| | Minimum | Maximum | |
| Equity and Equity related securities of | 95% | 100% | |
| companies constituting the underlying | | | |
| index (NIFTY Smallcap 250 Index-TRI) | | | |
| Debt & Money Market Instruments / and | 0% | 5% | |
| Units of debt schemes# / Units of Debt | | | |
| ETFs* | | | |

*or similar instruments as may be permitted by RBI/ SEBI, subject to requisite approvals from SEBI / RBI, if needed. The Scheme may take an exposure to equity derivatives of constituents of the underlying index for short duration when securities of the Index are unavailable, insufficient or for rebalancing at the time of change in Index or in case of corporate actions or for hedging purposes, as permitted by SEBI/RBI. The Exposure to derivative instruments shall not exceed 50% of the total Net Assets of Scheme. The Fund shall not write options or purchase instruments with embedded written options. When constituent's securities of underlying Index are available again, derivative positions in these securities would be unwound. Subject to the SEBI Regulations as applicable from time to time, the Scheme may, if the Trustees permit, participate in securities lending. The maximum exposure of the Scheme to a single intermediary in the stock lending programme at any point of time would be limited to 50% of the market value of its equity portfolio or up to such limits as may be specified by SEBI. The Scheme will not lend more than 75% of its corpus. The cumulative gross exposure through equity, debt, derivative positions, other permitted securities/assets and such other securities/assets as may be permitted by the Board from time to time will not exceed 100% of the net assets of the scheme, subject to approval if any.

The Asset Allocation portion shall also include subscription and redemption cash flow which may be undeployed due to various reasons (dividend from underlying securities, rebalancing or balances for running cost of the scheme, residual amount due to execution on rounding off etc). Subject to the SEBI Regulations as applicable from time to time

#Money Market instruments includes commercial papers, commercial bills, treasury bills, Government securities, call or notice money, certificate of deposit, usance bills, and any other like instruments as specified by the Reserve Bank of India from time to time.

The scheme may invest upto 5% of net assets in Liquid & Overnight scheme of the Groww Mutual Fund or any other Mutual Fund without charging any fees, provided that aggregate inter scheme investment made by all schemes under the management of Groww Asset Management Limited or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of Groww Mutual Fund

As per SEBI Letter dated 3rd November 2021 Cash and cash equivalents having residual maturity of less than 91 Days are not considered for the purpose of calculating gross exposure limit.

The Scheme shall adhere to the following limits should it engage in Stock Lending.

The notional exposure of the Scheme in Derivative instruments shall be restricted to 50% of the net assets of the Scheme. This will also include various derivative and hedging products to reduce the risk of the portfolio, in the manner permitted by SEBI from time to time. Index futures/options are meant to be an efficient way of buying/selling an index compared to buying/selling a portfolio of physical shares representing an index for ease of execution and settlement. It can help in reducing the Tracking Error in the Scheme. Index futures/options may avoid the need for trading in individual components of the index, which may not be possible at times, keeping in mind the circuit filter system and the liquidity in some of the individual stocks. Index futures/options can also be helpful in reducing the transaction costs and the processing costs on account of ease of execution of one trade compared to several trades of shares comprising the underlying index and will be easy to settle compared to a physical portfolio of shares representing the underlying index. In case of investments in index futures/options, the risk/reward would be the same as investments in a portfolio of shares representing an index. However, there may be a cost attached to buying an index future/option.

The cumulative gross exposure to equity, derivatives, debt instruments and money market instruments will not exceed 100% of the net assets of the scheme.

Debt securities include, but are not limited to, Debt securities of the Government of India, State and Local Governments, Government Agencies, Statutory Bodies, Public Sector Undertakings, Public Sector Banks or Private Sector Banks or any other Banks, Financial Institutions, Development Financial Institutions, and Corporate Entities, collateralized debt securities or any other instruments as may be prevailing and permissible under the Regulations from time to time). Pending deployment of funds of a Scheme in securities in terms of investment objectives of the Scheme a mutual fund can invest the funds of the Scheme in short term deposits of scheduled commercial banks in terms of paragraph 12.6 of SEBI Master circular for Mutual Funds dated June 27, 2024 . Further, the Scheme may for meeting liquidity requirements invest in units of money market/liquid schemes of Groww Mutual Fund and/or any other mutual fund provided that aggregate inter-scheme investment made by all schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund. The AMC shall not charge any investment management fees with respect to such investment. In case of any deviation from the above asset allocation, the portfolio shall be rebalanced within 7 Days to ensure adherence to the above norms. In the event of involuntary corporate action, the Scheme shall dispose of the security not forming part of the underlying index within 7 Days from the date of allotment/listing. In case of change in constituents of the index due to periodic review, the portfolio of the scheme shall be rebalanced within 7 calendar days. Any transactions undertaken in the scheme portfolio in order to meet the redemption and subscription obligations shall be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.

