The cash and cash equivalents* with residual maturity of less than 91 days may be treated as not creating any exposure.

*SEBI vide letter dated November 03, 2021, has clarified that Cash Equivalent shall consist of Government Securities, T-Bills and Repo on Government Securities. It may be noted that the margin placed for taking exposure to ETCDs are generally lower than the ETCD exposure limit considered for the purposes of monitoring investment limits and therefore, the residual cash (i.e. ETCD exposure less placement of margin towards participation in ETCDs) are placed in cash and cash equivalents in the interest of investors. The said placement in cash and cash equivalents shall not be considered as part of the limit of 0% to 5% allocated towards Debt & Money Market Instruments.

The Scheme does not intend to undertake/ invest/ engage in

- Debt Instruments with special features (AT 1 and AT 2 Bonds)
- Debt Instruments with SO/CE
- ReITs and InVITs
- ADR/ GDR / Foreign Securities
- Structured obligation/Credit enhancements
- Securitized Debt
- Repo in Corporate Debt Securities

Investments in Scheme by AMC, Sponsor & Associates

Subject to the Regulations, the AMC and investment companies managed by the Sponsor(s), their associate companies and subsidiaries may invest either directly or indirectly, in the Scheme during the NFO and/or on ongoing basis. However, the AMC shall not charge any investment management fee on such investment in the Scheme, in accordance with sub-regulation 3 of Regulation 24 of the Regulations and shall charge fees on such amounts in future only if the SEBI Regulations so permit. The associates, the Sponsor, subsidiaries of the Sponsor and/or the AMC may acquire a substantial portion of the Scheme's units and collectively constitute a major investment in the Schemes. The AMC reserves the right to invest its own funds in the Scheme as may be decided by the AMC from time to time and required by applicable regulations and also in accordance with Clause 6.11 of SEBI Master Circular SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 regarding minimum number of investors in the Scheme. In terms of SEBI notification dated August 5, 2021 and as per Regulation 25, sub-regulation 16A of SEBI (Mutual Funds) Regulations, the asset management company shall invest such amounts in such schemes of the mutual fund, based on the risks associated with the schemes, as may be specified by the Board from time to time. In case of NFO, AMC's investment shall be made during the allotment of units and shall be calculated as a percentage of the final allotment value excluding AMC's investment pursuant to this circular.

Rebalancing of deviation due to short term defensive consideration

In the event of the asset allocation falling outside the limits specified in the asset allocation table, the Fund Manager will rebalance the same within 7 calendar days. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme. Any alteration in the investment pattern will be for short-term defensive consideration as per Clause 1.14.1.2 of SEBI Master Circular SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 the intention being at all times to protect the interests of the Unit Holders.

Tracking error

Tracking error is a measure of the difference in returns from the Scheme and the returns from the underlying benchmark. It is computed as the standard deviation of the difference between the daily returns of the underlying benchmark and the NAV of the Scheme on an annualized basis.

Tracking error could be the result of a variety of factors including but not limited to:

- Payment of scheme expenses.
- Investment in Debt and money market instruments to meet redemption / other liquidity requirements.
- Disinvestments to meet redemptions, recurring expenses etc.
- Execution of large subscription / redemption transaction.
- Levy of margins by exchanges

The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. The annualized standard deviation of the difference in daily returns between the underlying benchmark and the NAV of the scheme based on past one year rolling data shall not exceed 2%.

In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any. Index in existence for a period of less than one year, the annualized standard deviation shall be calculated based on available data. However, Tracking Error of Index is likely to be low as compared to a normal index fund.

There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the underlying benchmark.

B. WHERE WILL THE SCHEME INVEST?

- Silver and / or Silver related instruments, as specified by SEBI from time to time. The physical silver with fineness of 999 parts per thousand (or 99.9% purity) confirming to London Bullion Market Association (LBMA) Good Delivery Standards.
- Exchange Traded Commodity Derivatives (ETCDs) with silver as underlying.
- Investment in Debt & Money Market Instruments: The Scheme may also invest in Money market instruments, in compliance with Regulations to meet liquidity requirements & in conformity with the investment objective/ asset allocation of the Scheme.
- Money Market Instruments includes instruments like Commercial Paper, Certificate of Deposit, Treasury Bills and short-term debt instruments etc. Triparty Repo or any other instrument as may be permitted by SEBI, Reverse Repo in Government Securities and any other Money Market instruments as may be permitted by SEBI/ RBI from time to time.
- The scheme may invest in units of liquid / money market / debt mutual fund / schemes of Groww Mutual Fund or in the Scheme(s) of other mutual funds in conformity with the investment objective/ asset allocation of the Scheme.

(Detailed definition and applicable regulations/guidelines for each instrument is included in Section II)

C. WHAT ARE THE INVESTMENT STRATEGIES?

Groww Silver ETF is a passively managed fund which will employ an investment approach designed to track the performance of domestic price of Silver.

The Scheme will invest at least 95% of its total assets in the Silver or Silver related instruments. It may hold up to 5% of their total assets in debt or money market securities.

The expectation is that, over time, the tracking error of the Scheme relative to the performance of the Underlying benchmark will be relatively low. The Investment Manager would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible.

There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to the performance of the underlying benchmark.

