund manager(s) involve uncertainty and decision of fund manager(s) may not always be profitable. No assurance can be given that the fund manager(s) will be able to identify or execute such strategies.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Risks associated with Securitized Debt:

Domestic securitised debt assets would be in the nature of Mortgage backed securities (MBS) and Asset backed securities (ABS) with underlying pool of assets and receivables like Housing Loans, Auto loans and corporate loans. The Securitised debt assets and the underlying asset classes like housing loans, Auto Loans and Corporate loans have the following risk factors.

- **Limited Recourse and Credit Risk:** Certificates issued on investment in securitised debt represent a beneficial interest in the underlying receivables and there is no obligation on the issuer, seller or the originator in that regard. Defaults on the underlying loan can adversely affect the pay outs to the investors (i.e. the Scheme) and thereby, adversely affect the NAV of the Scheme. While it is possible to repossess and sell the underlying asset, various factors can delay or prevent repossession and the price obtained on sale of such assets may be low.
- **Bankruptcy Risk:** If the originator of securitised debt instruments in which the Scheme invests is subject to bankruptcy proceedings and the court in such proceedings concludes that the sale of the assets from originator to the trust was not a 'true sale', then the Scheme could experience losses or delays in the payments due. Normally, care is taken in structuring the securitization transaction so as to minimize the risk of the sale to the trust not being construed as a 'true sale'.
- **Risk of Co-mingling:** Servicers in a securitization transaction normally deposit all payments received from the obligors into a collection account. However, there could be a time gap between collection by a servicer and depositing the same into the collection account. In this interim period, collections from the loan agreements by the servicer may not be segregated from other funds of the servicer. If the servicer fails to remit such funds due to investors, investors in the Scheme may be exposed to a potential loss.

Risks associated with Mortgage Backed Securities (MBS) - Housing Loans

- **Prepayment Risk:** The fund may receive payment of monthly payouts earlier than scheduled. Prepayments shorten the life of the instrument to an extent that cannot be fully predicted. The rate of prepayments may be influenced by a variety of economic, social and other factors.
- **Credit Risk:** Delinquencies may happen which would reduce the principal amount. Typically MBS structures come with credit enhancement in variety of forms. If delinquencies are higher than the amount available in the credit enhancement facility than the monthly payouts to the fund would reduce. Historically, it has been observed that housing loans have lower default rates as compared to other forms of credit.
- **Liquidity Risk:** Historically the secondary market volume of securitised papers has been limited. This could limit the ability of the fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.
- **Conversion risk:** Conversion of loans from fixed rate to floating rate loans and vice versa could lead to a change in the expected cash flows from the loans.

Risks associated with Asset Backed Securities (ABS)-Auto Loans.

- **Prepayment Risk:** The fund may receive payment of monthly payouts earlier than scheduled. Prepayments shorten the life of the instrument to an extent that cannot be fully predicted. The rate of prepayments may be influenced by a variety of economic, social and other factors. Prepayments in auto loans is lower than housing loans as the shorter tenor of auto loans makes it economically unattractive to prepay after considering the prepayment charges.
- **Credit Risk:** Delinquencies may happen which would reduce the principal amount. Typically ABS structures come with credit enhancement in variety of forms. If delinquencies are higher than the amount available in the credit enhancement facility than the monthly payouts to the fund would reduce. Typically auto loans carry higher risk than MBS as the value retention of the underlying asset is higher in MBS as compared to the underlying asset of ABS.
- **Liquidity Risk:** Historically the secondary market volume of securitised papers has been limited. This could limit the ability of the fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.
- **Conversion risk:** Conversion of loans from fixed rate to floating rate loans and vice versa could lead to a change in the expected cash flows from the loans.

Risks associated with Asset Backed Securities (ABS) - Corporate Loans

- **Credit Risk:** The fund has an exposure to the Borrower/Borrowers and servicing of the instrument depends on the credit risk of the Borrower. The value of the instrument would fluctuate depending upon the changes in the perceived level of credit risk as well as any actual default.
- **Prepayment Risk:** The Borrower may prepay the receivables prior to their respective due dates. This may result in a change in the yield and tenor for the fund.
- **Limited Liquidity and Price Risk:** Historically the secondary market volume of securitised papers has been limited. This could limit the ability of the fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.