Indicative Table (Actual instrument/percentages may vary subject to applicable SEBI circulars)

Change in Asset Allocation Pattern

The Scheme in general, will hold all the securities that constitute the underlying Index in the same proportion as the index. Expectation is that, over a period of time, the tracking error of the Scheme relative to the performance of the Underlying Index will be relatively low. The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal market circumstances such tracking error is not expected to exceed 2% p.a for daily 12 month rolling return. However, in case of events like, IDCW received from underlying securities, and market volatility during rebalancing of the portfolio following the rebalancing of the Underlying Index, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. Since the Scheme is an index fund, it will endeavour that at no point of time the Scheme will deviate from the index.

Subject to SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages can vary substantially depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unit holders.

Short term defensive consideration:

As per paragraph 2.92 of SEBI Master circular for Mutual Funds dated June 27, 2024 and in line with SEBI clarification letter dated June 29, 2022, such changes in the investment pattern will be for short term and for defensive consideration only. The Scheme shall rebalance the portfolio in case of any deviation to the asset allocation. Such rebalancing shall be done within 7 days from the date of occurrence of deviation. Where the portfolio is not rebalanced within 7 Days, justification for the same including details of efforts taken to rebalance the portfolio shall be placed before the Investment

Committee and reasons for the same shall be recorded in writing. The Investment committee shall then decide on the course of action. However, at all times the portfolio will adhere to the overall investment objectives of the Schemes.

Portfolio rebalancing in case of passive breach:

In line with paragraph 2.92 of SEBI Master circular for Mutual Funds dated June 27, 2024, in case of change in constituents of the index due to periodic review, the portfolio of Scheme shall be rebalanced within 7 calendar days. Further, any transactions undertaken in the portfolio of Index Schemes in order to meet the redemption and subscription obligations shall be done ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.

However, at all times the portfolio will adhere to the overall investment objectives of the Scheme. However the same will be rectified at the earliest opportunity as may be available, but not later than 7 days, to minimize the tracking error.

Provided further and subject to the above, any change in the asset allocation affecting the investment profile of the Scheme shall be effected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the SEBI Regulations

B. WHERE WILL THE SCHEME INVEST?

The Scheme shall invest in the following securities as per the limits specified in the asset allocation table of Scheme, subject to SEBI (MF) Regulations.

Equity and Equity Related Instruments:

The Scheme would invest in stocks constituting the Nifty Smallcap 250 Index - TRI in the similar proportion (weightage) as in the Index and endeavor to track the benchmark index. The Scheme may take derivatives position in circumstances as mentioned under the Section "HOW WILL THE SCHEME ALLOCATE ITS ASSETS?" upto 50% of the net assets of the Scheme.

Debt & Money Market Instruments: The Scheme will invest in debt and money market instruments. It retains the flexibility to invest across all the securities in the debt and money markets.

Debt securities and Money Market Instruments will include but will not be limited to:

- A. Securities created and issued by the Central and State Governments as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills).
- B. Securities guaranteed by the Central and State Governments (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills).
- C. Debt securities of domestic Government agencies and statutory bodies, which may or may not carry a Central/State Government guarantee.
- D. Corporate debt (of both public and private sector undertakings). Money market instruments permitted by SEBI/RBI or in alternative investment for the call money market as may be provided by the RBI to meet the liquidity requirements.
- E. Certificate of Deposits (CDs).
- F. Commercial Paper (CPs). A part of the net assets may be invested in the Triparty Repo Dealing System (TREPS) or in an alternative investment as may be provided by RBI to meet the liquidity requirements.
- G. The non-convertible part of convertible securities.
- H. Any other domestic fixed income securities as permitted by SEBI / RBI from time to time subject to necessary approvals from SEBI, if any.
- I. Any other instruments/securities, which in the opinion of the fund manager would suit the investment objective of the scheme subject to compliance with extant Regulations.

