Annexure 1

Equity derivatives of underlying securities forming part of the index may also be available as an investment option in case the underlying security is not available for purchase.

Calculation of cumulative gross exposure - The cumulative gross exposure to equity, derivatives, debt instruments and money market instruments will not exceed 100% of the net assets of the scheme in accordance with Clause 12.24 of SEBI Master Circular SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024.

Numerical example of risk involved –

- Using Index Futures to increase percentage investment in equities

This strategy will be used for the purpose of generating returns on idle cash, pending its investment in equities. The Scheme is subject to daily flows. There may be a time lag between the inflow of funds and their deployment in stocks. If so desired, the scheme would be able to take immediate exposure to equities via index futures. The position in index futures may be reversed in a phased manner, as the funds are deployed in the equity markets.

Example:

The scheme has a corpus of Rs. 50 crore and there is an inflow of Rs. 5 crore in a day. The AMC may buy index futures contracts of a value of Rs. 5 crore. Later as the money is deployed in the underlying equities, the value of the index futures contracts can be suitably reduced.

Portfolio	Event	Equity Portfolio gain/(Loss) (Rs. in crore)	Derivative gain/(Loss) (Rs. in crore)	Total Portfolio gain/(Loss) (Rs. in crore)
Rs. 50 Crore equity exposure	10% rise in equity prices	5	Nil	5
Rs. 50 Crore equity exposure + Rs. 5 Crore long position index futures	10% rise in equity prices	5	0.5	5.5

Portfolio	Event	Equity Portfolio gain/(Loss) (Rs. in crore)	Derivative gain/(Loss) (Rs. in crore)	Total Portfolio gain/(Loss) (Rs. in crore)
Rs. 50 Crore equity exposure	10% fall in equity prices	(5)	Nil	(5)
Rs. 50 Crore equity	10% fall in equity prices	(5)	(0.5)	(5.5)

exposure + Rs. 5 Crore long position index futures

Risks associated with investing in Derivatives:

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. Other risks include risk of mispricing or improper valuation and the inability of the derivative to correlate perfectly with underlying assets, rates and indices, illiquidity risk whereby the Scheme may not be able to sell or purchase derivative quickly enough at a fair price.

Disclosure relating to extent and manner of participation in derivatives to be provided –

Equity Derivatives will be used in the form of Index Options, Index Futures, Stock Options and Stock Futures and other instruments as may be permitted by SEBI.