Risk associated with Securities Lending

- Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return

equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent in securities lending, including the risk of failure of the other party, in this case the approved intermediary to comply with the terms of the agreement. Such failure can result in a possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing thereon.

- corporate benefits accruing thereon.

C. Risk mitigation strategies

The asset allocation of the Scheme will be steadily monitored and it shall be ensured that investments are made in accordance with the scheme objective and within the regulatory and internal investment restrictions prescribed from time to time.

A detailed monitoring process has been designed to identify measure, monitor and manage portfolio risk. The aim is to have a structured mechanism towards risk management thereby maximising potential opportunities and minimizing the adverse effects of risk. Effective risk management is crucial for achieving optimum results. Adequate safeguards would be incorporated in the portfolio management process. The main instrument for reducing risk is through diversification across sectors/companies/ securities. The Fund Manager's job is to identify securities which offer higher returns with a lower level of risk. While identifying such securities, rigorous in-house evaluation would be carried out by the investment team. The front office system of the AMC has the capability of pre- investment monitoring of investment restrictions as per SEBI guidelines and various internal limits prescribed from time to time to facilitate pre-emptive monitoring. Further various risk management tools will be used for measuring and monitoring portfolio risks.

II. Information about the scheme:

- A. Where will the scheme invest – Please refer Section I of the document to know in detail description of the instruments (including overview of debt markets in India, if applicable)
- B. What are the investment restrictions?

Investment restrictions as contained in the SEBI (MF) Regulations specifically in the Seventh Schedule of the Regulations including any amendments thereto and SEBI circulars issued from time to time and as applicable to the Scheme are provided below:

- 1) The Mutual Fund under all its Scheme(s) shall not own more than 10% of any company's paid up capital carrying voting rights.
- 2) The Scheme shall buy and sell securities on the basis of deliveries and shall in all cases of purchases, take delivery of relevant securities and in all cases of sale, deliver the securities and shall in no case put itself in a position whereby it has to make short sale or carry forward transaction or engage in badla finance (except as permitted under the extant regulations, from time to time).

Provide that the Mutual Fund may enter into derivatives transactions in a recognized stock exchange, subject to the framework specified by SEBI.

Provided further that the sale of government security already contracted for purchase shall be permitted in accordance with the guidelines issued by the RBI in this regard.

- 3) The Scheme shall not invest more than 10% of its net assets in equity shares or equity related instruments of any company.
- 4) The Scheme shall not invest more than 5% of its net assets in unlisted equity shares or equity related instruments.
- 5) A mutual fund scheme shall not invest more than 10% of its NAV in debt instruments comprising money market instruments and non-money market instruments issued by a single issuer which are rated not below investment grade by a credit rating agency authorized to carry out such activity under the Act. Such investment limit may be extended to 12% of the NAV of the scheme with the prior approval of the Board of Trustees and the Board of directors of the asset management company:

Provided that such limit shall not be applicable for investments in Government Securities, treasury bills and TREPS.

Provided further that investment within such limit can be made in mortgaged backed securitized debt which are rated not below investment grade by a credit rating agency registered with SEBI.

Further, In accordance with paragraph 12.8.3.1 of SEBI Master Circular for Mutual Funds dated May 19, 2023as amended from time to time, the scheme shall not invest more than

- a. 10% of its NAV in debt and money market securities rated AAA; or

- b. 8% of its NAV in debt and money market securities rated AA; or
- c. 6% of its NAV in debt and money market securities rated A and below issued by a single issuer.

The above investment limits may be extended by up to 2% of the NAV of the scheme with prior approval of the Board of Trustees and Board of Directors of the AMC, subject to compliance with the overall 12% limit.

Provided that such limit shall not be applicable for investments in government securities, treasury bills and collateralized borrowing and lending obligations.

- 6) In accordance with paragraph 12.9.1 of SEBI Master Circular for Mutual Funds dated May 19, 2023, the total exposure of debt schemes in a particular sector (excluding investments in Bank CDs, TREPS, G-Secs, TBills and AAA rated securities issued by Public Financial Institutions and Public Sector Banks) shall not exceed 20% of the net assets of the scheme.