The Investment Manager will invest only in those debt securities that are rated investment grade by a domestic credit rating agency authorized to carry out such activity, such as CRISIL, ICRA, CARE, FITCH, etc. The securities may be acquired through Initial Public Offerings (IPOs), secondary market operations, private placement, rights offer or negotiated deals.

Transfer of investments from one scheme to another scheme in the same Mutual Fund, shall be allowed, in lines with paragraph 12.30 of SEBI Master circular for Mutual Funds dated June 27, 2024.

Investment in Derivatives: The Scheme may take derivatives positions based on the opportunities available subject to the guidelines provided by SEBI from time to time and in line with the overall investment objective of the Scheme. Derivatives can be traded over the exchange or can be structured between two counterparties. Those transacted over the exchange are called Exchange Traded derivatives whereas the other category is referred to as OTC (Over the Counter) derivatives.

Options: An option is a contract which provides the buyer of the option (also called the holder) the right, without the obligation, to buy or sell a specified asset at an agreed price on or up o a particular date. For acquiring this right the buyer has to pay a premium to the seller. The seller on the other hand has the obligation to buy or sell that specified asset at the agreed price. The premium is determined by considering a number of factors such as the underlying asset's market price, the number of days to expiration, strike price of the option, the volatility of the underlying asset and the risk-less rate of return. The strike price, the expiration date and the market lots are specified by the exchanges. An option contract may be of two kinds, viz., a call option or a put option. An option that provides the buyer the right to buy is a call option. The buyer of the call option (known as the holder of the option) can call upon the seller of the option (known as writer of the option) and buy from him the underlying asset at the agreed price at any time on or before the expiry date of the option. The seller of the option has to fulfil the obligation on exercise of the option. The right to sell is called a put option. Here, the buyer of the option can exercise his right to sell the underlying asset to the seller of the option at the agreed price. Options are of two types: European and American. In a European option, the holder of the option can only exercise his right on the date of expiration. In an American option, he can exercise this right anytime between the purchase date and the expiration date.

Index Future

The Mutual Fund's position limit in all index futures contracts on a particular underlying index shall be as per the regulations.

This limit would be applicable on open positions in all futures contracts on a particular underlying index.

C. WHAT ARE THE INVESTMENT STRATEGIES?

Equity

The Scheme will be managed passively with investments in stocks in a proportion to the weights of these stocks in the Nifty Smallcap 250 Index - TRI. The investment strategy would revolve around reducing the tracking error to the least possible through rebalancing of the portfolio, considering the change in weights of stocks in the index as well as the incremental collections/redemptions from the Scheme.

The designated Fund manager of the scheme will be responsible for taking the day-to-day investment decisions and will inter-alia be responsible for asset allocation, security selection and timing of investment decisions.

The Scheme shall be benchmarked to Nifty Smallcap 250 Index - TRI.

Since the scheme is an index fund, the compositions of the benchmark are such that it is most suited for comparing performance of the Scheme.

A small portion of the net assets will be held as cash or will be invested in debt and money market instruments permitted by SEBI/RBI including TREPS or in alternative investment for the TREPS as may be provided by the RBI, to meet the liquidity requirements under the Scheme.

The AMC may approach rating agencies such as CRISIL, ICRA, etc for ratings of the scheme.

The Scheme may invest in other Scheme managed by the AMC or in the Schemes of any other Mutual Funds, provided it is in conformity to the investment objectives of the Scheme and in terms of the prevailing Regulations. As per the Regulations, no investment management fees will be charged for such investments and the aggregate inter-Scheme investment made by all Schemes of Groww Mutual Fund or in the Schemes under the management of other asset management companies shall not exceed 5% of the net asset value of the Groww Mutual Fund. The limit however does not apply to any Fund of Funds scheme. For the present, the Scheme does not intend to enter into underwriting obligations. However, if the Scheme does enter into an underwriting agreement, it would do so after complying with the Regulations.

PORTFOLIO TURNOVER

Portfolio turnover in the scheme will be a function of market opportunities. It is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. The AMC will endeavor to optimize portfolio turnover to optimize risk adjusted return keeping in mind the cost associated with it. A high portfolio turnover rate is not necessarily a drag on portfolio performance and may be representative of investment opportunities that exist in the market.