Portfolio Turnover Policy

Portfolio Turnover measures the volume of trading that occurs in a Scheme's portfolio during a given time period. The Scheme is an open-ended Exchange Traded Fund and it is expected that there may be a number of subscriptions and repurchases on a daily basis through Stock Exchange(s) or Market Maker and Large Investors. Generally, turnover will depend upon the extent of purchase and redemption of units and the need to rebalance the portfolio on account of change in the composition, if any, and corporate actions of securities included in Domestic Price of Physical Silver. However, it will be the endeavour of the Fund Manager to maintain an optimal portfolio turnover rate commensurate with the investment objective of the Scheme and the purchase/ redemption transactions on an ongoing basis in the Scheme.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

Benchmark: Domestic Price of Physical Silver (based on London Bullion Market association (LBMA) silver daily spot fixing price)

The Trustees have adopted Domestic Price of Physical Silver (based on London Bullion Market association (LBMA) silver daily spot fixing price) as the benchmark index. Since there is no suitable index available for silver or instruments linked to silver, the performance of the scheme will be benchmarked against the Domestic Price of Physical Silver (based on London Bullion Market association (LBMA) silver daily spot fixing price).

Part III- OTHER DETAILS

A. COMPUTATION OF NAV

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date. The Fund shall value its investments according to the valuation norms, as specified in Schedule VIII of the Regulations, or such norms as may be prescribed by SEBI from time to time.

All expenses and incomes accrued up to the valuation date shall be considered for computation of NAV. For this purpose, major expenses like management fees and other periodic expenses would be accrued on a day to day basis. The minor expenses and income will be accrued on a periodic basis, provided the nondaily accrual does not affect the NAV calculations by more than 1%.

Any changes in securities and in the number of units be recorded in the books not later than the first valuation date following the date of transaction. If this is not possible given the frequency of the Net Asset Value disclosure, the recording may be delayed upto a period of seven days following the date of the transaction, provided that as a result of the non-recording, the Net Asset Value calculations shall not be affected by more than 1%.

In case the Net Asset Value of a scheme differs by more than 1%, due to non - recording of the transactions, the investors or scheme/s as the case may be, shall be paid the difference in amount as follows:-

- (i) If the investors are allotted units at a price higher than Net Asset Value or are given a price lower than Net Asset Value at the time of sale of their units, they shall be paid the difference in amount by the scheme.
- (ii) If the investors are charged lower Net Asset Value at the time of purchase of their units or are given higher Net Asset Value at the time of sale of their units, asset management company shall pay the difference in amount to the scheme. The asset management company may recover the difference from the investors.

NAV of units under the Scheme shall be calculated as shown below:

NAV (Rs.) =

Market or Fair Value of Scheme's investments	+	Current Assets including Accrued Income	-	Current Liabilities and Provisions including accrued expenses
--	---	---	---	---

No. of Units outstanding under Scheme

The NAV of the Scheme will be calculated upto four decimal places and will be declared on each business day. The valuation of the Scheme's assets and calculation of the Scheme's NAV shall be subject to audit on an annual basis and shall be subject to such regulations as may be prescribed by SEBI from time to time.

Illustration:

Assume that the Market or Fair Value of Scheme's investments is Rs. 1,00,00,000; Current asset of the scheme is Rs. 25,00,000; Current Liabilities and Provisions is Rs. 15,00,000 and the No. of Units outstanding under the scheme are 5,00,000. Thus, the NAV will be calculated as:

$$\text{NAV} = \frac{10000000 + 2500000 - 1500000}{500000} = 22.0000$$

Therefore, the NAV of the scheme is Rs. 22.0000

While determining the price of the units, the mutual fund shall ensure that the repurchase price of an open ended scheme is not lower than 95 per cent of the Net Asset Value.

Valuation of the scheme's assets, calculation of the scheme's NAV and the accounting policies & standards will be subject to such norms and guidelines that SEBI may prescribe from time to time. For the detailed

Valuation Policy and the accounting policy of the AMC, please refer the Statement of Additional Information.

For other details such as policies w.r.t computation of NAV, rounding off, procedure in case of delay in disclosure of NAV etc. refer to SAI

Valuation of Physical Silver:

Physical Silver will be valued basis the market price of silver in the domestic market and will be marked to market daily. The market price of silver in the domestic market on any Business Day would be derived as under:

1. The silver held shall be valued, subject to the following:
 - a. it will be adjusted for conversion to metric measures as per standard conversion rate if required;
 - b. further adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and
 - c. it will be further adjusted for the below additions -
 - I. transportation charges and other charges viz. Insurance, fixing charges, etc. that may be incurred in procuring such silver from London to the place where it is physically stored; &
 - II. notional customs duty and applicable taxes and levies that may be incurred to procure silver from London to the place where it is physically stored;

Provided that the additions under clause (c) may be made on the basis of a notional premium that is charged for delivery of silver to the place where it is physically stored.

Provided that the adjustment under above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund.

Provided further that where the silver held by a Scheme is of a greater fineness, the relevant prices shall be considered as the reference price under this sub-paragraph.

2. If the silver acquired by the silver exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of sub-paragraph (1).

B. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid marketing and advertising, registrar expenses, printing and stationary, bank charges etc. The New Fund Offer expenses of the scheme will be borne by the AMC.