Provided that an additional exposure to financial services sector (over and above the limit of 20%) not exceeding 10% of the net assets of the scheme shall be allowed by way of increase in exposure to Housing Finance Companies (HFCs) only. Further, an additional exposure of 5% of the net assets of the scheme has been allowed for investments in securitized debt instruments based on retail housing loan portfolio and/or affordable housing loan portfolio.

Provided further that the additional exposure to such securities issued by HFCs are rated AA and above and these HFCs are registered with National Housing Bank (NHB) and the total investment/exposure in HFCs shall not exceed 20% of the net assets of the scheme.

For the purpose of identifying sector, AMFI sector definitions shall be referred to. For unlisted / non traded securities, where sector classification does not exist, AMC will have the discretion to decide the classification as per their best judgment.

- 7) The Scheme shall not invest more than 10% of its NAV in unrated debt instruments issued by a single issuer and the total investment in such instruments shall not exceed 25% of the NAV of the Scheme. All such investments shall be made with the prior approval of the Board of Trustee and Board of AMC.
- 8) Till the regulations so require, the Scheme shall not make any investment in:
 - (a) any unlisted security of an associate or group company of the sponsor; or
 - (b) any security issued by way of private placement by an associate or group company of the sponsor; or
 - (c) the listed securities of group companies of the sponsor which is in excess of 25% of the net assets.
- 9) Transfer of investments from one Scheme to another Scheme in the same Mutual Fund is permitted provided:
 - (a) such transfers are done at the prevailing market price for quoted instruments on a spot basis (“spot basis” shall have the same meaning as specified by a Stock Exchange for spot transactions);
 - (b) the securities so transferred shall be in conformity with the investment objective of the Scheme to which such transfer has been made.

- (c) IST purchases would be allowed subject to guidelines as specified in In accordance with paragraph 12.30 of SEBI Master Circular for Mutual Funds dated May 19, 2023.
- 10) The Scheme may invest in other Scheme under the same AMC or any other Mutual Fund without charging any fees, provided the aggregate inter-scheme investment made by all the Schemes under the same management or in Schemes under management of any other asset management company shall not exceed 5% of the Net Asset Value of the Fund. Provided that this clause shall not apply to any Fund of Funds scheme.
 - 11) The Fund shall get the securities purchased transferred in the name of the Fund on account of the concerned Scheme, wherever investments are intended to be of a long-term nature.
 - 12) The Fund may buy and sell securities on the basis of deliveries and will not make any short sales or engage in carry forward transactions except as and when permitted by the RBI in this regard (for example “when issued market” transactions).
 - 13) All the Scheme’s investments will be in transferable securities or bank deposits or in money at call or any such facility provided by RBI in lieu of call.
 - 14) No loans for any purpose can be advanced by the Scheme.
 - 15) The Fund shall not borrow except to meet temporary liquidity needs of the Fund for the purpose of repurchase/ redemption of units or payment of interest and/or IDCW to the Unitholders, provided that the Fund shall not borrow more than 20% of the net assets of the individual Scheme and the duration of the borrowing shall not exceed a period of 6 months.
 - 16) The scheme shall not make any investment in a Fund of Funds scheme.
 - 17) Pending deployment of the funds of the Scheme in securities in terms of the investment objective of the Scheme, the Mutual Fund may park the funds of the Scheme in short term deposits of scheduled commercial banks, subject to the following guidelines issued by In accordance with paragraph 12.16 of SEBI Master Circular for Mutual Funds dated May 19, 2023as may be amended from time to time:
 - i. “Short Term” for such parking of funds by the Scheme shall be treated as a period not exceeding 91 days. Such short-term deposits shall be held in the name of the Scheme.
 - ii. The Scheme shall not park more than 15% of the net assets in short term deposit(s) of all the scheduled commercial banks put together. However, such limit may be raised to 20% with prior approval of the Trustee.
 - iii. Parking of funds in short term deposits of associate and sponsor scheduled commercial banks together shall not exceed 20% of total deployment by the Mutual Fund in short term deposits.
 - iv. The Scheme shall not park more than 10% of the net assets in short term deposit(s), with any one scheduled commercial bank including its subsidiaries.
 - v. The Scheme shall not park funds in short term deposit of a bank which has invested in that Scheme.
 - vi. The above norms do not apply to term deposits placed as margins for trading in cash and derivatives market.