Generally, turnover will depend upon the extent of purchase and redemption of units and the need to rebalance the portfolio on account of change in the composition, if any, and corporate actions of securities included in Nifty Smallcap 250 Index -TRI. However, it will be the endeavor of the Fund Manager to maintain an optimal portfolio turnover rate commensurate with the investment objective of the Scheme and the purchase/ redemption transactions on an ongoing basis in the Scheme.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

The performance of the Scheme shall be benchmarked to Nifty Smallcap 250 Index - TRI.

Since the scheme is an index fund, the compositions are such that it is most suited for comparing performance of the Scheme.

PART III- OTHER DETAILS

A. COMPUTATION OF NAV

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date. The Fund shall value its investments according to the valuation norms, as specified in Schedule VIII of the Regulations, or such norms as may be prescribed by SEBI from time to time.

All expenses and incomes accrued up to the valuation date shall be considered for computation of NAV. For this purpose, major expenses like management fees and other periodic expenses would be accrued on a day to day basis. The minor expenses and income will be accrued on a periodic basis, provided the nondaily accrual does not affect the NAV calculations by more than 1%.

Any changes in securities and in the number of units be recorded in the books not later than the first valuation date following the date of transaction. If this is not possible given the frequency of the Net Asset Value disclosure, the recording may be delayed up to a period of seven days following the date of the transaction, provided that as a result of the non-recording, the Net Asset Value calculations shall not be affected by more than 1%.

In case the Net Asset Value of a scheme differs by more than 1%, due to non - recording of the transactions, the investors or scheme/s as the case may be, shall be paid the difference in amount as follows:-

- (i) If the investors are allotted units at a price higher than Net Asset Value or are given a price lower than Net Asset Value at the time of sale of their units, they shall be paid the difference in amount by the scheme.
- (ii) If the investors are charged lower Net Asset Value at the time of purchase of their units or are given higher Net Asset Value at the time of sale of their units, asset management company shall pay the difference in amount to the scheme. The asset management company may recover the difference from the investors.

NAV of units under the Scheme shall be calculated as shown below:

NAV (Rs.) =

| Market or Fair Value of | + | Current Assets | - | Current Liabilities and Provisions |
|-------------------------|---|-------------------|---|------------------------------------|
| Scheme's investments | | including Accrued | | including accrued expenses |
| | | Income | | |

No. of Units outstanding under Scheme

The NAV of the Scheme will be calculated upto four decimal places and will be declared on each business day. The valuation of the Scheme's assets and calculation of the Scheme's NAV shall be subject to audit on an annual basis and shall be subject to such regulations as may be prescribed by SEBI from time to time.

Illustration:

Assume that the Market or Fair Value of Scheme's investments is Rs. 1,00,00,000; Current asset of the scheme is Rs. 25,00,000; Current Liabilities and Provisions is Rs. 15,00,000 and the No. of Units outstanding under the scheme are 5,00,000. Thus, the NAV will be calculated as:

$NAV = \frac{10000000 + 2500000 - 1500000}{500000} = 22.0000$

Therefore, the NAV of the scheme is Rs. 22.0000

The repurchase price of an open ended scheme shall not be lower than 95% of the NAV.

Further, all the requirements specified in paragraph 3.6 related to "Passive Funds" have been complied with and relevant disclosures stipulated in the said circular has been duly incorporated in the SID.

For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. refer to SAI

The TER of the Direct Plan will be lower to the extent of the above-mentioned distribution expenses/ commission (at least 0.10%) which is charged in the Regular Plan. B. Risk factors