C. ANNUAL SCHEME RECURRING EXPENSES

These are the fees and expenses for operating the scheme. These expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, marketing and selling costs etc. as given in the table below.

For the actual Annual Scheme Recurring expenses currently being charged, the investor should refer to the website of the Mutual Fund at <https://www.growwmf.in/downloads/expense-ratio>. As per the Regulations, the maximum recurring expenses including investment management and advisory fee that can be charged to the Scheme shall be subject to a percentage limit of daily net assets as in the table below:

The recurring expenses of operating the Scheme on an annual basis, which shall be charged to the Scheme, are estimated to be as follows (each as a percentage per annum of the daily net assets)

Maximum Total expenses ratio (TER) permissible under Regulation 52 (6) (b)	Upto 1.00%

The scheme can charge upto 1.00% of the daily net assets as management fees.

In terms of SEBI Circular SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 w.r.t. MF lite framework, the expense towards investor education & awareness will be 5% of total TER charged to the direct plan of the Scheme, subject to maximum of 0.5 bps of AUM.

Any payment towards brokerage and transaction costs (including Goods & Services Tax, if any) incurred for the execution of trades, over and above the said 0.12 per cent for cash market transactions and 0.05 per cent of the value of trades of derivative market transactions may be charged to the scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under Regulation 52 of the SEBI (MF) Regulations.

The AMC shall adhere provisions of paragraph 10.1 of SEBI Master Circular for Mutual Funds dated June 27, 2024 and various guidelines specified by SEBI as amended from time to time, with reference to charging of fees and expenses. Accordingly:

- a. All scheme related expenses including commission paid to distributors, shall be paid from the Scheme only within the regulatory limits and not from the books of the AMC, its associates, sponsor, trustee or any other entity through any route.

D. LOAD STRUCTURE

Exit Load is an amount which is paid by the investor to redeem the units from the scheme. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC <https://www.growwmf.in/downloads/fact-sheet> or may call at 8050180222) or your distributor or write to us at support@growwmf.in

Type of Load	Load chargeable (as %age of NAV)
Exit	Nil

Investors other than Market Maker/Large investors can redeem units directly with the Fund for less than Creation Unit size at the Closing NAV of the day of submission of redemption application form (Before Cut off) along with the transfer of units without any exit load if:

- Traded price (closing price) of the ETF units is at discount of more than 1% to the day end NAV for 7 continuous trading days, or
- No quotes for such ETFs are available on stock exchange(s) for 3 consecutive trading days, or
- Total bid size on the exchange is less than half of creation units size daily, averaged over a period of 7 consecutive trading days.

Such instances shall be tracked by the AMC on an ongoing basis and in case if any of the above mentioned scenario arises, the same shall be disclosed on the website of the Mutual Fund. For any change in load structure AMC will issue an addendum and display it on the website/Investor Service Centres.

The Mutual Fund may charge the load within the stipulated limit of 5% and without any discrimination to any specific group. The Repurchase Price however, will not be lower than 95% of the NAV.

The AMC reserves the right to modify/alter the load structure and may decide to charge on the Units with prospective effect, subject to the maximum limits as prescribed under the SEBI Regulations. At the time of changing the load structure, the AMC shall take the following steps:

- Arrangements shall be made to display the changes/modifications in the SID in the form of a notice in all the Groww Mutual Fund's ISCs' and distributors' offices and on the website of the AMC.
- The notice-cum-addendum detailing the changes shall be attached to SIDs and Key Information Memoranda. The addendum will be circulated to all the distributors so that the same can be attached to all SIDs and Key Information Memoranda already in stock.
- The introduction of the exit load along with the details shall be stamped in the acknowledgement slip issued to the investors on submission of the application form and may also be disclosed in the statement of accounts issued after the introduction of such load.
- Any other measures which the mutual funds may feel necessary.

The AMC may change the load from time to time and in case of an exit/repurchase load this may be linked to the period of holding. It may be noted that any such change in the load structure shall be applicable on prospective investment only. The exit load (net off GST, if any, payable in respect of the same) shall be credited to the Scheme of the Fund. The distributors should disclose all the commissions (in the form of trail commission or any other mode) payable to them for the different competing schemes of various mutual funds from amongst which the scheme is being recommended to the investor.

SECTION II

I. Introduction

A. Definitions/interpretation

For detailed description please click the link: <https://www.growwmf.in/downloads/sid>

B. Risk factors

The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme's NAV trading price, yield, total return and/or its ability to meet its objectives.

1) The NAV of the units is closely related to the value of Physical Silver. The value of this will react demand and currency movements and may result in changes in the NAV of units under the scheme. There could also be movements in the scheme's NAV due to changes in interest rates, macro-economic and political developments and over longer periods during market downturns.

2) Liquidity Risk: Trading in Groww Silver ETF may be halted due to market conditions or for reasons that in the view of the Exchange Authorities or SEBI, trading in Groww Silver ETF is not advisable. There could also be trading halts caused by extraordinary market volatility and pursuant to Silver and SEBI circuit filter rules. There can be no assurance that the requirements of the exchange necessary to maintain the listing of the Groww Silver ETF will continue to be met or will remain unchanged.