18) Limitations and restrictions for investments in derivatives

In accordance with paragraph 7.5 of SEBI Master Circular for Mutual Funds dated May 19, 2023 interalia specified the guidelines pertaining to trading by Mutual Funds in Exchange Traded derivatives. The position limits have subsequently been modified vide paragraph 7.5 of SEBI Master Circular for Mutual Funds dated May 19, 2023

All derivative position taken in the portfolio would be guided by the following principles.

i. Position limit for the Mutual Fund in index options contracts

- a. The Mutual Fund position limit in all index options contracts on a particular underlying index shall be Rs. 500 crore or 15% of the total open interest of the market in index options, whichever is higher, per Stock Exchange.
- b. This limit would be applicable on open positions in all options contracts on a particular underlying index.

ii. Position limit for the Mutual Fund in index futures contracts:

- a. The Mutual Fund position limit in all index futures contracts on a particular underlying index shall be Rs. 500 crore or 15% of the total open interest of the market in index futures, whichever is higher, per Stock Exchange.
- b. This limit would be applicable on open positions in all futures contracts on a particular underlying index.

iii. Additional position limit for hedging

In addition to the position limits at point (i) and (ii) above, the Mutual Fund may take exposure in equity index derivatives subject to the following limits:

1. Short positions in index derivatives (short futures, short calls and long puts) shall not exceed (in notional value) the Mutual Fund's holding of stocks.
2. Long positions in index derivatives (long futures, long calls and short puts) shall not exceed (in notional value) the Mutual Fund's holding of cash, government securities, T-Bills and similar instruments.

iv. Position limit for Mutual Fund for stock based derivative contracts

The Mutual Fund position limit in a derivative contract on a particular underlying stock, i.e. stock option contracts and stock futures contracts, is defined in the following manner:-

1. The combined futures and options position limit shall be 20% of the applicable Market Wide Position Limit (MWPL)

v. Position limit for each scheme of a Mutual Fund

The scheme-wise position limit / disclosure requirements shall be –

1. For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a scheme of a mutual fund shall not exceed the higher of:
1% of the free float market capitalisation (in terms of number of shares) or 5% of the open interest in the derivative contract on a particular underlying stock (in terms of number of contracts).
2. This position limits shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock Exchange.
3. For index based contracts, Mutual Funds shall disclose the total open interest held by its scheme or all schemes put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index.

Exposure limits for the Scheme:

In accordance with paragraph 12.25.2 of SEBI Master Circular for Mutual Funds dated May 19, 2023, the following exposure limits for investment in derivatives will be applicable to the Scheme:

1. The cumulative gross exposure through equity, debt and derivative positions shall not exceed 100% of the net assets of the Scheme. However, cash or cash equivalents with residual maturity of less than 91 days shall be treated as not creating any exposure.
2. The Scheme shall not write options or purchase instruments with embedded written options.
3. The total exposure related to option premium paid shall not exceed 20% of the net assets of the Scheme.
4. Exposure due to hedging positions shall not be included in the above mentioned limits subject to the following:
 - a. Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
 - b. Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall be added and treated under limits mentioned in point 1 above.
 - c. Any derivative instrument used to hedge shall have the same underlying security as the existing position being hedged.
 - d. The quantity of underlying associated with the derivative position taken for hedging purposes shall not exceed the quantity of the existing position against which hedge has been taken.
5. The Scheme may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions shall have to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases shall not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counterparty in such transactions shall not exceed 10% of the net assets of the scheme.
6. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated as exposure for the limit mentioned in point 1 above.

7. Definition of Exposure in case of Derivative Positions:

Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price * Lot Size * Number of Contracts
Short Future	Futures Price * Lot Size * Number of Contracts
Option bought	Option Premium Paid * Lot Size * Number of Contracts

- 19) The Scheme shall not invest in unlisted debt instruments including commercial papers, except Government Securities and other money market instruments.

- Provided that the Scheme may invest in unlisted nonconvertible debentures up to a maximum of 10% of the debt portfolio of the Scheme subject to such conditions as may be specified by SEBI from time to time.
- Provided further that the Scheme shall comply with the norms under the above clauses within the time and in the manner as may be specified by SEBI.
- Provided further that the norms for investments by the Scheme in unrated debt instruments shall be as specified by SEBI from time to time.