i. Scheme Specific Risk Factors & Special Considerations

- The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which it invests.
- Changes in Government policy in general and changes in tax benefits applicable to mutual funds may impact the returns to Investors in the Scheme.
- Mutual Funds being vehicles of securities investments are subject to market and other risks and there can be no guarantee against loss resulting from investing in the schemes. The various factors which impact the value of scheme investments include but are not limited to fluctuations in the equity and bond markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of securities, tax laws, liquidity of the underlying instruments, settlements periods, trading volumes etc. and securities investments are subject to market risks and there is no assurance or guarantee that the objectives of the Scheme will be achieved.
- From time to time and subject to the Regulations, the Sponsors, the Mutual Funds and investment companies managed by them, their affiliates, their associate companies, subsidiaries of the Sponsors, and the AMC may invest either directly or indirectly in the Scheme. The funds managed by these affiliates, associates, the Sponsors, subsidiaries of the Sponsors and /or the AMC may acquire a substantial portion of the Scheme's Units and collectively constitute a major investor in the Scheme. Accordingly, redemption of Units held by such funds, affiliates/associates and Sponsors might have an adverse impact on the Units of the Scheme because the timing of such redemption may impact the ability of other Unitholders to redeem their Units. Further, as per the Regulation, in case the AMC invests in any of the schemes managed by it, it shall not be entitled to charge any fees on such investments.
- Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.
 - The Scheme attempts to track the respective indices and it would invest in the securities included in its underlying indices regardless of their investment merit. The Scheme may be affected by a general decline in the Indian markets.
 - Performance of the Nifty Smallcap 250 Index TRI will have a direct bearing on the performance
 of the scheme. In the event the Nifty Smallcap 250 Index TRI is dissolved or is withdrawn by
 NSE Indices Limited (NSEIL) or is not published due to any reason whatsoever, the Trustee
 reserves the right to modify the respective scheme so as track a different and suitable index or to
 suspend tracking the Nifty Smallcap 250 Index TRI till such time it is dissolved / withdrawn or
 not published and appropriate intimation will be sent to the Unit holders of the scheme. In such a
 case, the investment pattern will be modified suitably to match the composition of the securities
 that are included in the new index to be tracked and the scheme will be subject to tracking errors
 during the intervening period.
 - Tracking errors are inherent in any index fund and such errors may cause the scheme to generate returns which are not in line with the performance of the Nifty Smallcap 250 Index TRI or one or

more securities covered by / included in the Nifty Smallcap 250 Index - TRI and may arise from a variety of factors including but not limited to, any delay in the purchase or sale of shares due to illiquidity in the market, settlement and realisation of sales proceeds, delay in credit of securities or in receipt and consequent reinvestment of Income Distribution cum Capital Withdrawal, etc.

- The Indices reflect the prices of securities at a point in time, which is the price at close of business day on National Stock Exchange of India Limited (NSE). The scheme however, may trade these securities at different points in time during the trading session and therefore the prices at which the scheme trade may not be identical to the closing price of each scrip on that day on the NSE. In addition, the scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance, from NSE closing prices.
- NSEIL undertakes periodic reviews of the securities that are represented in the Nifty Smallcap 250 Index - TRI and from time to time may exclude existing securities or include new ones. In such an event, the scheme will endeavor to reallocate its portfolio to mirror the changes. However, the reallocation process may not occur instantaneously and permit precise mirroring of the Nifty Smallcap 250 Index - TRI during this period.
- The potential of trades to fail may result in the scheme not having acquired the security at the price necessary to mirror the index.
- Transaction and other expenses, such as but not limited to brokerage, custody, trustee and investment management fees.
- Being an open-ended scheme, the scheme may hold appropriate levels of cash or cash equivalents to meet ongoing redemptions. The scheme may not be able to acquire or sell the desired number of securities due to conditions prevailing in the securities market, such as, but not restricted to: circuit filters in the securities, liquidity and volatility in security prices.
- Due to the reasons mentioned above and other reasons that may arise, it is expected that the scheme may have a tracking error not exceeding 2% per annum. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMC, the tracking error may exceed 2% and the same will be intimated to the Trustees with corrective actions taken by the AMC, if any.
- In case of investments in derivatives like index futures, the risk reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future. Further, there could be an element of settlement risk, which could be different from the risk in settling physical shares and there is a risk attached to the liquidity and the depth of the index futures market as it is relatively new market.

Risk specific to investing in securities forming part of Nifty Smallcap 250 Index - TRI and risks:-

Groww Nifty Smallcap 250 Index Fund is passively a managed Index Scheme i.e. the amount collected under the scheme is invested in securities of companies comprising the underlying index in the same weightages as they have in the underlying index. The composition of the underlying index is subject to changes that may be affected periodically by the Index Service Provider. Performance of the underlying index will have a direct bearing on the performance of the scheme. The extent of the Tracking error may have an impact on the performance of the scheme.

The index methodology may be changed by the index provider in future due to several externalities. The change in the methodology of the index may affect the future portfolio and/or performance of the index and the scheme.