3) Regulatory Risk: Any changes in trading regulations by the stock exchange(s) or SEBI may affect the ability of Market Maker/Large Investors to arbitrage resulting into wider premium/ discount to NAV.

4) Tracking error may have an impact on the performance of the scheme. However, GAML will endeavour to keep the tracking error as low as possible.

5) The Scheme is a passively managed scheme and provides exposure to the benchmark and tracking its performance and yield as closely as possible. The Schemes performance may be affected by a general price decline in the Silver Price. The Scheme invests in the Silver regardless of their investment merit. The Mutual Fund does not attempt to take defensive positions in declining markets.

6) As the scheme proposes to invest not less than 95% of the net assets in securities comprising of Domestic Price of Physical Silver, any inflow or redemption may require sudden and immediate liquidation or acquisition of silver at the prevailing market prices irrespective of whether valuation of Silver is attractive enough. This may not always be in the interest of unitholders.

7) The performance of the Domestic Price of Physical Silver will have a direct bearing on the performance of the Silver and Currency rate.

8) Though Groww Silver ETF will be listed on the stock exchange, there is no assurance that an active secondary market will develop or be maintained.

9) Investors may note that even though this is an open-ended scheme, they will have to buy or sell units of the scheme on the stock exchanges where these units are listed for liquidity at the market price, subject to the rules and regulations of the exchange. Buying and selling units on stock exchange requires the investor to engage the services of a broker and are subject to payment of margins as required by the stock exchange/ broker, payment of brokerage, securities transactions tax and such other costs.

10) The market price of ETF units, like any other listed security, is largely dependent on two factors, viz., (1) the intrinsic value of the unit (or NAV), and (2) demand and supply of units in the market. Sizeable demand or supply of the units in Exchange may lead to market price of the units to quote at premium or discount to NAV. However, since the eligible investors can transact with the AMC for units beyond the creation unit size there should not be a significant variance from the NAV. Hence the price of ETF is less likely to hold significant variance (large premium or discount) from the latest declared NAV all the time.

11) **Capital Gains Impact:** Investors who trade in Groww Silver ETF may be subject to Long Term Capital Gains or Short Term Capital Gains. Investors are requested to consult their tax / legal consultants before investing in the scheme.

12) The units will be issued only in demat form through depositories. The records of the depository are final with respect to the number of units available to the credit of unit holder. Settlement of trades, repurchase of units by the mutual fund depends up on the confirmations to be received from depository(ies) on which the mutual fund has no control.

13) The scheme will attract provisions of take over regulations, if it invests in more than 10% of the paid up capital of a company and therefore may not be able to accept further subscription.

Risk associated with Exchange Traded Fund:

a) **Absence of Prior Active Market:** Although the units of ETFs are listed on the Stock Exchange for trading, there can be no assurance that an active secondary market will develop or be maintained.

b) **Lack of Market Liquidity:** Trading in units of ETFs on the Stock Exchange on which it is listed may be halted because of market conditions or for reasons that, in the view of the concerned Stock Exchange or Market Regulator, trading in the ETF Units is inadvisable. In addition, trading in the units of ETFs is subject to trading halts caused by extraordinary market volatility pursuant to 'circuit breaker' rules. There can be no assurance that the requirements of the concerned Stock Exchange necessary to maintain the listing of the units of ETFs will continue to be met or will remain unchanged.

c) **Units of Exchange Traded Funds May Trade at Prices Other than NAV:** Units of Exchange Traded Funds may trade above or below their NAV. The NAV of Units of Exchange Traded Funds may fluctuate with changes in the market value of a Scheme's holdings. The trading prices of units of ETF will fluctuate in accordance with changes in their NAVs as well as market supply and demand. However, given that ETFs can be created / redeemed in Creation Units, directly with the fund, large discounts or premiums to the NAVs will not sustain due to arbitrage possibility available.

d) **Regulatory Risk:** Any changes in trading regulations by the Exchange or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/ discount to NAV. Although Groww Silver ETF is proposed to be listed on Exchange, the AMC and the Trustees will not be liable for delay in listing of Units of the Scheme on Exchange / or due to connectivity problems with the depositories due to the occurrence of any event beyond their control.

e) **Political Risks:** Whereas the Indian market was formerly restrictive, a process of deregulation has been taking place over recent years. This process has involved removal of trade barriers and protectionist measures, which could adversely affect the value of investments. It is possible that the future changes in the Indian political situation, including political, social or economic instability, diplomatic developments and changes

in laws and regulations could have an effect on the value of investments. Expropriation, confiscatory taxation or other relevant developments could affect the value of investments.

f) **Right to Limit Redemptions:** The Trustee, in the general interest of the unit holders of the Scheme offered under this Scheme Information Document and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day depending on the total “Saleable Underlying Silver” available with the fund.

g) **Redemption Risk:** The Unit Holders may note that even though this is an open ended scheme, the Scheme would ordinarily repurchase Units in Creation Unit size. Thus unit holdings less than the Creation Unit size can normally only be sold through the secondary market unless no quotes are available on the Exchange for 3 trading days consecutively.

h) **Asset Class Risk:** The returns from the types of securities in which a Scheme invests may underperform returns from the various general securities markets or different asset classes. Different types of securities tend to go through cycles of out-performance and under performance in comparison of the general securities markets.