As per these norms, investments in unrated debt and money market instruments, other than government securities, treasury bills, derivative products such as Interest Rate Swaps (IRS), Interest Rate Futures (IRF), etc. by mutual fund schemes shall not exceed 5% of net assets of the Scheme.

Further, the Scheme shall comply with provisions of In accordance with paragraph 12.1 of SEBI Master Circular for Mutual Funds dated May 19, 2023 regarding investment in Debt and Money Market Instruments, as amended from time to time, to the extent applicable to the Scheme.

- 20) The Scheme shall invest in Debt instruments having Structured Obligations (Rating SO)/ Credit Enhancements (Rating CE) paragraph 12.3 of SEBI Master Circular for Mutual Funds dated May 19, 2023 as may be amended by SEBI from time to time. The same are currently as under:

The investment of the Scheme in the following instruments shall not exceed 10% of the debt portfolio of the scheme and the group exposure in such instruments shall not exceed 5% of the debt portfolio of the Scheme:

- a. Unsupported rating of debt instruments (i.e. without factoring-in credit enhancements) is below investment grade; and
- b. Supported rating of debt instruments (i.e. after factoring-in credit enhancement) is above investment grade.

For this purpose, a group means a group as defined under regulation 2 (mm) of the Regulations and shall include an entity, its subsidiaries, fellow subsidiaries, its holding company and its associates.

However, the above Investment limits shall not be applicable on investments in securitized debt instruments, as defined in SEBI (Public Offer and Listing of Securitized Debt Instruments) Regulations 2008.

Investment in debt instruments, having credit enhancements backed by equity shares directly or indirectly, shall have a minimum cover of 4 times considering the market value of such shares.

- 21) The Scheme shall not invest more than 20% of its net assets in a group (excluding investments in securities issued by Public Sector Units, Public Financial Institutions and Public Sector Banks). Such investment limit may be extended to 25% of the net assets of the Scheme with the prior approval of the Trustees.

Provided that investments by the Scheme in debt and money market instruments of group companies of both the sponsor and the asset management company shall not exceed 10% of the net assets of the Scheme. Such investment limit may be extended to 15% of the net assets of the Scheme with prior approval of the Board of Trustees.

For this purpose, a group means a group as defined under regulation 2 (mm) of the Regulations and shall include an entity, its subsidiaries, fellow subsidiaries, its holding company and its associates.

The Scheme will comply with the other Regulations applicable to the investments of Mutual Funds from time to time. Apart from the Investment Restrictions prescribed under the Regulations, internal risk parameters for limiting exposure to a particular scrip or sector may be prescribed from time to time to respond to the dynamic market conditions and market opportunities.

The AMC/Trustee may alter these above stated restrictions from time to time to the extent the Regulations change, so as to permit the Scheme to make its investments in the full spectrum of permitted investments for mutual funds to achieve its respective investment objective.

All investment restrictions shall be applicable at the time of making investment.