Risks associated with investing in Small cap stocks

The scheme would predominantly invest in Equity and Equity related instruments pertaining to Small cap companies in line with the Investment objective of the scheme. While investing in Small cap stocks give one an opportunity to go beyond the usual large blue chip stocks and present possible higher capital appreciation, it is important to note that Small caps can be riskier and more volatile on

a relative basis. Therefore, the risk levels of investing in Smallcap stocks are more than investing in stocks of large well-established companies. And it is important to note that generally, no one class consistently outperforms the others. Smallcap stocks carries higher liquidity risk as they are less extensively researched compared to largecap stocks. This may lead to abnormal illiquidity and consequent higher impact cost.

Risks associated with Capital Markets or Equity Markets, (i.e. Markets in which Equity Shares or Equity oriented instruments are issued and traded)

Investments in the equity shares of the Companies constituting the Underlying Index are subject to price fluctuation on daily basis. The volatility in the value of equity is due to various micro and macroeconomic factors like economic and political developments, changes in interest rates, etc. affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme.

The Scheme would invest in the securities comprising the Underlying Index in the same proportion as the securities have in the Index. Hence, the risk associated with the corresponding Underlying Index would be applicable to the Scheme. The Underlying Index has its own criteria and policy for inclusion/exclusion of securities from the Index, its maintenance thereof and effecting corporate actions. The Fund would invest in the securities of the Index regardless of investment merit, research, without taking a view of the market and without adopting any defensive measures. The Fund would not select securities in which it wants to invest but is guided by the Underlying Index. As such the Scheme is not actively managed but is passively managed.

While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.

Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The NAV of the Scheme can go up and down because of various factors that affect the capital markets in general. Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. Within the Regulatory limits, the AMC may choose to invest in unlisted securities that offer attractive yields. This may however increase the risk of the portfolio.

Price fluctuations and Volatility: Mutual Funds, like securities investments, are subject to market and other risks and there can be neither a guarantee against loss resulting from an investment in the Scheme nor any assurance that the objective of the Scheme will be achieved. The NAV of the Units issued under the Scheme can go up or down because of various factors that affect the capital market in general, such as, but not limited to, changes in interest rates, government policy and volatility in the capital markets. Pressure on the exchange rate of the Rupee may also affect security prices.

• Concentration / Sector Risk: When a Mutual Fund Scheme, by mandate, restricts its investments only to a particular sector; there arises a risk called concentration risk. If the sector, for any reason, fails to perform, the portfolio value will plummet and the Investment Manager will not be able to diversify the investment in any other sector. Investments under this scheme will be in equity or equity related stocks spanning across the selected theme. Hence the concentration risks could be high.

• Liquidity Risks: Liquidity in Equity investments may be affected by trading volumes, settlement periods and transfer procedures. These factors may also affect the Scheme's ability to make intended purchases/sales, cause potential losses to the Scheme and result in the Scheme missing certain investment opportunities. These factors can also affect the time taken by GMF for redemption of Units, which could be significant in the event of receipt of a very large number of redemption requests or very large value redemption requests. In view of this, redemption may be limited or suspended after approval from the Boards of Directors of the AMC and the Trustee, under certain circumstances as described in the Statement of Additional Information

Risk associated with Debt & Money Market Instruments

- **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.
- Credit Risk: In simple terms this risk means that the issuer of a debenture/bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme(s) has invested in Government Securities, there is no credit risk to that extent. Different types of securities in which the scheme(s) would invest as given in the scheme information document carry different levels and types of risk. Accordingly, the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.
- **Re-investment Risk:** Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- **Basis Risk (Interest rate movement):** During the life of a floating rate security or a swap, the underlying benchmark index may become less active and may not capture the actual movement in interest rates or at times the benchmark may cease to exist. These types of events may result in loss of value in the portfolio.
- **Spread Risk:** In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. However, depending upon the market conditions, the spreads may move adversely or favourably leading to fluctuation in the NAV.
- Liquidity Risk: Due to the evolving nature of the floating rate market, there may be an increased risk of liquidity risk in the portfolio from time to time.
- Other Risk: In case of downward movement of interest rates, floating rate debt instruments will give a lower return than fixed rate debt instruments.

Risks associated with investing in TREPS Segments

The mutual fund is a member of securities and TREPS segment of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in TREPS segments are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time. In the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb

settlement/default losses of another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund allocated to the scheme on a pro-rata basis.