i) **Passive Investments:** As the Scheme is not actively managed, the underlying investments may be affected by a general decline in the Silver Price. The scheme invests in the Silver will be regardless of their investment merit. The AMC does not attempt to take defensive positions in declining markets. Further, the fund manager does not make any judgment about the investment merit nor shall attempt to apply any economic, financial or market analysis.

j) **Tracking Error Risk:** Factors such as the fees and expenses of the Scheme, cash balance, changes to the Underlying assets and regulatory policies may affect AMC’s ability to achieve close correlation with the Underlying assets of the scheme. The Scheme’s returns may therefore deviate from those of its Underlying assets.

k) Tracking Error of ETFs is likely to be low as compared to a Price of Silver. Due to the Creation / Redemption of units through the in-kind mechanism the fund can keep lesser funds in cash. Also, time lag between buying / selling units and the Silver is much lower. The Investment Manager would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal circumstances, such tracking errors are not expected to exceed 2% per annum. However, this may vary when the markets are very volatile. However, there can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Benchmark.

Risk specific to investing in securities forming part of Domestic Price of Physical Silver and risks:

The Scheme will invest atleast 95% of its net assets in Silver (Includes Physical Silver and other Silver related instruments as permitted by SEBI from time to time). To the extent that the scheme may concentrate its investments in silver and silver related instruments, the Scheme will therefore be subject to the risks associated with such concentrations.

As per provision no. 3.2.7.1 read with provision no. 3.3.10.2 of SEBI Master Circular on Mutual Funds dated June 27, 2024, Market risk due to volatility in silver prices: The value of the Units relates directly to the value of the underlying silver held by the Scheme and fluctuations in the price of silver could adversely affect the investment value of the Units. The price of silver may fluctuate due to various factors such as: –

1) Global silver supplies and demand, which is influenced by factors such as forward selling by silver producers, purchases made by silver producers to unwind silver hedge positions, central bank purchases and sales, and productions and cost levels in major silver producing countries such as the South Africa, the United States, Australia

and China.

- 2) Investor's expectations with respect to the rate of inflation.
- 3) Currency exchange rates.
- 4) Interest rates
- 5) Investment and trading activities of commodity funds/hedge funds.
- 6) Global or regional political, economic or financial events and situations

In addition, there is no assurance that silver will maintain its long-term value in terms of purchasing power in the future. In the event that the price of silver declines, the value of investment in units in which the scheme has invested will, in general, decline proportionately.

As per provision no. 3.2.7.1 read with provision no. 3.3.10.3 of SEBI Master Circular on Mutual Funds dated June 27, 2024, Liquidity risks in physical or derivative markets impairing the ability of the fund to buy and sell Silver: Commodities tend to be more volatile than other instruments. This may have an impact on liquidity. Liquidity considerations may have a price basis risk. Liquidity risks may arise due to issues related to the supply chain which affects the availability of Silver. During an undetermined situation, similar to what happened during the pandemic, transportation all over the world had come to a standstill. Financial markets had experienced extreme volatility and severe losses, and trading in many instruments had been disrupted. Liquidity for many instruments had been greatly reduced for periods of time, and most commodities were in short supply resulting in illiquid markets for most commodities including silver. The lack of liquidity in the physical market may also arise due to seasonality of demand and supply or volatility prices. Lastly, government regulations including change in taxation or duties levied on silver may affect the demand and supply and may affect the liquidity.

The Scheme's silver may be subject to loss, damage, theft or restriction on access. There is a risk that part or all of the Scheme's silver could be lost, damaged or stolen. Access to the Scheme's silver could also be restricted by natural events (such as earthquake) or human actions (such as terrorist attack). Any of these actions may adversely affect the operations of the scheme and consequently an investment in units.

As per provision no. 3.2.7.1 read with provision no. 3.3.10.4 of SEBI Master Circular on Mutual Funds dated June 27, 2024, Risks associated with handling, storing and safekeeping of physical silver: Currently, all physical silver procured must follow the LBMA (London Bullion Market Association) guidelines as per prescribed SEBI guidelines. Risk arises when part or all of the silver held by the Scheme could be lost, stolen or damaged and access to silver may be restricted due to natural calamities or human actions, loss or damage directly or indirectly occasioned by, happening through or in consequence of war, invasion, acts of foreign enemies, hostilities (whether war be declared or not), civil war, rebellion, revolution, insurrection, military or usurped power. Loss due to aridity, humidity, exposure to light or extremes of temperature. Hence, the Custodian maintains insurance in regard to the business on terms and conditions and the custodian is also responsible for all costs arising from the insurance policies. The custodian taking delivery on behalf of the AMC needs to ensure the weight, purity, and the source of silver as specified under the LBMA guidelines

Risks associated with Tracking errors/ difference:

Tracking error means the extent to which the NAV of the fund moves in a manner inconsistent with the movements of the benchmark index on any given day or over any given period of time due to any cause or reason whatsoever including but not limited to expenditure incurred by the scheme, whole cash not invested at all times as it may keep a portion of funds in cash to meet redemption etc. The tracking error i.e. the annualized standard deviation of the difference in daily returns between the underlying index or goods and the NAV of the Scheme based on daily past one year rolling data shall not exceed 2%. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any. However, the Fund will endeavour to limit

the tracking error within 2% limits. Tracking difference is the difference of return between the scheme and benchmark annualized over 1 year, 3 year, 5 years, 10 years and since inception period.