<p>The policy regarding reissue of repurchased units, including the maximum extent, the manner of reissue, the entity (the scheme or the AMC) involved in the same.</p>	<p>Not Applicable</p> <p>Units once redeemed will not be reissued</p>
<p>Restrictions, if any, on the right to freely retain or dispose of units being offered.</p>	<p>The Mutual Fund will be repurchasing (subject to completion of lock-in period, if any) and issuing units of the Scheme on an ongoing basis and hence the transfer facility is found redundant. Any addition / deletion of name from the folio of the Unit holder is deemed as transfer of Units. In view of the same, additions/ deletions of names will not be allowed under any folio of the Scheme. The said provisions in respect of deletion of names will not be applicable in case of death of a Unit holder (in respect of joint holdings) as this is treated as transmission (transfer of units by operation of law) of Units and not transfer. Units of the Scheme held in demat form shall be freely transferable (subject to lock-in period, if any) and will be subject to transmission facility in accordance with the provisions of the SEBI (Depositories and Participants) Regulations, 1996 as amended from time to time.</p> <p>Also, when a person becomes a holder of the units by operation of law or upon enforcement of pledge, then the AMC shall, subject to production/submission of such satisfactory evidence, which in its opinion is sufficient, effect the transfer, if the intended transferee is otherwise eligible to hold the units.</p> <p>RIGHT TO RESTRICT REDEMPTION AND / OR SUSPEND REDEMPTION OF THE UNITS:</p> <p>The Fund at its sole discretion reserves the right to restrict Redemption (including switchout) of the Units (including Plan /Option) of the Scheme of the Fund upon occurrence of the below mentioned events for a period not exceeding ten (10) working days in any ninety (90) days period subject to approval of the Board of Directors of the AMC and the Trustee. The restriction on Redemption (including switch-out) shall be applicable where the Redemption (including switch-out) request is for a value above Rs. 2,00,000/- (Rupees Two Lakhs). Further, no restriction shall be applicable to the Redemption / switch-out request upto Rs. 2,00,000/- (Rupees Two Lakhs). It is further clarified that, in case of redemption request beyond Rs. 2,00,000/- (Rupees Two Lakhs), no restriction shall be applicable on first Rs. 2,00,000/- (Rupees Two Lakhs). The Trustee / AMC reserves the right to restrict Redemption or suspend Redemption of the Units in the Scheme of the Fund on account of circumstances leading to a systemic crisis or event(s) that severely constrict market liquidity or the efficient functioning of the markets. A list of such circumstances under which</p>

	<p>the restriction on Redemption or suspension of Redemption of the Units in the Scheme of the Fund may be imposed are as follows:</p> <ol style="list-style-type: none"> 1. Liquidity issues- when market at large becomes illiquid affecting almost all securities rather than any issuer specific security; or 2. Market failures / Exchange closures; or 3. Operational issues; or 4. If so directed by SEBI. <p>It is clarified that since the occurrence of the abovementioned eventualities have the ability to impact the overall market and liquidity situation, the same may result in exceptionally large number of Redemption requests being made and in such a situation the indicative timelines (i.e. within 3-4 Business Days) mentioned by the Fund in the scheme offering documents, for processing of requests for Redemption may not be applicable.</p> <p>Please refer to paragraphs on ‘Transfer and Transmission of units, Right to limit Redemption, Suspension of Purchase and/ or Redemption of Units and Pledge of Units’ in the SAI for further details.</p>
<p>Cut off timing for subscriptions/ redemptions/ switches</p> <p>This is the time before which your application (complete in all respects) should reach the official points of acceptance.</p>	<p>For Purchase (including switch-in) of any amount:</p> <ul style="list-style-type: none"> ● In respect of valid applications received upto 3.00 p.m. and where the funds for the entire amount are available for utilization before the cut-off time i.e. credited to the bank account of the Scheme before the cut-off time - the closing NAV of the day shall be applicable. ● In respect of valid applications received after 3.00 p.m. and where the funds for the entire amount are credited to the bank account of the Scheme either on the same day or before the cut-off time of the next Business Day i.e. available for utilization before the cut-off time of the next Business Day - the closing NAV of the next Business Day shall be applicable. ● Irrespective of the time of receipt of application, where the funds for the entire amount are credited to the bank account of the Scheme before the cut-off time on any subsequent Business Day i.e. available for utilization before the cut-off time on any subsequent Business Day - the closing NAV of such subsequent Business Day shall be applicable. <p>For Switch-ins of any amount:</p> <p>For determining the applicable NAV, the following shall be ensured:</p> <ul style="list-style-type: none"> ● Application for switch-in is received before the applicable cut-off time.

- Funds for the entire amount of subscription / purchase as per the switch-in request are credited to the bank account of the Scheme before the cut-off time.

- The funds are available for utilization before the cut-off time.

- In case of „switch“ transactions from one scheme to another, the allocation shall be in line with redemption payouts.

For investments through systematic investment routes such as Systematic Investment Plans (SIP), Systematic Transfer Plans (STP), etc. the units will be allotted as per the closing NAV of the day on which the funds are available for utilization by the Target Scheme irrespective of the instalment date of the SIP, STP or record date of IDCW etc.”