Risk associated with securities lending

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. In case the Scheme undertakes stock lending under the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Scheme should note that there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

Risk factors with investing in Derivatives

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. As and when the Scheme trade in the derivatives market there are risk factors and issues concerning the use of derivatives that investors should understand.

Derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract.

The specific risk factors arising out of a derivative strategy used by the Fund Manager may be as below:

- Lack of opportunity available in the market;
- The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Risk factors associated with Creation of Segregated Portfolio

- 1. Investor holding units of Segregated Portfolio may not be able to liquidate their holding till recovery of money from the issuer.
- 2. Security comprising Segregated Portfolio may not realise any value.
- 3. Listing of units of Segregated Portfolio on recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

C. RISK MITIGATION STRATEGIES

Risk Control/ Mitigation measures:

Risk mitigation measures for portfolio volatility and portfolio concentration: Index Fund being a passive investment carries lesser risk as compared to active fund management. The portfolio follows the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking error. Thus there is no additional element of volatility or stock concentration on account of fund manager decisions. The Risk Mitigation strategy revolves around minimizing the Tracking error to the least possible through regular rebalancing of the portfolio, taking into account the change in weights of stocks in the Underlying Index as well as the incremental collections into / redemptions from the Scheme.

Risk mitigation measures for managing liquidity: As per data from NSE more than half of market liquidity remains in the index. Therefore, the scheme does not envisage liquidity issues. The scheme may take exposure to equity derivatives of the index itself or its constituent stocks, when equity shares are unavailable, insufficient or for rebalancing in case of corporate actions for a temporary period.

While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

Trading through mutual fund trading platforms of BSE and/ or NSE

In respect of transaction in Units of the Scheme through BSE and/ or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by BSE and/ or NSE and their respective clearing corporations on which the Mutual Fund has no control.

Tracking Error and Tracking Difference Risk:

The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the scheme, corporate actions, cash balance, changes to the underlying index, non-availability of issuances, regulatory policies and any such reasons that may affect AMC's ability to achieve close correlation with the underlying index of the scheme. The scheme's returns may therefore deviate from those of its underlying index. "Tracking Difference" is the difference of return between the fund and its respective benchmark. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the underlying index and the NAV of the respective scheme. Tracking difference /Tracking Error may arise including but not limited to the following reasons:

i)Expenditure incurred by the fund.

ii)The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses. The fund may not be invested at all time as it may keep a portion of the funds in cash to meet redemptions or for corporate actions.

iii) Securities trading may halt temporarily due to circuit filters.

iv) Corporate actions such as debenture or warrant conversion, merger, change in constituents etc.

v)Disinvestments to meet redemptions, recurring expenses, etc.

vi) Execution of large buy / sell orders

- vii) Transaction cost (including taxes and insurance premium) and recurring expenses
- viii) Realisation of Unit holders' funds.

It will be the endeavour of the fund manager to keep the tracking error as low as possible. Under normal circumstances, such tracking error is not expected to exceed 2% per annum. However, in certain events like market volatility during rebalancing of the portfolio following the rebalancing of the underlying index, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any. The Fund existence for a period of less than one year, the annualized standard deviation shall be calculated based on available data.

Risk factor associated with investment in Units of Mutual Funds:

Mutual funds being vehicles of securities investments are subject to market and other risks and there can be no guarantee against loss resulting from investing in the Scheme. The various factors which impact the value of the Schemes' investments include, but are not limited to, fluctuations in the bond markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of the securities, tax laws, liquidity of the underlying instruments, settlement periods, trading volumes, suspension of 12 subscription/redemptions of the scheme, change in fundamental attribute etc. The Scheme may invest in schemes of Mutual Funds. Hence, scheme specific risk factors of each such mutual fund schemes will be applicable to the Scheme portfolio.

Accordingly, pursuant to levy of stamp duty, the number of units allotted on purchase transactions to the unitholders would be reduced to that extent. The stamp duty will be deducted from the net investment amount i.e. gross investment amount less any other deduction like transaction charge. For instance: If the transaction amount is Rs. 100100 /- and the transaction charge is Rs. 100, the stamp duty will be calculated as follows: ((Transaction Amount – Transaction Charge) *0.005%) = Rs.5. If the applicable Net Asset Value (NAV) is Rs. 10 per unit, then units allotted will be calculated as follows: (Transaction Amount – Transaction Charge – Stamp Duty)/ Applicable NAV = 9,999.50 units.