Tracking error/ difference could be the result of a variety of factors including but not limited to:

- Delay in the purchase or sale of silver due to illiquidity
- Delay in realisation of sale proceeds
- The scheme may buy or sell the Silver at different points of time during the trading session at the then prevailing prices which may not correspond to its closing prices.
- • The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses.
- Execution of large buy / sell orders
- • Transaction cost and recurring expenses
- Delay in realisation of Unit holders' funds
- Levy of margins by exchanges

SEBI / other Regulatory restrictions on investments and/ or divestments by the scheme / Mutual Fund, which are outside the control of AMC, which may further cause / impact the tracking error.

Risks associated with Silver

• Price fluctuations and Volatility:

Mutual Funds, like Silver investments, are subject to market and other risks and there can be neither a guarantee against loss resulting from an investment in the Scheme nor any assurance that the objective of the Scheme will be achieved. The NAV of the Units issued under the Scheme can go up or down because of various factors that affect the capital market in general, such as, but not limited to, changes in interest rates, government policy and volatility in the capital markets. Pressure on the exchange rate of the Rupee may also affect security prices.

• Concentration / Sector Risk:

When a Mutual Fund Scheme, by mandate, restricts its investments only to a particular sector; there arises a risk called concentration risk. If the sector, for any reason, fails to perform, the portfolio value will plummet and the Investment Manager will not be able to diversify the investment in any other sector.

• Liquidity Risks:

Liquidity in investments in silver may be affected by demand and currency fluctuation. These factors may also affect the Scheme's ability to make intended purchases/sales, cause potential losses to the Scheme and result in the Scheme missing certain investment opportunities. These factors can also affect the time taken by GMF for redemption of Units, which could be significant in the event of receipt of a very large number of redemption requests or very large value redemption requests. In view of this, redemption may be limited or suspended after approval from the Boards of Directors of the AMC and the Trustee, under certain circumstances as described in the Statement of Additional Information.

Risks associated with Derivatives

The Scheme may take exposures to Exchange Traded Commodity Derivatives (ETCDs) with silver as underlying.

- Pursuant to Para 7.4 of SEBI Master Circular for Mutual fund dated June 27, 2024 Derivative products are leverage instruments and can provide disproportionate gains as well as disproportionate losses to the investors. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involved

uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.

- Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with Silver and bonds. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative add to the portfolio and the ability to forecast price of securities being hedged and interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counterparty”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments”.

Liquidity Risk: While ETCDs that are listed on an exchange carry lower liquidity risk, the ability to sell these contracts is limited by the overall trading volume on the exchanges. The liquidity of the Schemes investments is inherently restricted by trading volumes of the ETCD contracts in which it invests. Additionally, change in margin requirements or intervention by government agencies to reduce overall volatility in the underlying commodity could lead to adverse impact on the liquidity of the ETCD.

Price risk: ETCDs are leveraged instruments hence, a small price movement in the underlying security could have a large impact on their value. Also, the market for ETCDs is nascent in India hence, arbitrage can occur between the price of the physical commodity and the ETCD, due to a variety of reasons such as technical issues and volatile movement in the price of the physical good. This can result in mispricing and improper valuation of investment decisions as it can be difficult to ascertain the amount of the arbitrage.

Settlement risk: ETCDs can be settled either through the exchange or physically. The inability to sell ETCDs held in the Schemes’ portfolio in the exchanges due to the extraneous factors may impact liquidity and would result in losses, at times, in case of adverse price movement. Wherein the underlying commodity is physically delivered in order to settle the derivative contract, such settlement could get impacted due to various issues, such as logistics, Government policy for trading in such commodities.

Risks associated with Debt / Money Markets (i.e. Markets in which Interest bearing Securities or Discounted Instruments are traded)

a) Credit Risk:

Securities carry a Credit risk of repayment of principal or interest by the borrower. This risk depends on micro-economic factors such as financial soundness and ability of the borrower as also macro-economic factors such as Industry performance, Competition from Imports, Competitiveness of Exports, Input costs, Trade barriers, Favourability of Foreign Currency conversion rates, etc.

Credit risks of most issuers of Debt securities are rated by Independent and professionally run rating agencies. Ratings of Credit issued by these agencies typically range from "AAA" (read as "Triple A" denoting "Highest Safety") to "D" (denoting "Default"), with about 6 distinct ratings between the two extremes.