Note: For Purchase / switch in applications received on Thursday, December 31, 2020 after cut-off timings for less than ` 2 lakhs, the NAV shall be allotted as per above revised rule i.e. based on availability of funds for utilization. Thus, for e.g. if funds are credited to the Scheme after cut-off timings on Friday, January 1, 2021, the applicable NAV shall be of Monday, January 04, 2021.

The Trustee reserves the right to change / modify the aforesaid requirements at a later date in line with SEBI directives from time to time.

For allotment of units, it shall be ensured that:

a) For all valid applications of investment amount less than Rs. 2 Lakh the application is received before the applicable cut-off time;

b) For all valid applications of investment amount equal to or more than Rs. 2 Lakh

i. the application is received before the applicable cut-off time,

ii. Funds for the entire amount of subscription / purchase as per the application / switch-in request are credited to the bank account of the Scheme before the cut-off time,

iii. The funds are available for utilisation before the cut-off time without availing any credit facility whether intra-day or otherwise, by the Scheme.

Redemptions including Switch - outs:

The following cut-off timings shall be observed by the Mutual Fund in respect of Repurchase of Units:

1. Where the application received upto 3.00 pm – closing NAV of the day of receipt of application; and

2. An application received after 3.00 pm – closing NAV of the next Business Day.

C. Transparency/NAV Disclosure (Details with reference to information given in Section I)

The AMC will calculate the NAVs for all the Business Days. The NAV of the Scheme shall be published at least in two daily newspapers for all Business Days (alongwith sale and repurchase prices). The Asset Management Company (“AMC”) shall update the NAVs on the website of Association of Mutual Funds in India (“AMFI”) (www.amfiindia.com) by 9.00 p.m. every Business Day. The NAV shall also be available on AMC website (www.growwmf.in). If the NAVs are not available before the commencement of business hours on the following day due to any reason, the Mutual Fund shall issue a press release giving reasons and explaining when the Mutual Fund would be able to publish the NAV.

The Mutual Fund/AMC shall disclose portfolio of the scheme as on the last day of the month on its website www.growwmf.in and on the website of the AMFI on or before the 10th day of the succeeding month.

The Mutual Fund and AMC shall publish the Scheme Portfolio within one month from the close of each half year (i.e. 31st March and 30th September), by way of an advertisement & also disclosing the hosting of Unaudited Scheme Financial Results at least, in one National English daily and one regional newspaper in the language of the region where the head office of the Mutual Fund is located.

It will also be displayed on the website of the AMC (www.growwmf.in) and AMFI (www.amfiindia.com).

The Mutual Fund and AMC will make available the Annual Report of the Scheme within four months of the end of the financial year.

D. **Transaction Charges**

Transaction charges shall not be deducted for:

- Purchases /subscriptions for an amount less than Rs. 10,000/-; and
- Transactions other than purchases/ subscriptions relating to new inflows such as Switches, etc.
- Any purchase/subscription made directly with the Fund (i.e. not through any distributor).
- Transactions carried out through the stock exchange platforms.

Applicability of Stamp Duty : Pursuant to Notification No. S. O. 1226 (E) and G.S.R 226(E) dated March 30, 2020 issued by Department of Revenue, Ministry of Finance, Government of India, read with Part I of Chapter IV of Notification dated February 21, 2019 issued by Legislative Department, Ministry of Law and Justice, Government of India on the Finance Act, 2019, a stamp duty @ 0.005% of the transaction value shall be levied on applicable mutual fund transactions. Accordingly, pursuant to levy of stamp duty, the number of units allotted on purchase transactions to the unitholders would be reduced to that extent. The stamp duty will be deducted from the net investment amount i.e. gross investment amount less any other deduction like transaction charge. Units will be created only for the balance amount i.e. Net Investment Amount as reduced by the stamp duty. The stamp duty will be computed at the rate of 0.005% on an inclusive method basis.

For instance: If the transaction amount is Rs. 100100/- and the transaction charge is Rs. 100, the stamp duty will be calculated as follows: $((\text{Transaction Amount} - \text{Transaction Charge}) * 0.005\%) = \text{Rs.5}$. If

the applicable Net Asset Value (NAV) is Rs. 10 per unit, then units allotted will be calculated as follows:
 (Transaction Amount – Transaction Charge – Stamp Duty)/ Applicable NAV = 9,999.50 units.