The highest credit rating (i.e. lowest credit risk) commands a low yield for the borrower. Conversely, the lowest credit rated borrower can raise funds at a relatively higher cost. On account of a higher credit risk for lower rated borrowers lenders prefer higher rated instruments further justifying the lower yields.

b) Price-Risk or Interest-Rate Risk:

From the perspective of coupon rates, Debt securities can be classified in two categories, i.e., Fixed Income bearing Securities and Floating Rate Securities. In Fixed Income Bearing Securities, the Coupon rate is determined at the time of investment and paid/received at the predetermined frequency. In the Floating Rate Securities, on the other hand, the coupon rate changes - 'floats' - with the underlying benchmark rate, e.g., MIBOR, 1 yr. Treasury Bill. Fixed Income Securities (such as Government Securities, bonds, debentures and money market instruments) where a fixed return is offered, run price-risk. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, the payment-frequency of such coupon, days to maturity and the increase or decrease in the level of interest rates. The prices of Government Securities (existing and new) will be influenced only by movement in interest rates in the financial system. Whereas, in the case of corporate or institutional fixed income securities, such as bonds or debentures, prices are influenced not only by the change in interest rates but also by credit rating of the security and liquidity thereof. However, debt securities in the scheme are intended to be held till maturity. For such securities held till maturity, there will not be any interest rate risk at the end of the tenure.

Floating rate securities issued by a government (coupon linked to treasury bill benchmark or a real return inflation linked bond) have the least sensitivity to interest rate movements, as compared to other securities. The Government of India has already issued a few such securities and the Investment Manager believes that such securities may become available in future as well. These securities can play an important role in minimizing interest rate risk on a portfolio.

C) Risk of Rating Migration:

The following table illustrates the impact of change of rating (credit worthiness) on the price of a hypothetical AA rated security with a maturity period of 3 years, a coupon of 10.00% p.a. and a market value of Rs. 100. If it is downgraded to A category, which commands a market yield of, say, 11.00% p.a., its market value would drop to Rs. 97.53 (i.e. 2.47%) If the security is up-graded to AAA category which commands a market yield of, say, 9.00% p.a. its market value would increase to Rs102.51 (i.e. by 2.51%). The figures shown in the table are only indicative and are intended to demonstrate how the price of a security can be affected by change in credit rating.	Yield (% p.a.)	Market Value (Rs.)
Rating		
AA	10.00	100.00
If upgraded to AAA	9.00	102.51
If downgraded to A	11.00	97.53

The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments. There are certain risks inherent in derivatives. These are:

a) Basis Risk – This risk arises when the derivative instrument used to hedge the underlying asset does not match the movement of the underlying being hedged for e.g. mismatch between the maturity date of the futures and the actual selling date of the asset.

b) Limitations on upside: Derivatives when used as hedging tool can also limit the profits from a genuine investment transaction.

c) Liquidity risk pertains to how saleable a security is in the market. All securities/instruments/commodities irrespective of whether they are Silver, debt or derivatives may be exposed to liquidity risk (when the sellers outnumber buyers) which may impact returns while exiting opportunities.

d) The risk related to hedging for use of derivatives, (apart from the derivatives risk mentioned above) is that event of risk, which we were anticipating and hedged our position to mitigate it, does not happen. In such case, the cost incurred in hedging the position would be a avoidable charge to the scheme net assets.

g) Interest Rate Risk – interest rate is one of the variables while valuing derivatives such as futures & options. For example, with everything remaining constant, when interest rates increase, the price of Call option would increase. Thus, fluctuations in interest rates would result in volatility in the valuation of derivatives.

h) Model Risk - A variety of models can be used to value options. Hence, the risk to the fund is that the fund manager buys a particular option using a particular valuation model (on the basis of which the option seems to be fairly priced or cheap) but the market is valuing it using another valuation model and according to which the option may be expensive.

i) The risk (loss) for an option buyer is limited to the premium paid, while the risk (loss) of an option writer is unlimited, the latter's gain being limited to the premiums earned. However, in the case of the Fund, all option positions will have underlying assets and therefore all losses due to price-movement beyond the strike price will actually be an opportunity loss. The writer of a put option bears a risk of loss if the value of the underlying asset declines below the strike price. The writer of a call option bears a risk of loss if the value of the underlying asset increases above the strike price.

Risk associated with investment in Government securities and Triparty repo on Government securities or treasury bills:

- The mutual fund is a member of securities segment and Triparty repo on Government securities or treasury bills trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Triparty repo on Government securities or treasury bills trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counter party risks considerably for transactions in the said segments.
- The members are required to contribute towards margin obligation (Initial / Mark to Market etc.) as per bye-laws of CCIL as also an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in discharging their obligation. As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members as determined by CCIL.
- Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).
- CCIL maintains two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty repo on Government securities or treasury bills trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/ default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund.

Risks associated with segregated portfolio

- Investor holding units of segregated portfolio may not able to liquidate their holding till the time realisable value is recovered.
- Security comprising of segregated portfolio may realise lower value or may realise zero value.

- Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Risk Control/ Mitigation measures:

Risk mitigation measures for portfolio volatility and portfolio concentration:

ETF Scheme being a passive investment carries lesser risk as compared to active fund management. The portfolio invest in Silver and therefore the level of concentration in the portfolio and its volatility would be the same as that of the Physical price of the Silver, subject to tracking error. Thus there is no additional element of volatility concentration on account of fund manager decisions.

RISK CONTROL

The investment objective of the scheme is to generate returns, corresponding to the Domestic Price of Physical Silver before expenses, subject to tracking errors, fees and expenses by investing in Physical Silver. There is no assurance or guarantee that the investment objective of the scheme will be achieved.

Type of Risks	Measures/ Strategies to control risks
Silver (Includes Physical Silver and other Silver related instruments as permitted by SEBI from time to time)	<p>Investment objective of the scheme is to generate returns, corresponding to the Domestic Price of Physical Silver before expenses, subject to tracking errors, fees and expenses by investing in Physical Silver. The fund manager would endeavour to keep cash levels at the minimal to control tracking error.</p>
Debt and Money Market instruments	<ul style="list-style-type: none"> • Credit Risk: Management analysis will be used for identifying company specific risks. Management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken. • Price-Risk or Interest-Rate Risk: Since the Scheme is passively managed, price risk is inherent and cannot be mitigated. • Risk of Rating Migration: The Scheme may primarily invest the debt portion of the portfolio in short-term debt & money market instruments thereby mitigating the risk of rating migration generally associated with long-term securities

	<ul style="list-style-type: none"> • Basis Risk: The debt allocation of scheme is primarily as a cash management strategy and such strategy returns are expected to reflect the very short term interest rate hence investment is done in short term debt and money market instruments. • Spread Risk: The Scheme may primarily invest the debt portion of the portfolio in short-term debt & money market instruments, units of Liquid and Overnight schemes thereby mitigating the risk of spread expansion which is generally associated with long-term securities • Reinvestment Risk: The debt allocation of scheme is primarily as a cash management strategy and such strategy returns are expected to reflect the very short term interest rate hence investment is done in short term debt and money market instruments. Reinvestment risks will be limited to the extent of debt instruments, which will be a very small portion of the overall portfolio value. • Liquidity Risk: The Scheme has to sell silver only to designated bankers / traders who are authorized to buy silver. Though, there are adequate numbers of players to whom the Scheme can sell silver the Scheme may have to resort to distress sale of silver if there is no or low demand for silver to meet its cash needs of redemption or expenses. • Event risk/Custody Risk: <p>There is a risk that part or all of the physical silver belonging to the Scheme could be lost, damaged or stolen. In order to ensure safety, the said silver will be stored with custodian in its vaults. Silver held by custodian is also insured. The custodian will insure/cover all such risks.</p>

C. Fundamental Attributes

Following are the Fundamental Attributes of the scheme, in terms of Clause 1.14 of SEBI Master Circular for Mutual Funds dated May June 27, 2024:

D. Transaction charges and stamp duty- Indicate only the amount of transaction charges and stamp duty applicable.

TRANSACTION CHARGES:

SEBI with the intent to enable investment by people with small saving potential and to increase reach of Mutual Fund products in urban areas and in smaller towns, wherein the role of the distributor is vital, has allowed AMCs under clause 10.5 of SEBI Master Circular SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 to deduct transaction charges for subscription of Rs. 10,000/- and above. The said transaction charges will be paid to the distributors of the Mutual Fund products (based on the type of product). In accordance with the said circular, AMC / Mutual Fund will deduct the transaction charges from the subscription amount and pay to the distributors (based on the type of product and those who have opted to receive the transaction charges) as shown in the table below. Thereafter, the balance of the subscription amount shall be invested.

(i) Transaction charges shall be deducted for Applications for purchase/ subscription received by distributor as under:

Investor Type	Transaction Charges
First Time Mutual Fund Investor	Transaction charge of Rs.150/- for subscription of Rs.10,000 and above will be deducted from the

	subscription amount and paid to the distributor/agent of the first time investor. The balance of the subscription amount shall be invested.
Investor other than First Time Mutual Fund Investor	Transaction charge of Rs. 100/- per subscription of Rs. 10,000 and above will be deducted from the subscription amount and paid to the distributor/agent of the investor. The balance of the subscription amount shall be invested.

(ii) Transaction charges shall not be deducted for:

- Purchases /subscriptions for an amount less than Rs. 10,000/-; and
- Transactions other than purchases/ subscriptions relating to new inflows such as Switches, etc.
- Any purchase/subscription made directly with the Fund (i.e. not through any distributor).
- Transactions carried out through the stock exchange platforms.

Applicability of Stamp Duty : Pursuant to Notification No. S. O. 1226 (E) and G.S.R 226(E) dated March 30, 2020 issued by Department of Revenue, Ministry of Finance, Government of India, read with Part I of Chapter IV of Notification dated February 21, 2019 issued by Legislative Department, Ministry of Law and Justice, Government of India on the Finance Act, 2019, a stamp duty @ 0.005% of the transaction value shall be levied on applicable mutual fund transactions. Accordingly, pursuant to levy of stamp duty, the number of units allotted on purchase transactions to the unitholders would be reduced to that extent. The stamp duty will be deducted from the net investment amount i.e. gross investment amount less any other deduction like transaction charge. Units will be created only for the balance amount i.e. Net Investment Amount as reduced by the stamp duty. The stamp duty will be computed at the rate of 0.005% on an inclusive method basis.

For instance: If the transaction amount is Rs. 100100 /- and the transaction charge is Rs. 100, the stamp duty will be calculated as follows: $((\text{Transaction Amount} - \text{Transaction Charge}) * 0.005\%) = \text{Rs.5}$. If the applicable Net Asset Value (NAV) is Rs. 10 per unit, then units allotted will be calculated as follows: $(\text{Transaction Amount} - \text{Transaction Charge} - \text{Stamp Duty}) / \text{Applicable NAV} = 9,999.50$ units.
